

an impregnable Bulwark for the Protection of every Thing dear to them, and an illustrious Precedent of genuine Patriotism to future Time.

The Voice of Omnipotence has arrested the Devastation of a bloody, extended, and expensive War, and long contending Nations are at length at Rest. Your Majesty's faithful Subjects, who have struggled for the Attainment of this important Period, will, while they appreciate the Blessings of Peace, know likewise to prize its Duties, by which alone those Blessings can be secured. They will perceive that a faithful Adherence to the Laws, and a Reverence for the Constitution that framed them, are inseparable: and that, by their unshaken Loyalty to their Sovereign, their unswerving Attachment to the revered System of our Ancestors, that Constitution has, under Providence, been hitherto preserved, and will be able to stem the Torrent of Ages yet to come.

Your Majesty's loyal Citizens of London renew at this Moment most ardently their fervent Prayers for the long Continuance of your Majesty's auspicious Reign, and for every Blessing which your royal Bosom can receive from the Prosperity and Happiness of a free, grateful, and united People.

Signed by Order of Court,
HENRY WOODTHORPE.

To which Address His Majesty was pleased to return the following most gracious Answer:

I Thank you for this very loyal and affectionate Address, and for your Congratulations on the Restoration of the public Peace.

Your cordial and steady Attachment to Our invaluable Constitution, and the lively Sense you express of the unrivalled Exertions which have been displayed by My Subjects of every Description, are most grateful to Me, and cannot fail to secure to My City of London My constant Favor and Protection.

They were all received very graciously, and had the Honor to kiss His Majesty's Hand.

After which His Majesty was pleased to confer the Honor of Knighthood on William Rawlins, Esq; one of the Sheriffs.

NOTICE TO MARINERS, from the Danish Royal Council of Customs and of the Indies, dated Copenhagen, 6th April 1802.

HIS Majesty having been pleased to order that there shall be a Watch Light on the Northern Coast of Bornholm, to guide the Navigators of the Baltic, we give Notice, That Examination having been made of the most convenient Place from whence the Light might be most distinctly seen, as well by those who come from the West as by those who come from the East and the North, and who wish to pass between Bornholm and the Coast of Sweden, a Light-House has been constructed on the Mountain called Steileberg, which is situated, by the Compass, about a Quarter of a Mile from the Northernmost Bay of Bornholm. In consequence of the Height of this Mountain, this Light-House will be 272 Feet above the Level of the Water. Although it is lighted by Means of a Coal Fire, it is surrounded by a Glass Case or Lanthorn of 14 Feet Diameter, constructed upon a New Principle, so that, in all Weathers, the Flame will rise without Interruption, and the Light will be augmented

by it, because that Part of the Case or Lanthorn which is on the Land Side, and every Part from whence the Light cannot be seen at Sea, is a Wall, the Interior of which is covered with Plates of polished Block-Tin.

This Light-House will be lighted up for the first Time, on the 24th June 1802, and afterwards it will be continued according to the Terms of the Ordinance of the 21st March 1705, and of the Proclamation of the 1st February 1799, so that in Summer, that is from Easter-Day to Michaelmas-Day, it will be kept burning from an Hour after Sunset till Sunrise, and in Winter, that is, from Michaelmas-Day to Easter-Day, from Half an Hour after Sunset till Sunrise.

Done at Copenhagen, at the Royal Council of Customs and of the Indies, the 6th April 1802.

[Then follow the Signatures.]
