Published by Authority.

From **Sunday** December 15. to **Thursday** December 18. 1690.

Venice, November 24.

THE new Captain-General *Ma-*
cenigo has taken his Leave of the
Senate, in order to his departure
for the *Levant*, and has received Assuranc-
es from them, that a Reinforcement of 10
or 12000 Men shall be sent to him early in
the Spring, with several new Ships and
Galleys that are now building in the *Arse-*
nal here. The Officers that are to be
employed in the new Levies, have many
of them already received their Commis-
sions, and the rest will likewise have theirs
very speedily. We have an account from
Dalmatia, that General *Molino* was come
to *Cassel-Novo*, to view the Fortifications
of that place, and to take an account of
the State of the Garison, and that from
thence he would go to *Spalatro*, intending
to draw a Body of his Troops together,
in order to some considerable Enterprize,
so soon as the Weather is proper for it.

Vienna, November 30. The Elector of
Bavaria is daily expected here, after whose
arrival a Great Council of War will be
held, to concert the Measures for the ap-
proaching Campaigne, as well in *Germany*
as in *Hungary*. On the 18th instant pass-
ed by this place 1800 Horse and Dra-
goons, detached out of several Regiments
on their march towards *Hungary*, where
our Army will take the Field the next
year much earlier than they have yet done
since this War. Several Officers that e-
scaped from *Belgrade*, have been Examined
before the Council of War concerning
the loss of that Place; and General *Aspre-*
mont, late Governor of it, will in few days
be brought to his Tryal before them.
Prince *Louis* was, by our last advice, ad-
vanced within 6 hours march of the Ene-
my, who lay encamped near *St. Job*. The
Imperialists, upon the taking of *Lippa* by

the Turks, have raised the Blockade of
Great Waradin.

Francfort, December 6. The States of
Suabia and *Franconia* are still assembled, to
consult about the new Levies, and the
other Preparations they intend to make
against the next Campaigne. The Bishop
of *Wurtsbourg*, besides Recruits for the Re-
giments he has already on foot, has resolv-
ed to raise this Winter a Regiment of
Cuirassiers, and another of Foot. We
have an account from *Heydelberg*, that they
work very hard on the Fortifications of
that City, and that they have a Gari-
son there of 4000 Men; The *Hussars*,
that are Quartered thereabouts, have
of late defeated several small French Par-
ties, which were sent out from *Philipsbourg*
and other Places to make Incursions into
the Palatinate.

Mentz, December 5. Our Governor the
Baron *de Thunghen* employs his utmost care
for the putting this place into such a po-
sture, as not to fear any attempt of the
Enemy, who seem'd lately, by their draw-
ing together about *Wormes*, to have some
design this way, but our Parties bring us
an account, that they are retired again.
Our Elector being perfectly recovered of
his late Indisposition, is gone to reside at
Aschaffenburg; We are told, that the Prince
of *Neubourg*, Great Master of the *Teuto-*
nick Order, is shortly expected here, and
that he is to have the Chief Command of
the Imperial Forces that are lodged on the
Rhine, in the place of General *Souches*, who is
going to serve in *Hungary* in the Quality of
Lieutenant-General.

Liege, December 10. The Governor of
Dinant, which is in the hands of the
French, has sent out an Order to all the
Country People of that Neighbourhood, to
bring all their Corn and Forage into that
place, upon very severe Penalties against
such as shall not comply therewith. They
likewise make great Provision of Forage
