Copy of a Letter from the Right Honourable Lord Gambier, Admiral of the White, &c. to John Wilson Croker, Esq. dated in London, the 10th Instant.

SIR,

I REQUEST you will communicate to the Lords Commissioners of the Admiralty the accompanying Letter, dated the 28th September, which I have this Day received from Rear-Admiral Sir Harry Neale, Bart. giving an Account of a very well-conducted, gallant, and successful Attack made by a Party of Seamen under the Orders of Lieutenant Hamilton, first of the Caledonia, and of Marines under the Orders of Captain Sherman of that Ship, in the Boats of the Squadron in Basque Roads, named in the Margin *, upon Three laden Brigs of the Enemy, under the Batteries of Point du Ché, near Rochelle, two of which they captured, and burnt the third; and I beg Leave to call their Lordships' Notice to the Observations which Sir Harry Neale has made respecting the Loss sustained by Lieutenant Little of the Royal Marines.

I have the Honour to be, &c.

(Signed) GAMBIER.

Caledonia, in Basque Roads,

MY LORD,

September 28, 1810.

SINCE my Letter of the 12th Instant, detailing the Capture and Destruction of Three of the Enemy's Brigs on the East Coast of this Road, the small Vessels with the Boats of the Caledonia and Valiant have been successfully employed in stopping the Coasting Trade between Rochelle and the Isle of Aix, but more particularly in blockading Three of the Enemy's Brigs that had sought Protection under the Battery upon Point du Ché, and forming Part of a Convoy to which the former Vessels belonged, the whole of them laden with Timber and Provisions on account of Government. I have now the Honour to inform your Lordship, that the Tide being sufficiently high, and the Nights dark, I judged it practicable to effect either the Capture or Destruction of these Vessels, but as the Enemy had strengthened his Position with Four Field-Pieces, and their Artillerymen posted upon the Beach, and on a low Point situated under the

* Caledonia, Valiant, and Armide.

Battery, with a strong Detachment of Foot and Horse in the adjoining Village of Angolin, it was obvious we could only succeed with the Means we possessed in effecting this Object, but by a Coup de Main, and with a Force adequate to the Resistance that was likely to be immediately opposed to us. In consequence of this Persuasion I directed One Hundred and Thirty Marines from the Caledonia and Valiant to be embarked in the Boats of their respective Ships, under the Direction of Captain Sherman, of the Royal Marines of this Ship, for the Purpose of landing under Point du Ché, to carry the Battery and Field-Pieces by Assault, and to spike the Guns, allotting to the other Boats of the Squadron the Capture or Destruction of the Brigs. I have the Satisfaction to acquaint your Lordships, that this Force proceeded last Night, agreeably to the Arrangement I had previously made, under the Command of Lieutenant Hamilton of this Ship, with the other Lieutenants of the Squadron, who also volunteered their Services in the Command of the different Boats upon this Occasion, the whole acting with that Degree of Zeal, Regularity, and Attention I had every Reason to expect, and which so much contributes to the Success of an Undertaking.

The Marines were landed at the Place appointed about Half-past Two o'Clock in the Morning, but notwithstanding the near Approach of the Boats before they were discovered, the Alarm was given from the Brigs, and an ineffectual Fire was immediately opened upon them from the Enemy's Guns. Lieutenant Little, of the Royal Marine Artillery, immediately on landing pushed forward with the Bayonet to the Assault, supported by Captain M'Lauchlin's Division, with Lieutenant Colter, both of the Royal Marines of the Valiant, and Lieutenant Gouche of this Ship, with a separate Detachment, and succeeded in carrying the Battery and spiking all the Guns. Lieutenant Little, in a personal Contention with one of the Enemy, when in the Act of wresting his Musket from him, received the Contents in his Hand, which was so much shattered in consequence as to render Amputation necessary. Captain Sherman at the same Time took post with his Division upon the main Road by the Sea Side, with his Front to the Village, and an Eighteen-Pound Carronade on his

Right in one of the Launches. In a few Minutes a considerable Body of Men advanced from the Village, and were instantly checked in their Approach by a warm Fire from the Marines and the Boat; at this Period the Enemy had succeeded, under Cover of the Night, in bringing a Field-Piece to flank the Line, which the Picquet immediately charged with the Bayonet and took from him, putting the Men to flight. The Object of this Service being now executed by the Capture of two of the Brigs, and the Destruction of the other by Fire, the Marines were immediately re-embarked in the most perfect Order without the Loss of a single Man, and only One other Person, a Private belonging to the Valiant, wounded.

The Enemy had Fourteen Men killed in defence of the Battery upon Point du Ché, what Loss he sustained by the Fire from Captain Sherman's Division, and from the Launch, it is impossible to say, but he must have suffered considerably, as his Line was much exposed and completely kept in check.

I have felt it to be my Duty to be thus particular in the Detail of Circumstances upon this Occasion, for although the Service performed is in itself of little Importance, yet it required the Promptitude and Exertion of the Officers and Men employed upon it that frequently is not so necessary in Undertakings of greater Magnitude; and I am solicitous to do Justice to the Merits of all the Officers and Men employed upon this Service. I must beg in particular to call your Attention to the Conduct of Lieutenant Little, who was most materially engaged upon this Occasion, and whose Loss of his Right Hand will be severely felt, in the Hope that the Lords Commissioners of the Admiralty will take into Consideration the Injury he has sustained.

I have the Honour to be, &c.

(Signed) H. NEALE.

Navy-Office, June 25, 1810.

THE Principal Officers and Commissioners of His Majesty's Navy hereby give Notice, that a Plan of Education has been established, at the Royal Naval

College at His Majesty's Dock-Yard at Portsmouth, for a Superior Class of Apprentices to Shipwrights.

That the Number of Students in the Superior Class of Shipwrights' Apprentices shall, in the first Instance, be limited to Twelve, but will gradually be encreased to Twenty-five. The period of Apprenticeship shall be Seven Years, but for a Student who may have previously served in the Inferior Class of Apprentices in His Majesty's Yards for the Space of Two Years, it shall be only Six Years, and only Five Years for a Student who may have previously served in the said Class for the Space of Three Years.

An Instructor in the Theory of Naval Architecture will be added to the present Establishment of the Royal Naval College, to assist particularly in the Instruction of this Class of Apprentices.

The Candidates for Admission must produce Certificates from two respectable Physicians or Surgeons that they are of sound Health and Constitution, and likewise Proof from the Register of the Parish in which they were born, of their being at least Fifteen, and not more than Seventeen Years of Age, excepting Candidates from among the Shipwrights' Apprentices of the Yard, who may be admitted if they shall not have served more than Three Years of their Time. Candidates shall be examined on the first Wednesday in November in each Year, by the Professor of the Royal Naval College, assisted by the Instructor in the Theory of Naval Architecture, in the Presence of the Commissioner of the Yard, the Lieutenant Governor of the College, and Master Shipwright, who shall jointly report the Result of the Examination to the Lords Commissioners of the Admiralty, carefully inserting the Names of the Candidates in Succession according to their respective Merits.

The following shall be the Subjects of Examination, with which every successful Candidate must be perfectly acquainted.

- 1st. Reading English, and writing it with Facility from Dictation.
- 2d. The first Four Rules of Arithmetic, and the Rule of Three in whole Numbers, and also in Vulgar and Decimal Fractions.
- 3d. The first Three Books of Euclid's Elements by R. Simson, with the Exception of Propositions 42, 44, 45, Book I. and of Propositions 8, 9, 10, 11, 14, Book II. In this Part of the Examinations, besides giving the most precise Demonstrations, the Candidates will be expected to make the Constructions in a practical Manner with Compasses and a Ruler.
- 4th. The French Language, a Knowledge of which, although not absolutely required in the Candidates who may present themselves at the first Examination which is to be held, will nevertheless give a Preference to those, who are in all other Respects equally qualified; at all subsequent Examinations, however, the Candidates will be required to read and translate French with Facility.

After Admission into the Superior Class, the Apprentices shall attend at the Royal Naval College Three or Four Hours on the Mornings of every Day in the Week, except Sunday and the established Holidays, where they shall be instructed in such Parts of the following Subjects as shall appear

to the Professor of the College to be best adapted to the Object of the Establishment, viz. the Formation of able and useful Ship Builders:

Geometry	Fluxions
Algebra	Theory of Naval Architecture
Plane Trigonometry	Architecture
Mechanics	Drawing
Hydrostatics	The French Language.

On Mondays, Tuesdays, and Wednesdays, the Apprentices shall be employed at the College during the Hours above-mentioned, in the Study of Mathematics, under the Professor or the Instructor; on Thursday and Friday Mornings in Drawing, under the Drawing Master, the Art of Perspective being most particularly applied in drawing the different Parts of a Ship; and the Morning of Saturday shall be appropriated to the Study of such Books and Exercises in the French Language, under the French Master, as may perfect them therein, and at the same Time advance their professional Knowledge. This Division of Time allotted for their Studies, is, however, to be subject to such Alterations as shall appear to the Professor best calculated for promoting the Object of the Institution.

In the remaining Part of the Day, when not attending at the College, they shall be employed under the Master Shipwright or Instructor of Naval Architecture, in the Mould Loft, in the various Kinds of manual Labour connected with Ship-building; in the Acquirement of a complete Knowledge of the different Parts of a Ship, and of the Method of constructing and fastening the same, as well as in discriminating her different Properties deducible from theoretical Calculations; also in the Management and Conversion of Timber, and generally, in such other Manner as the Master Shipwright may consider as best adapted to make them fully acquainted with all the Detail of the Duties of a practical Shipwright.

To ensure the Punishment of Offences committed by them during their Attendance at the College, a Book shall be kept by the Instructor, in which such Offences shall be entered; and at the End of each Week, or oftener if there be Occasion, this Book shall be sent to the Office of the Commissioner, who will order such Punishment to be inflicted, as may be conformable to the usual Treatment of Apprentices in the Dock-Yard.

And at the End of each Year, a Public Examination shall take place, in the Presence of the Officers mentioned in the 3d Article, and a general Statement of the Improvement of the respective Apprentices in the theoretical Part of their Profession, shall be transmitted by the Professor of the College, and of their Progress in the practical Part by the Master Shipwright, through the Commissioner of the Dock-Yard, to the Admiralty Office; to the End that, if it shall appear that an Apprentice has particularly distinguished himself in any of the Departments of his Profession, the Lords Commissioners of the Admiralty may confer on him such Mark of their Approbation, as their Lordships may deem expedient.

The last Year of their Apprenticeship, or such Part thereof as the Lords Commissioners of the Admiralty may think proper, shall be served at Sea, in such of His Majesty's Ships as their Lordships shall direct, with a view of obtaining some practical Knowledge in the steering, sailing, trimming, and

ballasting of a Ship, in making Remarks on the Motion and working of a Ship, in all her Parts, in bad Weather, and on a high Sea, the standing and straining of the Masts and Yards under such Circumstances, the placing of the fixed Blocks, with a view to the proper leading of Ropes, &c. and, generally, in obtaining such Information, as the Captain, Carpenter, and other Officers of the Ship may, by their Experience, communicate, and such as their own Observations may suggest.

During the Time that such an Apprentice shall be on board a Ship, he will be required to keep a Journal of his Remarks and Observations, arranged under distinct Heads, noting such Improvements in any Part of the Ship, or any Thing connected therewith, as may suggest themselves to him, from a minute Attention to the Circumstances by which a Ship is affected at Sea; a Copy of which Journal is to be transmitted to the Admiralty.

A Cabin or Berth will be allotted to him in the Gun-Room, or in some other suitable Part of the Ship; he shall mess with some of the Officers, and be treated in all respects as a Gentleman.

Salaries to be allowed Apprentices of the Superior Class.

If the Apprentice shall not have served Two Years in the inferior Class.	If the Apprentice shall have served Two Years in that Class.	If the Apprentice shall have served Three Years in that Class.	Sum.
1st Year			60
2d Year	1st Year		70
3d Year	2d Year	1st Year	80
4th Year	3d Year	2d Year	90
5th Year	4th Year	3d Year	100
6th Year	5th Year	4th Year	110
7th Year	6th Year	5th Year	130

Upon their Return from Sea, until they can be appointed Officers in consequence of Vacancies having occurred, they shall be employed as Overseers of Ships building, in assisting the Master Shipwright in the different Yards, and their Assistants or Foremen; in the Mould Loft; under the Timber Master, or in any other Situation in which the Master Shipwright may have Occasion to employ them, with the Approbation of the Commissioner; during that Interval they shall have 15*l.* per Annum, and if such Vacancies should not happen for Three Years after their Return, they shall then have 18*l.* per Annum until they be provided for.

In order that the Services of young Men, whose Education has been obtained at a considerable Expence to Government, may not be lost on the Expiration of their Apprenticeship, they shall each of them, previously to their Entry in the Yard, be required to find two Sureties, to enter into Bond to the Amount of 500*l.* subjecting them to the Forfeiture of the said Sum if the Apprentices shall leave His Majesty's Service within Ten Years after they are out of their Time; and in the Event of an Apprentice being discharged for Misconduct, the Amount of the Bond, or so much of it as may indemnify Government for the Expence incurred in his Education, shall be forfeited.

The Object of this Institution is to improve the Qualifications of the Shipwrights in the Dock-Yards, and thereby to ensure a Succession of Artificers, from among whom Officers of the Description of Master

Measurers, Foremen, &c. will be selected, and from those the Appointments of the superior Officers in His Majesty's Dock-Yards, and Surveyors of the Navy, will ultimately be made.

The Day of Examination is fixed for the First Wednesday in November next (7th November 1810). A certain Number of Apprentices now in the Dock-Yards are to be excused from manual Labour, to prepare themselves for the Examination; and this public Notice of the Qualifications expected from those who intend to become Candidates, and of the Day on which such Candidates will be examined, is given, in order that the Number to be entered in the Superior Class of Apprentices (which in the First Year is to be limited to Twelve) may be selected from those best qualified, whether belonging to the Dock Yard or not.

Such Persons of the Description before mentioned, who may be desirous of becoming Candidates for Admission to the Superior Class of Apprentices to belong to His Majesty's Dock-Yard at Portsmouth, are therefore hereby informed, that they will be required to send Notice of their Intention to the Navy Board, or the Commissioner of His Majesty's Dock-Yard at Portsmouth, on the 24th of October 1810, and they must be prepared with every Document and Qualification mentioned in this Advertisement, and be at Portsmouth Dock-Yard at Eight o'Clock on the Morning of the Day of Examination, viz. 7th November 1810, and wait for further Directions from the Commissioner for their Proceedings.
