MINISTRY OF AGRICULTURE, FISHERIES AND FOOD DEPARTMENT OF AGRICULTURE AND FISHERIES FOR SCOTLAND

DISEASES OF ANIMALS ACT 1950

NOTICE is hereby given in pursuance of Section 85(3) of the Diseases of Animals Act 1950 that the Minister of Agriculture, Fisheries and Food and the Secretary of State for Scotland, acting jointly, have made the following Order:—

STATUTORY INSTRUMENTS 1977 No. 1838

THE ENZOOTIC BOVINE LEUKOSIS ORDER 1977 (Made 7th November 1977)

This Order, which came into operation on the 1st December 1977 and is made under the Diseases of Animals Act 1950, extends the provisions of that Act to all forms of bovine leukosis. The Order's provisions are primarily directed towards detecting and dealing with any case of enzootic bovine leukosis which may occur in this country, but since the enzootic form of the disease is only distinguishable from the sporadic variety by recourse to laboratory testing, the order in effect makes any sign or symptom of bovine leukosis infection notifiable to the Ministry of Agriculture, Fisheries and Food. It achieves this by indicating the circumstances in which a bovine animal or carcase is to be regarded as suspected of being affected with enzootic bovine leukosis.

The Order provides that where there are grounds for suspecting that bovine leukosis infection exists or has recently existed on any premises, or where it is believed that any bovine animal on any premises has been exposed to infection with bovine leukosis virus, a veterinary inspector of the Ministry may by notice declare those premises to be an infected place. Where this is done, the Order lays down detailed rules to be observed with respect to bovine animals, carcasses and other things on the premises. Alternatively, a veterinary inspector may simply require specified bovine animals on the premises to be kept isolated from other animals, and the Order sets out the restrictions which will apply in any such case.

Where suspicion of disease exists on any premises, the Order also requires that a veterinary inspector shall carry out an inquiry for the purpose of establishing whether the suspicion is justified, and if so, whether the disease is in the form of enzootic bovine leukosis. In discharging this duty, a veterinary inspector may enter any part of the relevant premises, and may examine any bovine animal or carcase found there and take such samples as may be required for the purpose of diagnosis. The occupier of the premises and any other person involved with animals kept there is required to assist the veterinary
