HYDROGRAPHIC NOTICE.

(No. 4.)—CHINA.—EAST COAST.

Entrance to the River Min.

THE following information, dated 30th August 1865, has been received from the Commander-in-Chief on the China station, respecting the existence of new shoals at the entrance of the River Min, and also of the discovery of a shoal in the northern part of the China Sea :—

Mr Shay, Pilot for the River Min, states that since the survey of that river by Mr J. Richards, Master, R.N., in 1854, new shoals have formed at the entrance, and the mark for large vessels to enter, High Sharp Peak open southward of Sharp Island peak, N.W. $\frac{3}{4}$ W,* now leads in three fathoms water (the chart shows four fathoms) over a bar which extends across from the South Breakers to the Outer Knoll; and it also leads close to the southward of the south extreme of a shoal of seven feet water, extending about S.W. by S., three-quarters of a mile from the Inner Knoll.

Sharp peak and High Sharp peak in line, lead in seven feet water (the chart shows two fathoms) over a bank extending from Rees Rock to Nine-foot Patch.

The channel between the Inner Knoll and North Breakers is rapidly filling up with knolls of sand, and is not navigable. Where the chart has four fathoms there are now only two fathoms.

Rees Rock is marked by a stone beacon; and a beacon has been placed on Middle Dog Island.

CHINA SEA.

The Commander of the Bremen steamer Singapore reports that on his passage to Hong Kong, 13th May 1865, his vessel passed over a rocky shoal, on which soundings were obtained in 10 fathoms water. Its position is lat. 19° 10' N., long. 113° 53' east of Greenwich, which was obtained by noon observations, and by three chronometers nearly agreeing.† The weather was nearly calm at the time, and the vessel was about an hour and a half over the shoal, which was considered to be three miles in extent.

Caution.—As the above position places this shoal nearly in the usual track of vessels bound to Hong Kong in the S.W. monsoon, its locality should be navigated with caution, especially at night. H.M.S. Princess Royal, at 4 a.m. on the 28th June 1865, passed three miles westward of its assigned position, but did not obtain soundings with leads going in both chains.

Hydrographic Office, Admiralty, London,
13th November 1865.
