

NOTICE.—Application has been made to Her Majesty in Council, by the members of the Society of Procurators in the city and county of Perth, praying for the grant of a Royal Charter of Incorporation, incorporating them, and such persons as may hereafter be duly admitted members, into one body corporate and politic, by the name, style, and title of "The Society of Procurators and Solicitors in the city and county of Perth," with perpetual succession, and power to acquire and hold property, and to make rules and bye-laws, and with such other powers, privileges, and authorities as are usually given to other bodies corporate and politic of the like nature, in such manner as to Her Majesty in her royal wisdom shall seem proper; which application has been referred by Her Majesty in Council to the Board of Trade.

Gibson-Craig, Dalziel, and Brodie, W.S.,
5, Thistle-street, Edinburgh, Agents.

Patent Law Amendment Act, 1852.

Office of the Commissioners of Patents for
Inventions.

NOTICE is hereby given, that—

1690. William Leuchars, of No. 38. Piccadilly, in the county of Middlesex, has given notice at the Office of the Commissioners of his intention to proceed with his application for letters patent for the invention of "improvements in locks for travelling bags."

As set forth in his petition, recorded in the said office on the 18th day of July, 1856.

1708. And William Astbury Jump, of Moulton, near Northwich, in the county of Chester, Salt Manufacturer, has given the like notice in respect of the invention of "improvements in apparatus for supplying with fuel the furnaces of steam boilers and other furnaces, and in the method of cleaning the fire bars thereof."

As set forth in his petition, recorded in the said office on the 19th day of July, 1856.

1719. And James Clark, of Newton Heath, Manchester, India Rubber Manufacturer, has given the like notice in respect of the invention of "improvements in the manufacture of water-proof fabrics."

1722. And Frederick Simpson, of Redhill, Surrey, has given the like notice in respect of the invention of "an improved mode of stopping bottles."

1723. And Maurice Vergnes, of the city and State of New York, United States of America, has given the like notice in respect of the invention of "improvements in electro galvanic machines for producing motion by galvanic electricity."

As set forth in their respective petitions, all recorded in the said office on the 21st day of July, 1856.

1734. And Henry Hindle, of Cavendish-street, Ashton-under-Lyne, in the county of Lancaster, has given the like notice in respect of the invention of "improvements in valves and apparatus for governing steam engines and for increasing the safety of steam boilers."

1737. And James Clark, of Newton Heath, Manchester, India Rubber Manufacturer, has given the like notice in respect of the invention of "improvements in the manufacture of beds, mattresses, cushions, and seats."

As set forth in their respective petitions, both recorded in the said office on the 22nd day of July, 1856,

1741. And Ferdinand Potts, Tube Manufacturer, of Birmingham, in the county of Warwick, has given the like notice in respect of the invention of "certain improvements in tags for stay and other laces, as also in the machinery for forming and finishing the same."

1746. And Giles Mabie, of Rockford City, Winnebago County, State of Illinois, in the United States of America, but now residing at Byron's Hotel, 2, Rue Favart, Paris, in the Empire of France, has given the like notice in respect of the invention of "improved machinery for mowing and reaping."—Partly a communication from the late John H. Manny.

1749. And John Derbyshire, of Longton Potteries, in the county of Stafford, has given the like notice in respect of the invention of "improvements in cocks, taps, and valves."

As set forth in their respective petitions, all recorded in the said office on the 23rd day of July, 1856.

1774. And William Lanphier Anderson, of Norwood, in the county of Surrey, Gentleman, has given the like notice in respect of the invention of "improvements in propellers."

1776. And Julien Denis, of Queenhithe, in the city of London, has given the like notice in respect of the invention of "improvements in cutting or perforating steel and other metals."—A communication.

As set forth in their respective petitions, both recorded in the said office on the 25th day of July, 1856.

1780. And James Dickinson, of Liverpool, in the county of Lancaster, Ship and Anchor Smith, has given the like notice in respect of the invention of "improvements in anchors and in the manufacture of the same."

1783. And Henry Remington, of Camberwell, in the county of Surry, Gentleman, has given the like notice in respect of the invention of "an improved gas heating and cooking apparatus."

As set forth in their respective petitions, both recorded in the said office, on the 26th day of July, 1856.

1797. And Alexander Williams Anderson, of the Island of Trinidad, Inspector of Schools and Advocate-at-Law, has given the like notice in respect of the invention of "improvements in refining sugar."

As set forth in his petition, recorded in the said office on the 29th day of July, 1856.

1800. And Henri Evette Manufacturer, of Lizieux, town in the French Empire, has given the like notice in respect of the invention of "improvements in looms for weaving."

1801. And Julien Denis, of Queenhithe, in the city of London, has given the like notice in respect of the invention of "an improved gelatinous and economical soap."—A communication.

As set forth in their respective petitions, both recorded in the said office on the 30th day of July, 1856.

1825. And Robert Reeves, of Bratton, Westbury, Wilts, Agricultural Implement Maker, has given the like notice in respect of the invention of "improvements in machinery for sowing or depositing seeds and manure."

As set forth in his petition, recorded in the said office on the 1st day of August, 1856.

1835. And Charles Théodule Launay and Jules Chopin, Gas Fitters, of Paris, in the French Empire, have given the like notice in respect of the invention of "improvements in increasing the illuminating power of gas."
