

assayed as aforesaid was on the whole within the variation from standard weight so allowed. We then assayed separately the coins in the pound troy so taken for assay, comparing them with the standard Trial Plate made of pure silver (as prescribed by the Coinage Act 1920) produced by the Board of Trade, so as to ascertain whether the metal of the said coins was on the whole within the remedy as to fineness prescribed by the Coinage Acts 1870 to 1920, and we found that the amount of variation from the standard fineness so prescribed was Nil (—) on the whole of the coins in such pound, and that therefore the said pound troy of silver coins weighed and assayed as aforesaid was, on the whole, within the variation from fineness allowed under the Coinage Acts 1870 to 1920. We weighed in bulk the residue of the coins remaining in the said packets of silver coins and we ascertained that they were on the whole within the remedy as to weight allowed under the Coinage Acts 1870 to 1920, being plus one ounce and one hundred and two thousandths of an ounce (+1.102) above the standard weight prescribed by the said Acts.
