

Trowbridge, and that one Waywarden should be elected annually for each of the said four highway parishes.

And that the confirmation of the Provisional Order, then made, by a Final Order, should be taken into consideration at this present Court of General Quarter Sessions of the Peace, which was thereby appointed for that purpose.

And whereas notice as directed by the said Acts was duly given by the Clerk of the Peace, that the confirmation of the said Provisional Order by a Final Order would be taken into consideration by the Justices at this present Court of General Quarter Sessions.

Now, therefore, after duly considering the said Provisional Order, this Court doth hereby confirm the same order, and doth finally order that the said Highway District of Trowbridge be altered by the subtraction therefrom of so much of the said tithings of Bradford Borough, Leigh and Woolley, Trowle, and Winsley respectively as was comprised therein. And that each of the said tithings of Atworth, Holt, Limpley Stoke, and South Wraxall be constituted a separate highway parish, comprised in and forming part of the said Highway District of Trowbridge, and that one Waywarden be elected annually for each of the said four highway parishes.

By order of the Court,
Wm. C. Merriman, Clerk of the Peace.

Patent Law Amendment Act, 1852.

Office of the Commissioners of Patents for Inventions.

NOTICE is hereby given that—

1648. William Clay, of Liverpool, in the county of Lancaster, Iron Manufacturer, has given notice at the office of the Commissioners of his intention to proceed with his application for letters patent for the invention of "improvements in ventilating railway carriages, and in the apparatus to be employed therefor."

As set forth in his petition, recorded in the said office on the 19th day of June, 1865.

1652. And William Edward Gedge, of the firm of John Gedge and Son, of No. 11, Wellington-street, Strand, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "an improved elastic mattress or spring bed."—A communication to him from abroad by Henry Marie Hingand de Saint Maur, of 15, Passage des Petites Écuries, Paris, France, Gentleman.

1654. And Isham Baggs, of Chancery-lane, in the county of Middlesex, Electrical Engineer, has given the like notice in respect of the invention of "improvements in electric telegraph instruments and relays."

1661. And Duncan McGlashan, junior, of Glasgow, in the county of Lanark, North Britain, has given the like notice in respect of the invention of "improvements in sewing machines, and in the machinery or apparatus connected therewith."

As set forth in their respective petitions, all recorded in the said office on the 20th day of June, 1865.

1664. And John Busfield, Spinner, and Samuel Bairstow Walmsley, Machine Maker, both of Bradford, in the county of York, have given the like notice in respect of the invention of "improvements in machinery for combing wool and other fibrous materials."

1666. And William Edward Gedge, of the firm of John Gedge and Son, of No. 11, Wellington-street, Strand, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "an improved fire escape, applicable also to raising loads from mines, and other purposes."—A communication to him from abroad by Xavier Philippart, of Namur, Belgium.

1669. And Charles Talbot Porter, of the city of New York, in the United States of America, but now residing at Manchester, in the county of Lancaster, Engineer, has given the like notice in respect of the invention of "improvements in surface condensers for steam engines, and in feeding boilers therefrom."

As set forth in their respective petitions, all recorded in the said office on the 21st day of June, 1865.

1674. And Edward Kenworthy Dutton, of Sale, in the county of Chester, Merchant, has given the like notice in respect of the invention of "certain improvements in apparatus for measuring and indicating the flow of liquids."

As set forth in his petition, recorded in the said office on the 22nd day of June, 1865.

1682. And Michael Dietrich Rosenthal and Solomon Gradenwitz, of No. 5, Church-row, Houndsditch, in the city of London, have given the like notice in respect of the invention of "new or improved compositions in imitation of ivory and woods to be employed in the manufacture of umbrella-tips, umbrella and walking-stick handles, and other useful and ornamental purposes."

1685. And William Lusty, of Birmingham, in the county of Warwick, Machinist, has given the like notice in respect of the invention of "improvements in machinery for the manufacture of needles."

As set forth in their respective petitions, both recorded in the said office on the 23rd day of June, 1865.

1691. And Richard Archibald Brooman, of 166, Fleet-street, in the city of London, Patent Agent, has given the like notice in respect of the invention of "an improved portable table or seat."—A communication to him from abroad by Charles Joseph Everickx, of Paris, France.

As set forth in his petition, recorded in the said office on the 24th day of June, 1865.

1702. And Richard Archibald Brooman, of 166, Fleet-street, in the city of London, Patent Agent, has given the like notice in respect of the invention of "improvements in machinery for printing in colors."—A communication to him from abroad by Martin Moeglen, of Guebwiller, France.

1705. And John Whittle, of No. 11, Frampton-terrace, Boston, in the county of Lincoln, has given the like notice in respect of the invention of "improvements in forming the permanent ways of railways."

1708. And William Edward Newton, of the Office for Patents, 66, Chancery-lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "an improvement in piano fortes."—A communication to him from abroad by Herman Lindeman and Henry Lindeman, both of the city of New York, in the United States of America.

As set forth in their respective petitions, all recorded in the said office on the 26th day of June, 1865.
