Venice, July 30.

THE last Letters from *Dalmatia* give us an account, that the Turkish Troops, who were drawn together with design as 'twas thought to endeavour the regaining of *Ciclut*, perceiving the difficulties they were like to meet with, are separated again, and returned to their Quarters. Several new raised Troops are come within these few days to the *Lido*, and more are expected, and in the mean time Transport Vessels are providing to carry them to the *Levunt*; from whence 'tis confirmed that part of the Fortifications of *Negrepont* are thrown down by an Earthquake, and that this Accident would probably encourage our Forces to make an attempt upon that place. There are Advices from *Turkey* which say, that the Arabians had defeated the Ottoman Forces that were sent to suppress them, which as well as the great Treasure they had taken at *Mecca* and *Medina*, where they put all the European Turks to the Sword, had given them such a reputation that their strength was greatly augmented by the Arabians that came in to them daily.

Turin, Aug. 2. The Duke of *Savoy* decamped the 31th of the last month from *Ayrasque*, and marched to *Bruasque*, within a League of *Pignerol*, his Royal Highnesses Quarters being at *Mazel*; The Spanish Troops lie between *Disasque* and *St. Cecand*; and according to the Advice we receive from the Camp, the whole Army will march again in a day or two. The *Mareschal de Cazinat* continues in his old Camp near *Feneffrelle*, without any appearance of his removing from thence. On Saturday last passed through this City two Regiments of Switzers in their march towards *Cazal*, to reinforce the Troops appointed for the Blockade of that place. We have an account from *Pignerol*, that a Fire happened there the last week, which burnt a great Magazine of Hay.

Vienna, Aug. 4. The Imperial Army assembles at *Eudack* within 3 Leagues of *Peter-Waradin*, where 14 Regiments of Foot, 4 of Horse, and 2 of Dragoons were encamped on the 22th of the last month; 2000 *Lunenburghers* were to join them the 23d, and Major General *Crossfelt* was with several Regiments of Horse not above two days march from them. The Imperial Troops commanded by the Baron *de Pollant* had lately a Rencontre with a Party of the Garison of *Tepeswaer*, in which many Turks were killed, and some taken Prisoners. The Advices from the Frontiers say, that the Grand Visier arrived the 5th of July at *Philippopoli*, and intended to part again from thence on the 9th towards *Sophia*, but that the Asiatick Troops had not yet joined him. They write from *Peter-Waradin*, that they had Advice of the Visiers arrival at *Sophia*; That the Turks were forming a Camp near *Widip*; and that

they shortly expected there 15000 Tartars. General *Caprara* is still here, being indisposed. A great many Deferters, who are come over to us this Campagne from the French Army on the *Rhine*, being formed into Companies, are sent from hence to *Hungary*, to serve in our Army against the Turks. The Letters from *Transylvania* tell us, that General *Veterani* was posted with the Troops under his command near the *Iron Gate*; and that Colonel *Anthony* who went out with a Body of *Radziens* to destroy the Enemies Bridge over the River *Morava*, having advice that several Boats were passing down the *Danube* with Provisions for the Garison of *Belgrade*, he advanced towards them, and took 5 of the Boats, having first routed the Turkish Troops who marched by the River side to guard them; but *Ali Bassa* coming to their assistance with several Barks and Gallies, the *Radziens* lost two of their Prizes, and sunk the other three.

Meitz, Aug. 6. The Chapter of this Church is appointed to meet on the 6th of the next month to choose a Coadjutor in the room of the great Master of the Teutonic Order deceased, and in all appearance the Election will fall upon the Bishop of *Bamberg*, who is gone in the mean time to confer with our Elector at *Steinheim*. The Hussars of this Garison have frequent Rencontres with the Enemies Parties, and bring in many Prisoners.

Frankfort, Aug. 12. Prince *Lewis* of *Baden* continues encamped at *Ebishym*, about an hours march from *Bruchsal*; There is at present no talk of his passing the *Rhine*, seeing the Country on the other side of that River is so destroyed by the French, that his Army could not subsist there. The *Mareschal de Lorge* lies still near *Creuznach*, his Troops being very much weakened by Sickness and Desertion: The *Marquis de Chamilly* is posted with some French Troops near the *Rhine*, to guard the Intrenchments they have cast up there. They write from *Alsace*, that the People of that Province are grievously oppressed by the French, being not only obliged to raise great Sums of Money, but to furnish likewise the French Magazines with a certain quantity of Corn, which they cannot comply with, without leaving themselves destitute of what may be necessary for their own subsistence; and because these occasions great murmurings and discontents, which they fear the effects of when an opportunity offers, they have disarmed all the Inhabitants as well Gentlemen as others, except such as are in the French King's service.

Cologne, Aug. 14. The Letters from the *Upper-Rhine* tell us, that the two Armies continued in the same Stations mentioned in our last; The Germans near *Bruchsal*; and the French near *Creuznach*; among the latter there was a discourse of sending a Detachment of Horse towards *Flanders*.
