Leafhold Iron-Works, Collieries, and Farms, in the Neighbourhood of Sheffield, in the County of York.

TO be sold to the highest Bidder, in the House of Mr. Samuel Peech, the Angel Inn, in Sheffield, on Tuesday the 11th of October instant, at Two o'Clock in the Afternoon, by Order of and before the major Part of the Commissioners acting under a Commission of Bankrupt awarded and issued against Mr. Richard Swallow, of Attercliffe-Forge, in the Parish of Sheffield, in the County of York, Iron-master, Dealer and Chapman, subject to such Conditions of Sale as will be then produced, and in such Lots as will be then declared,

All those very valuable and extensive Iron and Coal Works, situated at Chapel-Town and Hesley, in the Parish of Ecclesfield, in the County of York, at about an equal Distance of 6 Miles from Sheffield, Barnsley, and Rotherham, to all which Places they have excellent Roads; they are also within 5 Miles of the River Don Navigation, and a shorter Distance of several other navigable Canals, by which they have a ready Communication with Hull, and the Yorkshire, Lancashire, and Staffordshire Canals.—The Iron Works occupy a Site of nearly 4 Acres of Land, besides the Water-Goights and Dams; and consist of Two Blast-Furnaces, with Bridge-Houses, Casting-Houses, Sand-Pit, Drying-Stove, Air-Furnace, Cupolas, and Two Refineries, with suitable Shops, Warehouses, Counting-House, &c.; also of a capital single-powered Patent Engine, with Cast-Iron Regulator-Beam, Steam Cylinder, 44 Inches in Diameter, and an Air Cylinder, 84 Inches in Diameter, Two Boilers of suitable Dimensions, and a Cast-Iron regulating Vault, 38 Feet long, and 12 Feet wide, inside Dimensions, with several other valuable Conveniences.

The Engine is in complete Repair, and is supplied with condensing Water by Pipes from the Furnace-Dam, without having Occasion to lift it at all.

These Works are held by Lease from his Grace the Duke of Norfolk, for a Term of 42 Years from the 25th of March 1802, under the yearly Rent of 40l.

The Iron and Coal-Mines are near the above Furnaces, and very extensive; the Ore is rich, and in Abundance; the Coal is also of an excellent Quality, (the deep Levels of which are from 35 to 40 Yards from the Surface) and is drained partly by Soughs, and partly by a new erected Steam-Engine, with a 40 Inch Steam Cylinder, which has only to lift the Water 10 Yards into a new Sough, and it also raises to the Surface such Water as is wanted to supply the Machines or Wimsey Tubs to draw up the Coals.

There are now Seven Working-Shafts on these Collieries, which not only supply the Iron-Works, but one of them is also in considerable Estimation as a Sale Colliery, and has supplied the Neighbourhood for near a Century.

These Mines are also held by Lease from the said Duke of Norfolk for a Term of 21 Years, which commenced at Lady-Day 1804, under moderate yearly Rents.
