Warsaw, Novemb. 5.

THE King of Poland is still at Zolkiew; From whence he is dispatching the Sieur *Rewouski* to the Cham of *Tartary*, (in company of the Tartar Envoy, who is returning home) to be more certainly informed of the Proposals of Peace, which the Cham is Empowered by the Ottoman Port to make to this Crown and its Allies; The King remaining fixed in his Resolution not to hearken to any separate Treaty. Our Forces are gone into their Winter-quarters, having left strong Garrisons in the two Forts that have been lately built to block up the Garrison of *Caminitz*: and a good Reinforcement has been sent to *Sorocke* on the *Niefter*; which place is now sufficiently provided with all things necessary for its Defence, and the Enemy thereby disheartned from proceeding in the design, they have long had, of attacking it.

Stockholme, Nov. 14. The Baron *Van Heckeren*, Envoy Extraordinary from the States General of the *United Provinces* at this Court, has adjusted all Matters about the Suedish Ships that have been taken by the Dutch since the beginning of the present War; And has sent the Treaty to the States for their Ratification. Yesterday the States of this Kingdom, composed of the Nobility, Clergy, Magistrates of the Towns, and Peasants, began their Session; First they repaired, according to Custom, to the Chappel of the Castle; After Divine Service they went to the *Rix-Hall*, a very spacious Room, which was hung with Black, and the King and the Senators being afterwards come thither, Count *Oxenstern* the Chancellor, acquainted them with the occasion of their Meeting; and then was Read to them his Majesties Proposition, (as tis here called) containing an account of the Queens Death, and of the State of his Majesties Affairs at home

and abroad, since the last Session; and that in the present Conjunction there were several things, in which his Majesty needed their Advice, the particulars of which should be communicated to their Secret Committee. Then the Speaker of the Nobility, the Archbishop for the Clergy, the first Burgher-master of this City, and a Peasant the Speaker of that Body, made their Compliments suitable to the occasion, and kissed his Majesties Hand, which ended the Ceremony. The Secret Committee, which usually consists of 5 or 6 Members, chosen by the King out of each of these four Bodies, will begin their Deliberations upon what shall be Communicated to them the next Week; and its believed the Session will be concluded before the end of this Month.

Ratisbome, Novemb. 26. The Business of the Ninth Electorate continues to be the Subject of frequent Conferences among the Ministers of the Electoral College, in order to find out such Expedients as may satisfy the Electors of *Trier*, *Cologne*, and the *Palatine*, who have not yet consented to it. It has been proposed to give the King of *Bohemia*, as the first Secular Elector, a Place and Voice at all the Diets and Consultations of the Electoral College (which he has now only at the Election of a King of the Romans,) but this the Electors of *Cologne*, *Bavaria*, *Saxony*, and *Brandenburgh*, shew no Disposition to agree to; The Electors of *Cologne* and *Mentz* do insist, that in case the two Electoral Branches of *Bavaria* and *Palatine* should come to fail, their Places should be filled by two Electors of the Roman Catholick Religion; And upon the whole the Emperor is sending Ministers to all the Electors to endeavour to adjust this Matter to their Satisfaction.

Hamburg, Decemb. 8. There has lately been great Disturbances in this City; The occasion of them was this; Doctor *Horbius*, Minister of the Parish of *St. Nicholas*, who has the Reputation of a very Devout Man, Taught several Doctrines, which were opposed by Dr. *Meyer*, Minister of *St. Jacobs*, an Eloquent Preacher, as being contrary to the Tenents of *Luther* and the *Augsburg* Confession, and having gained most of the Parochial Ministers to his side, the People in a short time became divided to such a Degree, that it occasio-
