NOTICE TO MARINERS.

LIGHT-HOUSE ON CAPE LA HIGUERA.

FROM the 1st of next April, the new Light-house erected on the above-mentioned Cape, at the mouth of the river Vidasoa, will be lighted during the same hours of the night (from sunset to sunrise) as the light on Mount Igueldo, instead of the light at present existing on that place. This Light-house lies on the western coast of the creek of the town of Tuenterrabie, in—

43° 23' 35" N. Latitude,—and

4° 25' 17" E. Longitude from the Naval Observatory of San Fernando.

Its apparatus is of the fifth catadioptrical order, with a permanent light of a natural colour, and its range of about 7 miles, when the state of the atmosphere will allow it.

The elevation of the light above the level of the sea is of 312 Castilian feet.

The new Light-house on Cape La Higuera is the first of the lights on the northern coast of Spain on the Ocean, and is therefore combined with the French Lights of the port of Socoa, which is a permanent one, and of the Biarritz Light-house,
