(No. 181.)—MEDITERRANEAN.—ITALY—WEST COAST.—GULF OF SPEZIA.

*Tino Islet Light*—*Alteration in Character.*

WITH reference to Notice to Mariners, No. 60 (2), of 16th April, 1885, on intended alteration in the character of the light on Tino Islet, western side of entrance to the Gulf of Spezia:—

The Italian Government has given further notice, that on 1st October, 1885, the electric light would be permanently exhibited:—

The light is a triple flashing half-minute light of the first order, giving three flashes in succession, the duration of each flash being one and a half seconds, the flashes being separated from each other by an eclipse of two seconds, and each group of three flashes being followed by an eclipse of twenty-one and a half seconds. It is elevated 384 feet above the sea, and should be seen in clear weather from a distance of about 27 miles.

The light is visible in all directions seaward, and also shows a sector of light, through an arc of 50°, over Palmaria Island and Tino Passage.

NOTE.—Within the distance of about 15 miles, a faint fixed light is visible between the flashes.
