

Christians. Having burnt the Castle of *Bunich*, not being able to keep it, for that it was too far from our Frontiers, and having nail'd up three pieces of Cannon and three Mortars taken there, the ways being inaccessible for Carriages; Our General marched to a large Plain on the side of *Ulsina*, from whence he sent out Parties which burnt and plunder'd all the Towns and Villages, and cut down all the Corn and Forage for many miles round, so that this fertile Province, which the Turks have possess'd 140 years, is quite destroy'd. The 29<sup>th</sup> our General returned hither with a very considerable Booty, viz. 600 Horses, 1300 Oxen, several thousand Sheep, &c. not having lost one man in this Expedition. The Chevalier *Franco* has likewise made an incursion into the Province of *Etica*, of which he has given our General advice by three *Morlaques*, who arrived here yesterday.

From the Imperial Camp before *Newbusel*, Aug. 9. The 2d instant in the night the Besieged came into Ditch in two small Boats, but found no good a Guard there, that they were forced to retire with out attempting any thing; The next day we found the Ditch, and found there was still between 4 and 5 foot water; The night following we raised on the Edge of the Ditch a Battery of 26 pieces of Cannon; an Colonel *Burgdorff*, Governor of *Duffeldorff*, who arrived in the Camp the day before, was killed with a Musket shot. The 4th we began to Undermine on the side of the Attack of the Troops of *Brinswick*, but the Besieged did very much disturb our Workmen with their Cannon and small Shot; however we continued our Work, and carried it to the middle of the Line of Communication over against the Courtain, and we raised a new Battery of 4 Mortars. The 5th, the Enemy made so great a Fire from a Battery they had raised in the middle of the Courtain, that they put our Workmen into some disorder, wounding many of our men, who were not yet sufficiently covered, so that we were obliged to discontinue the Work till night. The 6th the Elector of *Bavaria* the Duke of *Lorraine* and Prince *Waldeck*, marched from the Camp with 90 Squadrons and 40 Battalions, making together an Army of 35000 men, with a resolution to go and fight the Enemy; leaving 8000 Horse and 12000 Foot, under the Command of the Count de *Caprara* Marechal de Camp General, and the Duke de *Croy* General of the Artillery, to continue the Siege. The next day we had an account, that the Turkish Army before *Gran* was not above 40000 men, most of them new raised, and that they had been repulsed in several Attacks they had made upon the Lower Town. Since that time we have repaired our Galleries, secured our Lodgements, prepared our Mines, and so advanced all our other Works, notwithstanding the vigorous Defence of the Besieged, that we hope in few days to be Masters of this place.

*Cologne*, August 25. The Magistrates of this City have been every day this week at *Mulheim*, to confer with the Commissioners of the Elector of *Trier* and the Duke of *Fuliers*, who still insist to have 8 or 9 persons, the chief of those that refused to submit to the Imperial Commission, put into their hands. The Children of the *Sieur Sacks*, one of the three persons nam'd in the Imperial Bn, have been at *Mulheim* with the said Commissioners, to beg their Fathers pardon, but we know not what answer they had. The Letters from *Ratisbon* tell us, that the Marquis de *Creey*, Plenipotentiary of *France*, had presented a Memorial to the Dyet, wherein he protested in the name of the Duke and Duchess of *Orleans*, against the possession which the Duke of *Newburg*, now Elector Palatine, hath taken of the Duchy of *Simmeren*, the County of *Spanheim*, and other Allodial Lands, as being devolved to the said Duchess by the Death of her Brother the Elector De-

ceased; And against all Transactions, Donations, Testaments, and other Instruments that may have passed between the late and present Electors concerning the same. From *Heidelberg* they write, that the Elector Palatin made his publick Entry into that City the 13th instant with great Magnificence.

*Paris*, Sept. 1. The 29th past the King was very much indispos'd with the Cholick, but is at present very well again. The Court will part from *Versailles* the 3d instant for *Chambar*. We have receiv'd on account, by an Express, that on the 12th of the last month the Elector of *Bavaria* and the Duke of *Lorraine* with the Imperial Army came in view of the Turks, Commanded by the Seraskier Bassa, who thereupon quitt'd the Siege of *Gran*; That the Armies having continued three days in sight of each other, the Duke of *Lorraine*, to draw the Enemy from their advantageous Posts, feign'd a Retreat, upon which the Turks follow'd the Christians and charg'd them, but were so bravely received that between 5 and 6000 of them were kill'd upon the place; the rest put to flight, and most of their Cannon and Baggage taken. The Princes de *Conti* and de *la Roche sur Ton* were in this Action and gave great proofs of their Courage. The Prince of *Commercy* was slain by the Duke of *Lorraine* to carry the news of this Victory to the Emperor, and arrived in the Camp before *Newbusel* at the time that the Besiegers, having given an Assault to the place, had oblig'd the Bassa to hang out a White Flag to Surrender at Discretion; but the Soldiers irritated with the long resistance of the Besieged, and animated with the hopes of the plunder, could not be retained, but entering the place, cut the greatest part of the Garrison in pieces, and pillaged the Town. We are expecting a particular relation of these great Actions.

*Whitehall*, Aug. 26. Yesterday the Installation of the Right Honourable *Lewis* Earl of *Essex* Knight, of the most Noble Order of the Garter, was performed in the Royal Chappel of *St. George* within the Castle of *Windsor* by his Grace the Duke of *Grafton* and the Right Honourable the Earl of *Rochebester* Lord High Treasurer of *England*; Knights of the said Order, Commissioned thereunto by the Sovereign, with all the Accustom'd Ceremonies.
