(Translation.)

Light on the Cies Islands.

THE new lighthouse erected on the summit of Mount Faro, that being the most prominent point on the extreme south of the centre island, will be lit every night from sunset to sunrise, commencing with that of the 19th of November.

The lighthouse is situated in—

Latitude 42° 12' 23" N.,

Longitude 02° 41' 50" W. of the meridian of the Observatory of Saint Ferdinand.

Its apparatus is of the second order, catadioptrical, with eclipses from minute to minute. The light is raised 650 Burgos feet above the level of the sea; it produces a tangent of 31 miles; but it can be seen at more or less distance according to the state of the atmosphere and the height of the observer.
