

VIII. The Lynn and Ely scheme.

IX. The Belfast and Ballymena scheme.

X. The Liverpool, Ormskirk, and Preston scheme.

The principal points into which enquiry will be made, in connection with the above schemes, are as follows :

- 1st. The ability and *bona fide* intention of the promoters to prosecute their application to Parliament next session for Bills to authorize the several undertakings.
- 2d. The advantages to be obtained, in a national point of view, in completing or extending important lines of railway communication.
- 3d. The amount of local advantage afforded to the towns and districts more immediately affected.
- 4th. The engineering circumstances of the line, so far as may be necessary to form a general judgment of the character of the undertaking.
- 5th. The estimates of cost of construction, and of traffic and working expences, so far as may be necessary to judge of the probability of the line being completed and efficiently worked, in the event of its being sanctioned by Parliament, and with a view to drawing a comparison between the merit of competing lines of railway.

The inquiry, in conformity with the recommendation of the fifth report of the Select Committee on Railways, will not embrace questions of private property or interest, which will be reserved altogether for the consideration of the Legislature.
