

DUBLIN CASTLE, September 16, 1856.

Her Majesty's Letters Patent have passed the Great Seal of Ireland, granting the dignity of Baron of this part of the United Kingdom of Great Britain and Ireland, to Edmund Burke Roche, of Trabolgan, in the County of Cork, Esquire, and the heirs-male of his body lawfully begotten, by the name, style, and title of Baron Fermoy, in the said County of Cork.

NOTICE TO MARINERS.

(No. 28.) UNITED STATES OF AMERICA.

The Light-house Board of the United States has issued the following notices:—

Red Light at the Narrows, Boston Harbour.

A fixed red light was exhibited on the night of the first of August 1856, (in conformity to previous notice), from the screw pile lighthouse erected on the Spit abreast the Narrows, Boston Harbour.

The house is a hexagonal building, painted a dark brown colour; is elevated on seven iron piles, and surmounted with an iron lantern.

The light is designed as a guide for clearing the Spit, by vessels passing through the main ship channel, and is illuminated by a lens apparatus of the 6th order, elevated 35 feet above high-water mark.

This light in range with Long Island Head Light will take a vessel clear of the Harding's.

From Point Alderton Buoy this light is in range with Long Island Head Light, and they bear W.N.W. $\frac{1}{4}$ W. This course will take a vessel, by the buoy, in 19 feet water at low tide. Large vessels, in entering, should bring Long Island Head Light open to the northward of the Spit Light.

The following magnetic bearings are given from this light:

- False Spit Buoy, E.S.E. $\frac{1}{4}$ E.
- Point Alderton Buoy, E.S.E. $\frac{1}{4}$ E.
- North Centurion Buoy, S.E. $\frac{3}{4}$ S.
- Long Island Head Light, W.N.W. $\frac{1}{4}$ W.
- Mix's Mate Beacon, N.W. $\frac{1}{4}$ W.

Fog Bells on Mount Desert and Matinicus Rocks, Coast of Maine.

A fog bell, weighing 1,500 pounds, has been placed on Mount Desert Rock, near the lighthouse. The bell is placed on an open frame structure, painted white and brown, and is about 50 feet above the level of the sea. It is worked by machinery, and strikes about seven times in one minute.

A bell of the same weight has been placed on Matinicus Rock, on a frame precisely like that of the Mount Desert Rock Bell. This bell strikes ten times in one minute.

Both of these bells will be sounded hereafter in thick weather.

By Command of their Lordships,

JOHN WASHINGTON, Hydrographer.
