

The London Gazette.

Published by Authority.

From Thursday July 8; to Monday July 12. 1686.

B Leghorna, June 21. A Bark arriv'd in this Port in 18 days from Tripoli, we have Advice that the two Brothers *Beys* *Hafsa* and *Achmet*, have at last taken the City of *Tunis*. The Success they had received from *Algiers*, put them into a condition to press the Siege very vigorously. On the other side the Besieged were reduced to great necessities, being shut up as well by Sea as Land; And there were besides great Divisions among the principal Commanders of the Militia, which was augmented by the secret Intelligence the *Beys* had within the place. Several Proposals of an Accommodation had been made, which the Day would not hear of; At last the Militia and the chief of the *Divan* being wearied with the length of the Siege, pressed him to yield, which he refusing, they secretly treated with the *Beys*, and opened the Gates to them, who thus became Masters of the Town without any loss. The *Beys* endeavoured to escape, but was taken Prisoner by the Troops of *Algiers*.

Tonca, June 25. We have had no Letters from the Fleet, since those which gave an Account that the Captain General, after having landed some Men near *Byzantz*, to alarm the Enemy on that side, had taken his Course towards *Adonia*; We expect every hour further Advice, which we believe will tell us, that that place or *Naxos* is besieged. There are Letters from *Smirna* of the 16th of the last month, which say, that the Grand Signior arriv'd at *Constantinople* the 28th of *April*; And that to pacifie the People, he had caused the *Caimacan* of that City to be put into the Seven Towers; and the late Grand Officer, who was a Prisoner at *Rhodes*, to be hanged; They write, from *Gallogonia*; that the *Proveditor* General *Cornaro* had drawn a Body of Men together to observe the *Turks*, who were encamp'd near *Narenta*; And from the *Albans*, that the parties of the *Garrison* of *Garon* do give the Enemy great disturbance; with their frequent incursions, from which for the most part they bring back very good Booty. The Count *de Melgny* is still here preparing for his march to *Rome*. The Privateers of *Cattaro* have lately taken a Vessel of *Dulcigno*, in which were 40 *English* who were all made prisoners. We have Advice from *Spain*, that the *Marquis* *Commanche*, by the Chevalier *Sanco* were returned from a successful campaign they had made into the Territory of *Leres*, where they had burnt several Villages, and got a great deal of Plunder. The Senate have made

choice of Signior *Gio Pittano* to go Ambassador from this Republick to the King of *Spain*. *Genoa*, June 25. The Senate having notice the last week, that two *English* Barks had been seen off the Coast, ordered that four Gallies should sail immediately in search of them. The News of the taking of *Adonia* by the *Beys* is confirm'd. We have Advice by a Vessel arriv'd from the *Levant*, that the Grand Signior was come with his whole Court to *Constantinople*.

Milan, June 25. The Count *de Fiesolida* our Governor, has appointed a general Review of the Forces in the service of this Dutchy, after which the Troops that are encamp'd near *Pavia* will separate, and return to their respective Quarters.

Madrid, June 20. The King has, upon the death of the Prince *de Chimay* Viceroy of *Navarre*, given that Government to the Duke *de Borbone* *v. de*. The *Marquis de la Ermita* is made Commissary General of this Kingdom, in the place of *Don Melchior Poncecarero*, who is advanced to the Viceroyship of *Mexico*. His Catholick Majesty has named *Don Mamel de Colonia* to reside in Quality of his Envoy Extraordinary at the *Hague*, and he is preparing for his Journey.

Lemburg, June 16. The Train of Artillery consisting in 40 pieces of Cannon great and small, and 14 Mortars, began its march this week towards the general Rendezvous which is appointed near *Trembowin*. The King of *Poland* will be there about the 20th of this month, and it is not doubted but the Campaign will be opened before the end of it. The *Popes* Nuncio has provided Magazines of several sorts of Ammunition, and has besides erected Hospitals to receive the sick and wounded. We are told that the *Turks* are much alarm'd at the news they have received of the League between this Crown and the *Czar* of *Moscovy*; and that their Chancellors the *Polish* countermanded the Forces that were marching to join with the *Turks*; but this will need a confirmation.

Szetz, June 19. The King of *Poland* arriv'd here the last week from *Warravia*; he has taken a Review of the Troops that are encamp'd near this place; and we are told he will march day or two more at the head of them towards *Trembowin*. The General of *Lithuania* has again written to his Majesty, to acquaint him that the Forces of that Dutchy are on their march to join with those of the Crown. The *Polish* Troops have possess'd themselves of *Burr* and *Miliditch*; which places the *Turks* as we have already told you had abandoned to reinforce the Garrison of *Czmitzoo*.

mince, with the Troops they drew from thence. An Officer who arrived here some days ago from Valachie, has told the King, that the Veyvode or Prince of that Country, is resolv'd to quit his Engagements with the Turks so soon as he can be assured of protection from hence.

Paris, July 13. The 10th Instant, the Troops of the King's Household began to encamp in the Plain of Acheres, where, it's said, they will continue till the end of the next month; The Dauphin is General, and the Duke de Noailles commands under him. Yesterday his Majesty went to Maintenon, to see the Aqueduct, and other Works that are making, to bring the River d'Eure to Versailles. The Sieur Foran, who commands a Squadron of the King's Ships, having met the 25th past near Cape Finister, two Spanish Galeons (which had on Board 1500 Men) and not knowing of the Accommodation, after an obstinate Fight took them, and carried them to Rochelle. The King, upon the News of it, sent Orders for the discharging the said Galeons, and commanded that particular care should be taken of above 150 Spanish Officers and Soldiers that were wounded in the Fight. His M. C. Majesty has likewise given Orders for the taking off the Seizures on the Spanish Estates within the French Conquests. The Letters we have from the Imperial Camp before Buda tell us, that the Resolution having been taken in a Council of War the 11th of the last Month to besiege Buda, and two Prisoners that were taken the next day by a Party which had been sent out to learn News of the Enemy, having confirmed the Advice, the Duke of Lorraine had received of the condition of that place, the Imperial Forces passed the Danube the 13th at Gyra, the Troops of Bavaria reinforced with a Detachment of four Imperial Regiments marching at the same time towards Pest. The 14th, by break of day, the Imperial Cavalry advanced towards Szegrad, the Detach, and the ill ways obliging the Foot to stay behind with the Cannon. The 15th, the Horse advanced an Hungarian mile beyond Kecvad, followed by the Foot and the Artillery. The 16th, they came within sight of Buda, but none of the Troops of the Garrison appeared. The 17th, the Cavalry made a Halt to rest themselves, and to give the Foot time to come up. The 18th, the Infantry arrived before Buda, and took their Posts within half a mile of the Town, and the same day they began to work on their Lines of Circumvallation. The Enemy, while the Imperialists were taking their Posts, fired upon them with their Cannon, but did them no harm; And a Detachment of Horse and Foot of the Garrison appeared without the Vienna Gate, who seeing some Imperial Horse advance, to charge them, presently retired. The 19th, the Duke of Lorraine caused the Army to approach nearer to the Town, and fixed the Head-quarter within a quarter of a mile of it. In the mean time the Elector of Bavaria had made himself Master of Pest, the Turks that were there retiring to Buda; And having put a good Garrison into the Place, his Electoral Highness marched towards the Ill of St. Andrew to pass the Danube there. The gottas Janissary who got out of the Town, were in the Camp, and reported that there were not in the Place above 700 Men of regulated Troops, besides the Inhabitants, which the Viceroy had obliged to bear Arms. And that some few days before the Place was invested, 2000 Men were sent from thence to reinforce the Garrisons of Agria, and as many to Alba Regalis, the Turks not believing the Imperialists would undertake the Siege of Buda. The same day (the 20th) the Cannon arrived in the Camp.

The 21, the Trenches were opened, and the Elector of Bavaria arrived before the place. The 22; they began to batter the Lower Town from two Batteries. The 23th, they had made a Breach of 24 Paces. And the Night following they lodged themselves there, with the loss of three or four men only, the Turks retiring into the Castle.

Paris, July 17. The King returned the 15th to Versailles.

London, July 10. His Majesty having by His Letters Patent dated 13 May 1686. Authorized Sir Henry St. George Kt. Clarenceux King of Arms to visit his Province, and to Register the Pedigrees and Arms of all the Nobility and Gentry therein according to ancient usage.
