3242/0265 (continued)	Munro Wholesale Medical Supplies Limited			responded to diet and other appropriate measures. Lopid is also indicated for the treatment of patients with hyperlipidaemias of Fredrickson type IIA (hypercholesterolaemia), Fredrickson type IIB (mixed hyperlipidaemia), Fredrickson type III (familial dysbetalipoproteinaemia), Fredrickson type IV (hypertriglyceridaemia) and type V (hypertriglyceridaemia). Lopid should be prescribed only for patients with lipid or lipoprotein abnormalities demonstrated by laboratory tests and where diet alone is insufficient to correct the condition.	
3787/0305	Swingward Limited, T/A Spectrum Marketing	Estraderm TTS 50	Oestradiol Valerate 4.0 mg	Prescription Only Medicine Oestrogen replacement therapy for patients with disorders due to natural or surgically induced menopause eg vasomotor symptoms (hot flushes and nocturnal sweating), Urogenital conditions such as Atrophic Vaginitis/Vulvitis and/or Atrophic Urethritis and Trigonitis. Oestrogen therapy must not be used in patients with an intact uterus unless an appropriate dose of Progestogen is administered for twelve days per month. Mode of action: Oestrogen substitution effectively prevents the characteristic symptomatic, metabolic and trophic changes associated with loss of ovarian function due to natural or surgical menopause. Estraderm TTS is a dosage form designed to achieve release of 17 β -Oestradiol, via intact skin to the systemic circulation for several days at a low rate.	26th July 1993
