

Benefit of Carpenters and Joiners' Friendly Society, held at the Running Horse Tavern, Duke-street, Grosvenor-square, in the county of Middlesex, was transmitted to the Registrar of Friendly Societies in England, on the 18th day of June, 1863.

John Tidd Pratt, Registrar of Friendly Societies in England.

London, 18th day of June, 1863.

Registrar of Friendly Societies in England.

NOTICE is hereby given, that an agreement authorized by 18 and 19 Vict., c. 63, s. 13, for the dissolution of a Friendly Society, called the Chain of Friendship Society, held at the Rose Tavern, Snowfields, Southwark, in the county of Surrey, was transmitted to the Registrar of Friendly Societies in England, on the 13th day of June, 1863.

John Tidd Pratt, Registrar of Friendly Societies in England.

London, 16th day of June, 1863.

Patent Law Amendment Act, 1852.

Office of the Commissioners of Patents for Inventions.

NOTICE is hereby given, that—

358. John Goucher, of Worksop, in the county of Nottingham, Ironfounder, Engineer, and Machinist, has given notice at the Office of the Commissioners of his intention to proceed with his application for letters patent for the invention of "improvements in regulating the admission of air into the furnaces of steam boilers."

As set forth in his petition, recorded in the said office on the 9th day of February, 1863.

362. And Thomas Hill, of Hampton House, Great Warley, in the county of Essex, Brewer, has given the like notice in respect of the invention of "improvements in the arrangements employed for the protection of markers at rifle butts."

365. And Matthew Cartwright, of Hoxton, in the county of Middlesex, Dentist, has given the like notice in respect of the invention of "improvements in combining plastic substances with metals."

As set forth in their respective petitions, both recorded in the said office on the 10th day of February, 1863.

369. And Hugh Donald, of the firm of Craig and Donald, of Johnstone, in the county of Renfrew, North Britain, Engineer, has given the like notice in respect of the invention of "improvements in machinery for shearing, punching, and riveting metals."

As set forth in his petition, recorded in the said Office, on the 11th day of February, 1863.

381. And Alexander Morton, of Arbroath, in the county of Forfar, Engineer, has given the like notice in respect of the invention of "improvements in lawn mowing machines."

As set forth in his petition, recorded in the said office on the 12th day of February, 1863.

385. And George Henry Birkbeck, of the firm of Tongue and Birkbeck, of No. 34, Southampton-buildings, Chancery-lane, in the county of Middlesex, Patent Agents and Engineers, has given the like notice in respect of the invention of "improvements in processes or means employed for separating or extracting silver or other metals from lead."—A communication to him

from abroad by M. Clement Roswag, Engineer, of Paris, in the Empire of France.

386. And Stephen MountCashel Innes, of Hill House-hill, in the parish of Millbrook, in the county of Hampshire, has given the like notice in respect of the invention of "improvements in the construction of pianofortes."

388. And Jabez Jones, of Liverpool, in the county of Lancaster, Lead Merchant, has given the like notice in respect of the invention of "improvements in the manufacture of lead, tin, and other metals, or amalgamation of metals, of a like fusible nature, into sheets of any required thickness and length, and also coating one or both sides of pipes and sheets of lead and other metal, or amalgamation of metals, with tin or other substances, and in the apparatus connected therewith."

393. And George Wrigley, of the firm of Messieurs Cryer and Lees, of Dukinfield, in the county of Chester, Machine Makers, and Samuel Morris, of the same place, Mechanic, have given the like notice in respect of the invention of "improvements in machines for spinning and doubling."

396. And Samuel Whitaker, of Craddock-street, Haverstock-hill, in the county of Middlesex, Electrician, has given the like notice in respect of the invention of "improvements in indicating the positions or conditions of railway signals and points, and in the apparatus employed therein."

As set forth in their respective petitions, all recorded in the said office on the 13th day of February, 1863.

401. And John Sacheverell Gisborne, of Birkenhead, in the county of Chester, Electrical Engineer, and William Simpson, of Liverpool, in the county of Lancaster, Gentleman, have given the like notice in respect of the invention of "improvements in means for rendering ships' and other compasses insensible to local attraction."

402. And Henri Dembinski, of Rue de l'Oratoire du Roule, No. 13, Paris, in the Empire of France, General, has given the like notice in respect of the invention of "a new motive apparatus and processes proper for giving to it a continuous motion and unlimited strength."

410. And James Higgins and Henry Higgins, of Salford, in the county of Lancaster, Machine Makers, have given the like notice in respect of the invention of "improvements in carding engines, and in apparatus connected therewith."

413. And John Henry Johnson, of 47, Lincoln's-inn-fields, in the county of Middlesex, and of 166, Buchanan-street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "improvements in wrought iron casements, and in the means for fastening the same, which improvements are also partly applicable to the framework of glass doors, conservatories, and similar structures."—A communication to him from abroad by Louis Pierre, Vincent Etienne Eugene Jacquemin, Jean Charles Douriez, and Gustav Joseph Legros, of Paris, in the Empire of France.

As set forth in their respective petitions, all recorded in the said office on the 14th day of February, 1863.

418. And John Burchley Watts, of Birmingham, in the county of Warwick, Sword and Bayonet Manufacturer, has given the like notice in respect of the invention of "improvements in the manufacture of matchets and swords."
