TECHNICAL ANNEX TO PUBLIC NOTICE INFORMATION

At the request of the Secretary of State for Energy, and as agreed by the Pipelines Inspectorate, Occidental Petroleum (Caledonia) Limited presents the following information about the Chanter Field Development:

Pre-Commissioning Testing

The pipe-line will be tested to the satisfaction of the Pipelines Inspectorate prior to commissioning.

Design Pressure

The maximum pressure in the line will be less than the pressure for which the pipe-line has been designed.

Leak Detection

Pressure and flow will be monitored at all times.

3. An underwater survey and aerial survey will be carried out to determine the location of the break.
4. Should pollution result from the discharge of the product, the emergency pollution control system held in constant readiness by the U.K. Offshore Operators Association will be mobilised.

Recommissioning

In the event of a pipe-line break, contingency plans to be agreed with the Department of Energy Pipelines Inspectorate will be carried out for the repairing of the pipe-line and proving its integrity before putting it back into service.

On Bottom Stability and Safety

The pipe-line, if authorised, will be laid in a manner that will ensure its safety and stability under all foreseeable conditions.
