(F. & H. 10,146.)

FOR the purposes of the Electric Lighting Acts 1882 to 1890, and all Provisional Orders and Licences made and issued thereunder, the Board of Trade approve of the pattern and construction of the meter (hereinafter described) for the measurement of electrical quantity when supplied on the constant potential continuous current system, viz. :—

The meter deposited at the Board of Trade by the Bastian Meter Company, of Bartholomew Works, Lawford-road, Kentish Town, London, N., and sealed by the Board of Trade and known as the Bastian Meter.

The Board of Trade further approve of the following manner of fixing meters of this description, and of connecting them with the service lines :—

The meter is to be fixed by screws to a vertical support.

In connecting the meter with the service lines, one service line is to be cut and the ends bared of insulation, and the conductors are to be tightly clamped in their terminals ; the insulation between the conductor and the case is to be good ; and the ends of the conductors are not to project beyond the terminal blocks.

The electrolyte with which the tube of the meter is to be filled must be a mixture of pure sulphuric acid one part, and water ten parts, the specific gravity of the mixture being 1.38.

Signed by order of the Board of Trade this 25th day of July, 1900.

T. H. W. Pelham, Assistant-Secretary,  
Board of Trade.
