From Thursday May 6. to Monday May 10. 1686.

Milan, April 24.

OUR new Governour, the Count de Fuenalida, arrived here the 22d Instant from Pavia, accompanied with a great many Persons of Quality; The next day the Cardinal Visconti, Archbishop of Milan, made his Excellency a Visit, to compliment him upon his coming to this Government; And all the Great Officers and Ministers of State were likewise to make their Compliments to his Excellency.

Venice, April 27. The last Letters from the Morea give an account, That after the raising the Siege of Chelisa and the taking the Enemies Cannon and Baggage, Captain-General Morosini caused his Troops to Re-embark at Porto Vitulo, and sailed with the Fleet towards the Gulph of Calamata; That a Body of Turkish Horse was encamped near Niezi, a place which the Captain Bassa much delights in, who hearing of the approach of the Venetian Fleet, decamped, and retired in great disorder, leaving behind them several Mules and Wagons with a great deal of Provision, which they were in too much haste to take with them; And that the Maynores pursued the Enemy, and killed and took Prisoners a considerable number of them. We have Advice that the Bassa of Candia having lately taken a Review of the Ottoman Troops in that Kingdom, found they were not 12000, and these, for the most part, raw, undisciplined Men; And that they are in great fear the Venetians will make a Descent in that Island. By a Vessel come from Smirna, we are informed that Nine Men of War of Barbary were arrived there under the Command of Babassar, but that they were very ill Manned.

Genova, April 27. We have Advice that the Squadron of Men of War commanded by the Duke of Mircemar, sailed from Toulon the 9th Instant to the Westward. Two days ago parted from hence one of this States Gallies for Civita Vecchia, to join with the Pope's Gallies that are designed against the Turks. It's said that the Christians will have this Summer in the Levant 55 Gallies, 4 Galeasses, and 30 Men of War; A Force much superior to what the Turks will be able to bring to Sea. It is confirmed that the Algerines have broke with the Dutch.

Madrid, April 25. The 22d Instant their Catholick Majesties went from hence to the Buen-Retiro, intending to pass some short time there, and to go

afterwards to Aranjuez. Prince Eugene of Savoy, who covered before the King the 16th Instant, as Grandee of Spain of the first Rank, parted from hence the 18th for Hungary. They write from Cadix, that 12 Men of War of the Fleet that's to go and meet the Galeons were ready to put to Sea; that the rest were equipping with great diligence, and that they expected three Ships from Holland, where they have been lately built for the Service of this Crown, and six from Biscaye, to join the said Fleet.

Lemburgh, April 12. The King of Poland arrived here the 6th Instant, and the next day received by an Express from his Ambassadors at Moscow, a Project of the Conditions upon which the Czars are willing to enter into an Offensive and Defensive League against the Turks, the chief of which is; That this Crown shall quit all manner of Pretensions to the Cities of Kicovia and Smolensko; The King having thereupon consulted with the Senators that are here, it was resolved to comply therein; and that the said Project should be sent back to the Ambassadors, with directions to hasten the conclusion of this Alliance; By which the Moscovites will be obliged to employ a great Army against the Tatars, thereby to divert them from joining with the Turks against this Crown. The King has, since his being here, held several Councils of War. We do not hear that the day is yet fixed for the general Rendezvous, but it's believed 'twill be about the beginning of June. We have an account from Turkey, that the Resident of this Crown at the Porte; who has been a Prisoner there ever since the beginning of this War, has at last obtained his Liberty; and is returning home with new Overtures of Peace from the Grand Visier.

Vienna, April 28. The News of Lieutenant-General Scherffenberg's being entred into Transilvania with a Body of 10000 Men, is confirmed, but what his Orders are, is not yet known; It was reported upon the first Advice we had of the march of these Forces, that they were to join with those of Transilvania, but by the account we have since; that the Treaty between General Caraffa and the Deputies of Transilvania about settling the Contributions, is broken off; and that the Imperials have thereupon made several Incurfions into that Country, there seems to be more reason to believe that they are gone to treat Prince Abasi as an Enemy, than to join with him as a Friend. The last Letters from the Camp before Monatz told us, they continued their Work for the draining the Ditch, but that the wetness of the Season hindered them from making any great progress in it; And it's said here, that General Caprana has Orders to leave the
