From the Polifb Camp at Zorawno, Ottob. 14. He 7th inflant Hateck Aga, who is the chief Minifler to the Cham of Zartary, and Sultan Nuradin, fent to make new Proposals to our King in order to a Peace, which his Majelly would not accept. The next day we perceived that the Enemy defigned to make fome attempt upon us, and about two in the afternoon we faw their Cayalry advance rowards our Camp; his Majefty fent out a fmall Body to skirmish with them, but in the mean time the Turiff Infantry began to environ our Camp; upon which our King polled his Forces in fuch manner as they, might he best able to defend our Lines, and particularly 'doubled the Guard which was in a certain Fort, that the Infidels had defigned to poffels themfelves of the general Officers were at their feveral flations, and the King animaing where it was molt needful the Soldiers with his presence; in this polluce we received the Enemy, and af-ter a Fight of about two hours, obliged them to retire to their Cacip, in great diforder, having killed a Bassa, two Agars, and leveral other Officers, with a great many Fanzzaries, and others; at which repulse the Infidels were fo extremely enraged, that having worked all night to raffe their Batteries Aighor than, they were before a they begun the next morning at break of day to fire into our Camp, and fo continued hys days together without abe leaft intermittion ; that we cati only artribute it to The Divine Providence, that fo great a humber of thot which fell in our Camp, destroyed to few of our men, whole lofs would have been the lefs confiderable, had it not been accompanied with that of Major General Zethordski, who walking on foot from his own ro rhe Kings quarters, was cut in two by a Cannon Bullet. We had "quarters, was cut in two by a Cannon Bullet. indeed alwayes believed that the Army of the FurAs and Tartars was very numerous, but when we'faw them that day environ our Camp in a manner which would have 'daunted the most refolute, we reckoned that they we're above 150 000 men, fo that it may feen almost a miracle, that an Army of 15 or 16000 men (as ours' is) should not only be able to relift fo formidable a Force, but like #ile to oblige the Enemy by the great ellesm they have af the refolution and conduct of our King to abute very much of their pretensions; which at first were very exorbitanes and to which we flould have been forced to * yield, had they known their own firength, and the posture whywere in This, morning the Enemy fent again to

Treat about Peaces and to propose an immediate Ceffàtionof Arms, which was grantell; and juli dow we are Beluted fifty the Peace is concluded very much to the honour, and advantage of this Grawn, confidering how matters thood with us.
