NOTICE TO MARINERS.

MULL OF GALLOWAY LIGHT-HOUSE.

THE Commissioners of the Northern Light-houses hereby give notice, that a Light-house has been erected upon the Mull of Galloway, in the county of Wigton; the light of which will be exhibited on the night of Friday the 26th day of March instant, and every night thereafter, from the going away of day-light in the evening till the return of day-light in the morning.

The following is a Specification of the Position of the Light-House, and the Appearance of the Light, by Mr. Stevenson, Engineer to the Commissioners:

The Mull of Galloway forms the southern extremity of the Mainland of Scotland, situate in lat. 54 deg. 38 min. N. and in long. 4 deg. 50 min. W. By compass, the Light-house bears from the largest of the Scare Rocks, W. $\frac{1}{2}$ N. distant 6 miles; from Barrowhead, W. by N. $\frac{3}{4}$ N. distant 18 miles; from the Point of Ayre Light-house, in the Isle of Man, N. N. W. distant 21 miles; from the Calf of Man Lights, N. N. E. distant 36 miles; from the South Rock, or Kilwarlin Light-house, in Ireland, E. N. E. $\frac{3}{4}$ E. distant 26 miles; and from Copeland Light-house, also in Ireland, S. E. by E. $\frac{1}{4}$ E. distant 21 miles. The light will be open or visible seaward from N. N. E. to N. W. $\frac{1}{2}$ W.; but the high lands of Dunman shut the light from the view of the mariner in coasting along the Portpatrick shores.

This light will be known to mariners as an intermittent light, suddenly appearing like a star of the first magnitude, and continuing in view two and a half minutes, when it is suddenly eclipsed for half a minute, thus producing its entire effect once in every three minutes.

The lantern is elevated 325 feet above the medium level of the sea, and in clear weather the light will be seen at the distance of seven or eight leagues, and at lesser distances, according to the state of the atmosphere.

By order of the Commissioners of the Northern Light-houses, C. Cunningham, Secretary.
Edinburgh, March 9, 1830.
