

The following table shows the results of the survey conducted in the year 1977-1978. The data is presented in a tabular format, with columns representing different categories and rows representing individual data points. The table is organized into several sections, each corresponding to a different aspect of the survey. The first section, labeled 'Section A', contains data for the first three categories. The second section, labeled 'Section B', contains data for the next three categories. The third section, labeled 'Section C', contains data for the final three categories. The data is presented in a clear and concise manner, allowing for easy comparison and analysis of the results.

Category	Item 1	Item 2	Item 3
Section A	10	20	30
Section B	40	50	60
Section C	70	80	90

The survey results indicate a significant increase in the number of respondents for each category over the period. This suggests a growing interest in the topics being surveyed. The data also shows a clear trend of increasing values across the different sections, which may be related to the progression of the survey or the nature of the questions being asked.
