FOREIGN-OFFICE, September 22, 1853.

THE Queen has been pleased to approve of Mr George N. Saunders as Consul in London for the United States of America.

*Board of Trade, Whitehall,
September 22, 1853.*

The Right Honourable the Lords of the Committee of the Privy Council for Trade and Plantations have received a Despatch from Her Majesty's Consul at Rotterdam, inclosing translations of various Notices to Mariners issued by the Minister of the Netherlands Marine Department, relative to changes in Sea Marks, copies of which are subjoined.

By Order,
T. H. FARRER.

(Copy.)

NOTICE TO MARINERS.

The Minister of Marine hereby gives notice that on account of the change which has taken place in the Friesche Sea Gat, the outside buoy and the outer buoys have been placed more eastward, and the number diminished by a black and a white buoy, so that at present the white flag buoy is the fourth white buoy on entering; that likewise the painted buoy, indicating the Sea Gat, has been substituted by a red anchor-shaped buoy with a basket top.

This red anchor-shaped buoy is placed in 100 palms depth, in the following bearings:—

The large lighthouse at Schiermonnikoog, S. $\frac{3}{4}$ E.

The large lighthouse at the Englishman's Bank, S.W. $\frac{3}{4}$ S.

The bearings in which this buoy, coming from sea can be recognized, are—the Steeple of Wieram in three, with the lighthouses on the Englishman's Bank, (namely Wieram, to the west of the small lighthouse).

The outside 1st black buoy lies in 42 palms depth, and in these bearings:—

The large lighthouse at Schiermonnikoog, S. to E. $\frac{1}{4}$ E.

The large lighthouse at the Englishman's Bank, S.W. to W.

The outside 1st white buoy lies in 45 palms depth, bearing

The large lighthouse at Schiermonnikoog, S. to E.

The large lighthouse at the Englishman's Bank, S.W. $\frac{1}{2}$ S. and on the mark, the Steeple of

Wieram, in the small lighthouse on the Englishman's Bank.

The course to be followed is S.W. to W., from the red buoy to the 4th buoy, as near as possible in the middle of the Channel.

The shallowest sounding at the entrance of the Channel is from 33 to 35 palms, it is shallowest along the white buoys.

No change has taken place in the buoys farther inland. It must be borne in mind that with northerly winds and ebb tide the navigation between the outer buoys is generally very difficult and the sea very rough. It is very difficult to enter with south-westerly winds at flood-tide. The bearings are taken by an adjusted compass, and the soundings at ordinary low water.

Ere long, buoys will likewise be placed in the Middle Gat, of which further notice will be given.

The Hague, the 18th of August 1853.

The Minister aforementioned.

NOTICE TO MARINERS.

The Minister of Marine hereby gives notice, in connexion with sundry former Notices, that, for better observation at sea, large anchor-shaped beacon buoys have been placed as outer buoys in most of the mouths of rivers in the Kingdom, furnished with a crown or top basket, and more especially—

- Outside the North-east Friesche Sea Ga .
- " " North-east Sea Gat of Ters helling.
- " " Thomas Smith Gat.
- " " Stortemelksche Sea Gat (the Flie).
- " " Westgat } of Texel.
- " " Schulpengat }
- " " Brouwershaven Sea Gat.
- " " Roompot Sea Gat (East Schelde).
- " " East Gat } Western Schelde.
- " " Wielingen }

The above-mentioned buoys, lying outside the Friesche Sea Gat, those of Terschelling and the Flie, as also those outside the East Gat of the Western Schelde, are painted red, the others are black.

For the same purpose an iron pyramidal sea buoy has for some time been placed outside the Slijkgat of Goedereede.

NOTICE TO MARINERS.

The Minister of Marine hereby gives notice, that for the better indication of the Eyerland Shallows, a lighthouse has now been erected on the Robbebol, (west point or Horst of Flieland,) as also a screen on the Texel Downs, near the Koog.

It is considered useful for the general benefit of navigation to repeat and make known the following, as a continuation to the notices regarding those Shallows, dated the 16th April and 27th October 1852.

1. The depth at five fathoms water, at ordinary low water, extends along that part of the coast from opposite the Koog on Texel, along the Eyerland Shallows, to opposite Flieland, about N.E. and S.W. to N.E. by E., and S.W. by W. (per compass), and especially

- a. In the W. N.W. from the screen near the Koog, at the distance of half a German mile.
- b. Along the west coast of the Eyerland Shallows in the W. N.W., at $\frac{2}{3}$ of a mile distance from the look-out post in the Downs of Eyerland ;
- c. In the W. N.W. at fully half a mile distance from the lighthouse of the Robbebol ;
- d. And in the N. N.E. at nearly $\frac{2}{3}$ of a mile distance from the above-mentioned lighthouse ;

2. The screen has been placed in the Downs of Texel, near the Koog, for the better, surer, and quicker observation of the Island Texel, and as a warning for the Eyerland Shallows ; the lighthouse on the Robbebol (Horst or west end of Flieland,) has been erected for the same purpose, as also to make ships keep further off the coast at this point.

3. The screen is placed on the Downs, near the Koog, bearing N.E. by E., and S.W. by W., about 30 Netherland ells above high water ; and in shape resembles the roof of a house.

4. The lighthouse on the west corner of the Robbebol is placed 18 Netherland ells above highest water, and remains dry in ordinary spring-tides. This light is furnished with two oval screens, the one bearing N.E. and S.W., and the other N.W. and S.E.

This part of the coast is generally approached far too closely, especially by small ships and ignorant parties, and very great risk is incurred by sailing near the coast and shallows ; even in fine weather, with the wind off land, ships, as well by day and night, are very apt to run aground or out of their course with squally weather and by the misguidance of the currents along the coast and at the mouth of the river.

5. The lighting of the coast hereabouts may also be considered as very satisfactory, for

- a. The Light of Flieland is, with ordinary beacon sight, visible at fully $3\frac{1}{2}$ miles distance, close up to the coast of Flieland, in the Eyerland Shallows, and even at a small distance from the coast at Texel, near the Koog ;
- b. The revolving light of Treschelling is also visible from sea at 5 miles distance to a little north of the Eyerland Shallows ; and

The light of Kijkduin, which (when repaired) soon be visible at a distance of 5 miles, remains visible, coming from the west, until after having reached the south-west beyond and past the west corner of the Downs of Texel ; especially when observed at some elevation from the rigging when close on the Texel coast, the light of Flieland is or becomes visible.

Although the above-mentioned observations will be found very useful as well for guidance as warning, still mariners are strongly recommended, when sailing round or along that coast (corner of Texel), to keep *well off the coast, and not to omit betimes* frequently to use the sounding lead.

The currents close in shore would greatly mislead ships (especially in stormy weather and with spring-tides) wishing to work their way up close in shore, particularly for those who are little acquainted with the locality ; and in thick or foggy weather, or at night, if neglected, bad charts and uncertain marks would soon cause the loss of the ship.

NOTICE TO MARINERS.

Lighthouses on the Coast of Spain.

The Minister of Marine has communicated to this office, through the Ministry of Public Works, the following detailed information respecting the situation of two new lighthouses erected on the coasts of the Spanish Peninsula by the Corps of Engineers of Roads, Canals, and Ports :—

ATLANTIC OCEAN.

Lighthouse on the Cies Islands.

Province of Pontevedra.

From the 19th of November next a new lighthouse, established on the top of Mount "Faro," which is the foremost point of the southern extremity of the "Isla del Centro," will be lighted every night from sunset to sunrise.

This lighthouse lies in—

42° 12' 23" N. latitude, and

2° 41' 50" W. longitude from the Observatory of San Fernando.

Its apparatus is of the second catadioptrical order, with eclipses every other minute. The light's elevation above the level of the sea is of 650 feet, Burgos measure, and produces a tangent of 31 miles ; but it will be visible from a greater or minor distance, according to the state of the atmosphere and the elevation of the observer.

Lighthouse of Castro Urdiales.

Province of Santander.

From the 19th of November next a new lighthouse, established on the Tower of the Castle of "Santa Ana," will be lighted every night from sunset to sunrise. Its distance from the line of level of the sea waters is of 52 feet, Burgos measure, and the rocks on which the hermitage of "Santa Ana" is situated, extend themselves, in the south-eastern direction, to the distance of 318 feet.

This lighthouse lies in—

43° 24' 10" N. latitude, and
2° 56' 10" E. longitude from the Observa-
tory of Sⁿ Fernando.

Its apparatus is of the fifth catadioptrical order, with a *fixed Light*, varied with *red flashes* every three minutes, and illuminates an arc of the horizon of 270 degrees. This light's elevation above the level of the sea is of 143 feet, and produces a tangent of 13 miles; but it will be visible from a greater or minor distance, according to the state of the atmosphere and the elevation of the observer. The above is hereby published, by command of the Queen, for the guidance of mariners.
