From Monday February 29. to Thursday March 3. 1691.

Cadiz, January 14.

THE Conde d'Agular is gone for Madrid; Don Pedro Cornette is to command the Fleet in his place; and Don Honorato Bonifacio Papaciano is made Vice-Admiral. On the Seventh Instant arrived here in Sixteen days from the *St. Alban*. Captain Fitzpatrick Commander, the *Deptford* Captain Carr, and the *Crown* Captain Warren, with a small Prize laden with China Goods. This week were cast away on these Coasts 11 Gallies, but the Men saved. The Indulto being read, the Gallies begin to unlade.

Milan, Febr. 13. The Marquis de Loganez, our Governor-General, accompanied by the Count de Lamoyne Maître de Camp General, and other principal Officers, parted from hence towards the end of the last month to view the Garison and Fortifications at *Final*. The Duke of Savoy repaired thither about the same time from *Mondou*, and having had a Conference with his Excellency about the present state of Affairs, they went together to *Savona*, where they embarked the next day on the Admiral Galleys of the Duke of Turis's Squadron, attended by 3 other Gallies belonging to the State of *Genova*, and arrived at *Genova* the 4th Instant; At their coming in they were saluted with a discharge of all the Cannon from the Forts and the Gallies and Ships that were in that Port; and the Envoy of Spain, with Prince *Doria*, and divers other Persons of Quality went off to meet and Compliment his Royal Highness; and the Senate Deputed 12 of their Body to wait upon him, but his Royal Highness excused himself from receiving their Compliment, desiring to be *incognito*. The Duke of Savoy and our Governor were lodged in the Palace of the Duke of *St. Pierre*. The next day his Excellency left *Genova*, and arrived here on the 10th; and his Royal Highness after having seen the Curiosities of that City, intended to return to *Turin* by the way of *Savona* and *Mondou*. His Excellency has since his coming back ordered a Reinforcement of 600 Men to be sent to *Final*.

Venice, Febr. 15. The French Envoy, the Count de Raknac, is arrived here from *Rome*, but does not yet appear publicly. From *Dalmatia* we have an account, that the Turks had lately made an attempt upon the Fort of *Nicovich*, but were beaten off with great loss. The Senate have sent an Express to *Germany* to acquaint the Baron *Vander-Lippe* with the Choice they have made of him to be General of their Land Forces, and to desire him to hasten hither. Our preparations for the War go on very vigorously.

Javaros, Febr. 1. The King of Poland will leave this place the beginning of the next week, and go with the whole Court to *Lemberg*, where he purposes to pass the Carnival. *Mustapha* Aga, who was taken Prisoner at the late defeat of the Turkish Convoy (which he commanded) near *Sorocke*, was brought hither two days ago. A considerable Body of Tartars lies now encamped near *Caminiec*, and some of their Parties have, notwithstanding the extreme Cold Weather, entered into the Province of *Pacuzia*, about *Halizia*, and *Stanisluia*, where they burnt several Villages, and carried away many of the Inhabitants into Slavery: A Detachment of our Troops was upon the first notice thereof sent in pursuit of the Enemy, but could not overtake them, except some Straglers whom they made Prisoners. 'Tis confirmed that the Hospodar of *Mol-*

davia has caused his Chancellor, and the General of his Forces, with several others of his chief Officers, to be put to death, upon his having discovered some Practices which they were carrying on in favour of the Crown of *Poland*; And that he was preparing, with the assistance he expected from the Turks and Tartars, to attack the Poles who are possessed of several places in his Country.

Vienna, Febr. 24. The Preparations for the next Campagne are carried on in all the Hereditary Countries with great diligence and application; and all the Officers are ordered to have their Troops compleat by the beginning of *May* on pain of being cashiered. Prince *Louis* of *Baden*, who intended to set out from *Prague* on the 19th Instant, is expected here in few days to assist at the Consultations that will be held in the Emperor's presence about the Affairs of the War. The Turkish Troops that assembled lately near *Temeswaer*, with a design, as they gave out, to succor *Great-Waradin*, finding the execution of it was made impracticable as well by the badness of the Weather, as the Watchful Eye the Imperialists had upon their Motions, are separated again, and returned to their several Quarters; The news of which will doubtless very much increase the Consternation the Turks at *Great-Waradin* are already in; and as it must take from them all the hopes they still flattered themselves with of being speedily relieved, so it will in all probability convince them of the folly of their obstinacy, and make them prefer an honourable Capitulation, which they may yet obtain, to the great Miseries they suffer, without any prospect of saving the place. Colonel *Antonio* has with the Radziens under his Command made an Excursion lately into the Enemies Countrey, and advanced within some few miles of *Belgrade*, where he burnt several Villages, and brought back a great Booty. All the Advices from *Constantinople* and *Adrianople* speak of the great preparations which the Turks make for this next Campagne in *Hungary*.

Ratisbonne, Febr. 24. The Prince de Lobcovitz, the Emperors chief Commissioner, arrived here about a fortnight ago; On the 14th he presented his Credentials to the Dyet, and the next day was Complimented by a solemn Deputation on the part of all the Princes and States of the Empire; and these with some other previous Ceremonies being performed with mutual satisfaction, he has since begun to enter upon the Functions of his Commission. The Elector of *Bavaria* returned to *Municken* on the 18th Instant from *Vienna*; The 22d the States were to meet there; and on the 2d of the next month his Electoral Highness intends to set forward on his Journey towards *Flanders*. The Deputies of the Circle of *Suabia* that assembled lately at *Ulm* are separated, after having resolved to raise a new Regiment of Foot to consist of 1800 Men, and to make up those they have already in their service to the same number; and of this they have given notice to the States of *Franconia* assembled at *Nuremberg*.

Paris, March 1. The French King's departure for *Compeigne* continues fixed for the Third of this Month; but 'tis said at Court, that 'twill be only a Journey of eight or nine days. The Sieur de *Fauban*, and the Sieur de *Megrigny*, our two principal Engineers, are ordered for *Flanders*, but we yet hear nothing of the Duke
