1. The Director General of Telecommunications (the "Director") in accordance with section 12 (2) of the Telecommunications Act 1984 (the "Act") hereby gives notice that he proposes to make modifications to the licences granted to

AT&T (UK) LTD on 20th December 1994.

IONICA L3 LTD on 9th February 1993.

MERCURY PERSONAL COMMUNICATIONS LTD on 9th May 1995.

VIDEOTRON CITY AND WESTMINSTER on 3rd March 1994.

WORLDCOM INTERNATIONAL INC on 31st March 1994.

2. The principal modification which the Director proposes to make is the substitution of a new Condition "Public Call Box Services" for the existing provision (appearing as Condition 16, 17, 21 or 26, as the case may be, in the Licences). The effect of the proposed modification is to

- (i) remove the existing requirement for the Director to determine that there is a reasonable demand for call box services before such services may be provided at any given location;
- (ii) remove the requirement for the Licensee to install public call boxes in accordance with published guidelines approved by the Director and to provide or permit the provision of call box services at such boxes and instead to impose an obligation on the Licensee to maintain the provision of such services at any public call box at which it provides them or permits them to be provided until such services cease to be provided in accordance with the new Condition;
- (iii) require the display of a notice in public call boxes specifying the minimum charge for calls, the means by which the charge may be paid, the rate applicable, the location of the public call box for emergency purposes, that the Licensee or other person referred to in the notice will deal with complaints, that emergency calls are free and whether incoming calls are available.
- (iv) remove the current detailed restriction governing the circumstances in which the Licensee is entitled to cease providing call box services at a public call box, including in certain cases the obligation to obtain the agreement of the Director to such cessation and instead to entitle the Licensee to cease to provide or to secure the provision of such services if it has displayed in the call box a notice in accordance with the new Condition and the period mentioned in the notice (which must not be less than 42 days) has expired;
- (v) remove the requirement that prepayment apparatus installed in public call boxes is approved under the Act.

The requirement for the Licensee to provide telephones capable of being used in conjunction with hearing aids will remain. The Director also proposes to make a number of modifications consequential on the principal modification mentioned above.

3. The Director proposes to make the modifications described above because having been charged with keeping the provision of public call box services under review he has concluded that these detailed restrictions are inhibiting the development of the public payphone market. The purpose of the modifications is therefore to deregulate the position as far as possible consistent with the needs of users. This is also a convenient opportunity to transfer the requirement to display consumer information on public payphones from the approval regime under Section 22 of the Act to a licence obligation. These changes will not affect the obligations of BT and Kingston Communications whose licences carry universal service obligations requiring them to maintain reasonable access to public call boxes and imposing strict rules governing the cessation of public call box services at individual boxes. Nor will the changes affect the existing requirements of planning law as applicable to the siting etc of public call boxes.

4. The Director is required by section 12 (2) of the Act to consider any representations or objections which are duly made and not withdrawn. Following such consideration and the consent of the Licensees to the modifications, the Director proposes to make the modifications forthwith.

5. Representations on or objections to the proposed modifications and comments on such representations or objectives may be made to Glenn Fisher, OFTEL, 50 Ludgate Hill, London EC4M 7JJ (telephone 0171 634 8824) by Wednesday, 29th May. Comments on such representations, and, objections may also be made by Wednesday, 12th June. If it is not lengthy, written material may be sent by e-mail to: press.office.ofotel@gnet.gov.uk.

Any confidential material should be clearly marked as such and separated out into a confidential annex. All responses except for confidential material will be made available for inspection in OFTEL's library. OFTEL encourages interested parties to place the non-confidential parts of their responses on their own Internet pages, in addition to sending OFTEL a hard copy.

6. Copies of the proposed modifications can be obtained by phoning Rosemary Buck, Jane King or Niall Horgan at OFTEL on 0171 634 8822/8861/8862.

It is indicated for the treatment of infections before the infecting organism has been identified or when caused by sensitive bacteria. Cefuroxime may be used for the treatment of the following infections:</p> <p><i>Respiratory tract:</i> Acute and chronic bronchitis, infected bronchiectasis, bacterial pneumonia, lung abscess and post-operative chest infections.</p> <p><i>Ear, nose and throat infections:</i> Sinusitis, tonsillitis and pharyngitis.</p> <p><i>Urinary tract infections:</i> Acute and chronic pyelonephritis, cystitis and asymptomatic bacteriuria.</p> <p><i>Soft-tissue infections:</i> Cellulitis, erysipelas, peritonitis and wound infections.</p> <p><i>Bone and joint infections:</i> Osteomyelitis and septic arthritis.</p> <p><i>Obstetric and gynaecological infections:</i> Pelvic inflammatory diseases.</p> <p><i>Gonorrhoea:</i> Particularly when penicillin is unsuitable.</p> <p><i>Other infections:</i> Septicaemia and meningitis (cefuroxime is suitable for sole therapy of bacterial meningitis due to sensitive strains). In addition, cefuroxime is an effective prophylactic against post-operative infection in abdominal, pelvic, orthopaedic, cardiac, pulmonary, oesophageal and vascular surgery where there is increased risk from infection. Cefuroxime is usually effective as a single therapy in the treatment of the above infections. However under the appropriate conditions it may be used with an aminoglycoside antibiotic or metronidazole. In certain situations where mixed aerobic and anaerobic infection is suspected such as peritonitis, aspiration pneumonia, abscesses in the lung, pelvis and brain or are likely to occur, for example in association with colorectal or gynaecological surgery, cefuroxime can be administered with metronidazole. Most of these infections will respond to an intravenous regimen of cefuroxime (750 mg) plus metronidazole injection (500 mg/100 ml) administered eight hourly. In more severe or well established mixed infections, an intravenous regimen of cefuroxime (1.5g) plus metronidazole injection (500 mg/100 ml) eight hourly may be indicated. For the prophylaxis of infection in surgery (eg colorectal and gynaecological) a single dose of 1.5g cefuroxime plus metronidazole injection (500mg/100 ml) is appropriate. Alternatively, this may be followed by two 750 mg doses of cefuroxime plus metronidazole. bacteriology Cefuroxime is highly active against <i>Staphylococcus aureus</i>, including strains which are resistant to penicillin (but not the rare</p>	12th April, 1996

Maxaquin is recommended for the treatment of acute exacerbation of chronic bronchitis, upper and lower urinary tract infections (complicated and uncomplicated) and prophylaxis in trans-urethral surgery. <i>Microbiology</i> In Vitro studies have demonstrated the susceptibility of most strains of the following micro-organisms to Lomefloxacin: most species of gram-negative bacteria, including <i>Pseudomonas</i> species with the exception of anaerobic bacteria such as <i>Bacteroides Fragilis</i> , <i>Ureaplasma Urealyticum</i> , <i>Mycoplasma Hominis</i> and <i>Chlamydia Trachomatis</i> are moderately susceptible to Lomefloxacin Hydrochloride. <i>Gram-Positive:</i> Staphylococcus species (including Methicillin-Susceptible and Methicillin-Resistant strains of <i>Staphylococcus Aureus</i> and <i>Staphylococcus Epidermidis</i>) and <i>Staphylococcus Saprophyticus</i> . Most strains of Group D Streptococci (including Enterococci) and <i>Streptococcus Pneumoniae</i> are moderately susceptible to Lomefloxacin as is <i>Mycobacterium Tuberculosis</i> . Most Anaerobic Bacteria are resistant to Lomefloxacin, including <i>Clostridium Difficile</i> . Most Group A and B Streptococci are resistant. Maxaquin is slightly less active when tested at acidic Ph. An increase in inoculum size has little effect on in Vitro activity of Maxaquin. Rapid one-step development of resistance occurs only rarely (<10 ⁻⁶) in Vitro. In Vitro resistance to Maxaquin develops slowly (multiple-step mutation).	1st January, 1996
