

Patent Law Amendment Act, 1852.  
Office of the Commissioners of Patents for  
Inventions.

**N**OTICE is hereby given, that—

2473. Robert Stone, of Liverpool, in the county of Lancaster, has given notice at the Office of the Commissioners, of his intention to proceed with his application for letters patent for the invention of "an improved concrete for surfacing or laying roadways, footways, and other similar large surfaces."

2475. And Ormrod Ingham, of Lidgate, near Todmorden, in the county of York, Picker Maker, has given the like notice in respect of the invention of "improvements in pickers for looms for weaving."

As set forth in their respective petitions, both recorded in the said office on the 20th day of August, 1872.

2491. And Charles Felix Sebillé, of Paris, Department of the Seine, in the Republic of France, Manufacturer, has given the like notice in respect of the invention of "improvements in the composition known as Schisto-asphaltic and bituminous-beton, and novel applications thereof, together with improved machinery or apparatus in connection therewith."

2494. And Thomas Aldridge Weston, of Ridgewood, New Jersey, in the United States of America, has given the like notice in respect of the invention of "improvements in friction clutches, and the arrangement and mode of operating frictional surfaces for transmitting, regulating, and arresting motion in machinery."

2495. And John Winskill, of the firm of John Winskill and Sons, of Settle, in the county of York, Builder, has given the like notice in respect of the invention of "a new or improved construction of lime kiln."

As set forth in their respective petitions, all recorded in the said office on the 22nd day of August, 1872.

2509. And Thomas Henderson, of Liverpool, in the county of Lancaster, Mechanical Engineer, has given the like notice in respect of the invention of "improved apparatus for supplying fuel to furnaces, and for removing clinkers from the same."

2511. And William Carwood, of Queen-street, Finsbury, in the county of Middlesex, Engineer, has given the like notice in respect of the invention of "improvements in presses for letter press printing."

As set forth in their respective petitions, both recorded in the said office on the 23rd day of August, 1872.

2528. And John Frederick Parker, of Birmingham, in the county of Warwick, Chemist, and Arthur Wade, of Birmingham aforesaid, Stock Broker, have given the like notice in respect of the invention of "improvements in the manufacture from coal and petroleum of hydro carbon gas, or gas for illuminating and heating."

As set forth in their petition, recorded in the said office on the 26th day of August, 1872.

2543. And Arthur Bryce, of Alloa, in the county of Clackmannan, North Britain, has given the like notice in respect of the invention of "an improved method of branding casks, barrels, and other similar articles, and in a stove and apparatus therefor."

As set forth in his petition, recorded in the said office on the 27th day of August, 1872.

2554. And John Macintosh, of Bayswater, and William Boggett, of Chelsea, both in the county of Middlesex, have given the like notice in respect of the invention of "improvements in the manufacture of life preservers, air beds, cushions, and coverlets, and in the materials employed therefor."

2559. And Joseph Theodore Dann, of 43, Cowley-road, North Brixton, in the county of Surrey, Civil Engineer, has given the like notice in respect of the invention of "improvements in the construction of machines for washing, concentrating, and amalgamating ores of precious metals."—A communication to him from abroad by William Rickard, of Monitor, county of Alpine, California, in the United States of America, Assayer.

2560. And William Green, of Birmingham, in the county of Warwick, Machinist, has given the like notice in respect of the invention of "an improved apparatus for effecting the saving of fuel used for domestic purposes."

2563. And William Robert Lake, of the firm of Haseltine, Lake, & Co., Patent Agents, Southampton-buildings, London, has given the like notice in respect of the invention of "improvements in type setting machines."—A communication to him from abroad by Stiles Dennison Sperry, of Hartford, Connecticut, United States of America, Gentleman.

As set forth in their respective petitions, all recorded in the said office on the 28th day of August, 1872.

2587. And William Robert Lake, of the firm of Haseltine, Lake, & Co., Patent Agents, Southampton-buildings, London, has given the like notice in respect of the invention of "improvements in electrical apparatus for lighting gas and other burners."—A communication to him from abroad by Jacob Porter Tirrell, of Charlestown, and John Ware Flether and William Clark Cutler, of Chelsea, all in Massachusetts, United States of America.

As set forth in his petition, recorded in the said office on the 30th day of August, 1872.

2600. And Edward Ward Cooper, of Birmingham, in the county of Warwick, Machinist, and George Lowe, of Birmingham aforesaid, Engraver and Enameller, have given the like notice in respect of the invention of "improvements in sewing machines."

As set forth in their petition, recorded in the said office on the 2nd day of September, 1872.

2616. And Robert Francis Fairlie, of Victoria-street, in the city of Westminster, Engineer, and Loftus Perkins, of Seaford-street, Gray's-inn-road, in the county of Middlesex, Engineer, have given the like notice in respect of the invention of "improvements in locomotive engines."

As set forth in their petition, recorded in the said office on the 3rd day of September, 1872.

2720. And Maximilien Evrard, of Sorbiers, near St. Etienne, Loire (France), Civil Engineer, has given the like notice in respect of the invention of "improvements in washing coal and minerals, and in apparatus employed therein."

As set forth in his petition, recorded in the said office on the 13th day of September, 1872.

2747. And Newton John Suckling, of Market Hill, Maldon, in the county of Essex, has given the like notice in respect of the invention of "improvements in boilers, and in means for producing constant circulation of water therein."

As set forth in his petition, recorded in the said office on the 16th day of September, 1872.
