

## NOTICE TO MARINERS.

(No. 66.)—IRELAND—SOUTH-WEST COAST.

## Alteration of Light at Crookhaven.

THE Port of Dublin Corporation has given Notice, that on and after the 1st day of February 1860, the following alteration will be made in the light at present exhibited from the lighthouse situated on the north side of the entrance to Crookhaven, on the south-west coast of Ireland.

The light, which is a *fixed* light, will continue to show *white* towards Long Island Bay, and towards the inner portion of Crookhaven, but it will be coloured *red* in the direction of the Alderman Rocks and Streek Head, or when bearing from a vessel between N.W.  $\frac{1}{2}$  W. and N. by E. Vessels therefore, about to enter Crookhaven, should, in order to clear these rocks, in passing them keep to the northward of the northern limit of the red light. The light is elevated 82 feet above the level of high water; the white portion of it should be visible in clear weather from a distance of 13 miles, and the red about 10 miles.

The light tower is circular, 45 feet high, and coloured white. It stands in lat.  $51^{\circ} 28' 35''$  N.; long.  $9^{\circ} 42' 39''$  West of Greenwich.

A Beacon will be erected on the outer eastern point of the Alderman Rocks, of which due notice will be given.

[The bearings are Magnetic. Variation  $26\frac{1}{4}^{\circ}$  West, in 1859.]

By Command of their Lordships,

JOHN WASHINGTON, Hydrographer.

Hydrographic Office, Admiralty, London,  
13th December 1859.

This Notice affects the following Admiralty Charts:—Ireland, South-West Coast, No. 2184; Ireland, Sheet 14, No. 1996; and English Channel, Sheet 3, No. 2675c. Also British Islands Lights List, No. 401.

## NOTICE TO MARINERS.

(No. 69.)—NORTH ATLANTIC—BAY OF FUNDY.

## Fixed Light on Grindstone Island.

INFORMATION has been received at the Admiralty, that the light is exhibited from the light tower recently erected on the western point of Grindstone Island, on the New Brunswick shore, at the head of the Bay of Fundy.

The light is a *fixed white* light, placed at an elevation of 60 feet above high water, and visible in clear weather from a distance of 12 miles. The rise of tide at springs is about 48 feet.

The light tower is octagonal, and painted white. It stands in lat.  $45^{\circ} 43' 13''$  N.; long.  $64^{\circ} 37' 25''$  West of Greenwich, and from it Cape Enrage lighthouse bears S.W. by W.  $\frac{1}{2}$  W. 10 miles. The keeper's dwelling is about 50 feet to the eastward of the light tower, and is also painted white. The above position is according to Captain Shortland, R.N., but the longitude differs about 10 miles from the position of Grindstone Island on the Admiralty Charts.

[The bearings are Magnetic. Variation  $19\frac{1}{2}^{\circ}$  West, in 1859.]

By Command of their Lordships,

JOHN WASHINGTON, Hydrographer.

Hydrographic Office, Admiralty, London,  
16th December 1859.

This Notice affects the following Admiralty Charts:—Inner part of the Bay of Fundy, Sheet 2, No. 353; and North America, East Coast, Sheet 4, No. 267.
