Milan, Sept. 20.

OUR Governor the Count de Faenza parted from hence the 16th instant, to confer with the Duke of Savoy at Turin; from whence he will go to the Camp at Moncalier. The Gallies of Naples and Sicily arrived the 14th instant at Genoua, with 1500 Land Soldiers, and a good Sum of Money for the Service of this State.

Venice, Sept. 23. We have advice by two Marsilianes arrived here since my last from Corfu, that the Captain General Cornaro was not gone towards Scio, as was reported, but that he had resolv'd to attack Vallona in Albania, and was come with the whole Fleet very near to that place, having sent to the Proveditore General of Dalmatia to desire he would give him all the Assistance he could in this design. This News is confirmed by a Felucca that's just now arrived from Napoli di Malvasia, with this farther account, That the Captain-General failed from thence on the 18th of the last Month, with 19 Venetian Men of War, three Fincelips, three Palanders, six Gallies, 37 Gallies, (including the Popes and Malteses) 24 Gallies, and the Transport Ships, which had on Board about 12000 Foot and 800 Horse; and that besides these, he had left 1200 Horse with a good Body of Foot to guard the Islands of Corinthe, and 12 Men of War to cruise on the Coasts of the Morea.

Lemberg in Poland, Sept. 14. The Letters from our Army of the 10th instant tell us, that they were advanced to Czarkowic; from whence they intended to continue their march towards Jassi, the Capital City of Moldavia. The Court of Poland is at present at Jawarow.

Warsaw, September 18. The King, with the whole Court, parted on the 2d instant from Villa-Nova, on his Journey towards Russia. The Forces of this Crown have pulled the Niester, having left a Body of Horse and Foot at Tremowla to observe the Garison of Camintec. Their design is to march into Moldavia, and to possess themselves of Jassi, and the other chief places of that Province, and afterwards to advance towards Budzian to give the Tartars a diversion.

Vienna, Sept. 28. The last Advices from Servia give an account, That Prince Louis of Baden decamped on the 18th instant from Caransebes, having sent a Detachment before to secure the Pass, called the Iron Gate, which he understood the Enemy had a design to possess themselves of; and that he intended so to order his marches as to be by the 25th of this Month at Hermanstadt in Transylvania; from whence we are told, That Count Teckley arrived the 18th with the main Body of his Forces at Alba Julia, where he had appointed a Meeting of the States of that Country, with severe Threatnings to such as did not comply with his Summons; and that he had received a Reinforcement of several Thousand Men from Moldavia and Valachia. But in all probability the march of the Pelanders, and the Incursions which the Rasciens with the Imperial Garison at Orsova have orders to make into Valachia, will give those Provinces such a diversion, as will quickly oblige them to recall the Succors they have sent to Teckley in order to employ them for their own Defence. The Count de Starsenberg is arrived at Belgrade with the Garison of Nissa, consisting of about 2000 Men. Since the

Surrender of this place several Parties of Turks and Tartars have shewed themselves near the Sava; but we hear nothing of the Villiers advancing farther towards Belgrade; on the contrary, there is Report, that he is gone back with the greatest part of his Army towards Sopron, to put them into Winter Quarters, the Asiatic Forces having shewed an unwillingness to remain any longer in the Field. Upon advice that the Bassa of Bosnia was marching to invade Croatia, the Vice Ban of that Country had drawn a good Body of Men towards the Frontiers, and the Ban or Viceroy designed to follow him with all that were able to bear Arms. The Marquis Doria is sent back to Transylvania with Instructions about the Exchange of General Heister, with the Princess Ragotzki Count Teckley's Wife, who has given him a Letter to her Husband, exhorting him to quit his Engagements with the Turks and to submit to the Emperor.

Basle, Sept. 28. The 13 Swiss Cantons have appointed a general meeting of their Deputies, which will be held at Baden in few days. The chief design whereof seems to be to secure their Frontiers, and to protect the Forest Towns, and the Bishoprick of Basle, where the French pretend to take Winter Quarters. In the mean time the Cantons continue to guard the Pass of Augst notwithstanding the late Declaration of the French Ambassador, that his Matter would no longer contribute towards the payment of those Troops. The Imperial Army lies now near Villengen, the Elector of Bavaria having before his decamping from Loor sent a great Detachment towards Rhinsfelden. The Dauphin is at the same time encamped near Neuenburg, from whence he has sent 8 Battalions and 11 Squadrons to reinforce the Marquis de Boufflers on the Moselle.

Ratisbonne, September 29. Yesterday the matter of the Guaranty of the Treaty between the House of Austria, and the Duke of Savoy, was concluded in the several Colleges of the Diet. The Minister of Sweden has made instances to the States assembled here, that they will not conclude a Peace with France without the Restitution of the Duchy of Deux Pontz to the King his Master.

Frankfort, Octob. 4. The Swedish Succors are most of them quartered in the Villages about Heidelberg, having their Head quarter at Lauenburg on the Neckar. The Confederate Army was according to our last Advice encamped near Villengen, and the French about Nuernberg, where the latter have laid a Bridge over the Rhine, tho' their design seems to be to draw yet nearer to Suiffeland.

Hamburg, Octob. 6. The King of Denmark having taken a review of 4 Regiments of Horse and Dragoons near Coldingen, went from thence yesterday in his return to Copenhagen. We are told, that a Conference is going to be held by the Emperors appointment, for the adjusting the differences about the Succession of Saxe Lawenburg.

Cologne, Octob. 6. The Advices from the Upper Rhine say, that the 8000 Men, which the Elector of Bavaria had detached from the Imperial Army, were arrived near Rhinsfelden, to cover that and the other Forest

Forest Towns against the Insults of the French, who, its said, have demanded Winter Quarters for 6 or 7000 Men, within the Bishoprick of *Basse*. The Electors of *Bavaria* and *Saxony*, were still encamped on the 25th of the last Month near *Vilgen*; And the Dauphin in the Plains of *Neurbourg*, near which place the French had layn a Bridge over the *Rhine*. The Confederate Forces of *Hesse*, *Lunenbourg*, *Munster*, and *Neubourg*, continue to have their Head Quarter near *Schmitzen*: It's thought their design is to observe the Marquis de *Boufflers*, who lies near *Bastogne*, while the Forces of *Liege* and *Brandenburg* take their Winter Quarters in the Country of *Luxemburg*, and possess themselves of such Posts as may secure them.

Amsterdam, Octob. 9. This day we received Advice of the arrival of 10 of our *East India* Ships, six of which with a *Galliot* are come into the *Texel*, and four into *Goeree*, and four more are not far from our Coasts. There are Letters from *Smirna* of the 13th of *August*, which say, That an Express was arrived there from *Adriano-ple* with the News, that *Sultran Solyman* lay very ill, with little hopes of his Recovery.

Brussels, Octob. 10. The Armies are now preparing for their Winter Quarters. We are told, that the Duke of *Luxemburg* decamped yesterday in the Afternoon from *Lessines*, and moved towards *Potte* and *Escanaffe*. On the 3d instant Colonel *Gatz* joyned the Forces of *Liege* at *Furse*, with four Battalions of *Brandenburgers*; and on the 6th, the Baron de *Heyden* reinforced them with a Detachment from the *Brandenburg Army in Flanders*, which consisted of four Battalions, and two Regiments of Horse and Dragoons; they making together a Body of about 14 or 15000 Men. There are Letters from *Germany* which say, That the Dauphin parted from *Neurenburg* the first of this Month on his return to *Paris*, leaving his Army under the Command of the *Marschal de Lorzes*. We hear from the French Conquests that there is a discourse that the *Marschal d'Humieres* will resign that Government to the Duke of *Luxemburg*, and that instead thereof he is to have that of *Paris*. The French have already begun their Recruits and new Levies for the next year.

Plymouth, October 5. On the first instant a Dutch Privateer brought in here two small French Prizes; and the next day another Dutch Caper brought in two Prizes more, one from *Ireland* laden with Beef and Butter, and the other bound from *Bourdeaux* to *Ireland* with Wine and Brandy. On the second likewise came in here six Dutch Men of War, who sailed again this day with the *Crown* Frigate to the Eastward.

Poussinouth, October 7. On the 4th instant arrived at *St. Helens*, Sir *Clouesly Shouell* with their Majesty's Ships under his Command from the Coast of *Ireland*. He went into the Bay of *Galloway*, but the French Ships, with all their Troops, and *Tirconnel*, *Lafsin*, *Boiseleau*, &c. were gone from thence three or four days before. Sir *Clouesly* took afterwards two Ships bound from *France* to *Ireland*.

Brussels, Octob. 7. On the 4th instant came from the Downs the *Streights* Fleet with the Men of War their Convoy; and on the 5th and 6th

arrived here the two *East India* Men, the *Cesar* and *James*, with other Merchant Ships under the Convoy of several Men of War.
