*Scottish Office,**Whitehall,**May 27th, 1920.*

A Loyal and Dutiful Address from the General Assembly of the United Free Church of Scotland, having been forwarded to the Secretary for Scotland for presentation to the KING, has been presented accordingly to His Majesty who was pleased to receive the same very graciously.

*Scottish Office, Whitehall,**May 27th, 1920.*

The following Address of the Ministers and Elders of the Church of Scotland, convened in General Assembly, having been transmitted by His Grace the Lord High Commissioner to the Right Honourable Robert Munro, His Majesty's Secretary for Scotland, has been by him laid before the King, who was pleased to receive the same very graciously:—

TO THE KING'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY,

We, Your Majesty's loyal subjects, Ministers and Elders of the Church of Scotland, met in General Assembly, have received with deep respect and gratification the most gracious letter which was delivered by His Grace the Lord High Commissioner.

The General Assembly have treasured the messages received during the years of War in which Your Majesty expressed your deep sense of the valour and the sacrifices of the Scottish people, and we have been not less stirred by the present appeal to the Church to help in building a better future on the shaken foundations of the past. We recognise the call to labour for the consummation of that City of God wherein all may dwell as brethren in unity. In the hope that our Church may make a more definite contribution to the accomplishment of that lofty purpose, the General Assembly have constituted a Committee on Church and Nation which is charged with the duty of doing what in it lies to further the aims of the Covenant of the League of Nations, and also of endeavouring to heal divisions and to promote concord at home by impressing upon all sections of our people the ideal of the brotherhood of citizenship.

We desire respectfully to convey to Your Majesty our grateful recognition of the unique service which has been rendered by Your Majesty's example, and to which so signal an addition is being made by the Prince of Wales, in strengthening the moral and spiritual bonds which are needed to unify the life of the nation, and to consolidate the Empire.

We appreciate the renewed assurance of Your Majesty's resolution to uphold and support the Church of Scotland.

We thank Your Majesty for the renewal of the royal grant of Two thousand pounds which will be used for the great benefit of the population of the Highlands and Islands of Scotland.

The General Assembly rejoice in the re-appointment to the office of Lord High Commissioner of His Grace the Duke of Atholl,

who is honoured amongst us for his patriotic labours and beloved for his personal qualities.

We earnestly commend Your Majesty, our Gracious Queen Mary, and all the Royal Family, to the protection and blessing of Almighty God.

MAY IT PLEASE YOUR MAJESTY,

Your Majesty's most faithful and loyal subjects, the Ministers and Elders of the Church of Scotland, convened in General Assembly.

Signed in our name, in our presence, and at our appointment, by

*Thomas Martin, D.D.,*

Moderator.

## ADMIRALTY NOTICE TO MARINERS.

No. 838 of the year 1920.

## WIRELESS DIRECTION FINDING STATIONS.

*Former Notice.—No. 363 of 1920.*

1. Wireless direction finding (D.F.) stations are stations set up ashore equipped with receiving apparatus which enables them to ascertain the direction from which wireless signals transmitted by another station emanate.

2. The accuracy with which bearings can be taken depends on the conditions outlined below; but, although in general the bearings taken by a station within the sector over which it is designed to work can generally be considered accurate to within two degrees, the administrations controlling these stations cannot accept any responsibility for the consequences of a bearing being inaccurate.

3. It is, however, pointed out that if at least three D.F. stations can be employed and if they are so situated as to give intersecting bearings, considerable reliance can be placed upon the result of 3 simultaneous bearings thus obtained, provided that the "triangle of error" (sometimes called the "cocked hat") formed by the intersection of the bearings is small.

4. In order to obtain the greatest possible degree of accuracy, it is important that the ship should not transmit with too much power.

Signals should, however, be fairly strong and clear; great care must be taken to keep the note and strength steady, and to pay strict attention to spacing.

5. It must be borne in mind that it is impossible for the majority of existing D.F. stations to distinguish between a bearing and its reciprocal (*i.e.*, there is always a possible error of 180°), and that bearings are often unreliable at night and in very bad weather, also when the direction runs roughly parallel with the coast line.

6. The methods of asking for and giving bearings and the waves to be used will shortly be standardised by International agreement; and the particulars of the D.F. stations will eventually appear in the International List of Radiotelegraph Stations. Meanwhile, each country is publishing regulations governing the use of its own D.F. stations as set out below.

7. It should be noted that there are two principal systems of D.F. stations at present in use, *viz.* :—

(a) Where each D.F. station is fitted with transmitting and receiving gear and works independently of others.

(b) Where several D.F. stations (all of them usually near a harbour entrance or difficult passage) are linked together by special land telegraph lines, being thus controlled by one station which alone is fitted with transmitting apparatus. The controlling station in such cases is not necessarily a D.F. station, but may be an ordinary coast station.

*Regulations for Canadian and Newfoundland D.F. Stations.*

8. The following independent D.F. stations are established :—

Station.	Call Signal.	Range (miles).	Lat. N.	Long. W.
Chebucto Head ... ..	VAV	250	44 30 01	63 31 20
Canso ... ..	VAX	100	45 19 24	60 58 25
Cape Race ... ..	VAZ	250	46 39 10	53 05 05

9. These stations keep watch and take bearings on the 600-metre wave.

10. A ship requiring a bearing should call the D.F. station required, and transmit a *government* message requesting the bearing.

*Example.*—A ship S.S. "Nonsuch," call sign X Y Z, calls up Chebucto Head in the ordinary way and, on receiving "K" (go on), makes the message as follows :—

"Call" S Radio Nonsuch 1, 5, 10 (day of month) 10.50 M (time) = Officer in charge Chebucto Head = Request bearing = Master + X Y Z.

11. The D.F. station will then acknowledge receipt of the message and, if not ready to take the bearing at once, will direct the ship to wait.

12. When ready to take the bearing, the D.F. station will make "K" (go on), whereupon the ship will make the figure "2" 30 times, commencing with the "Call" and ending with the "Cross" and her own call signal.

13. If the D.F. station is not satisfied with the bearing, it will make the "repeat" sign (?)

and the ship will again make the figure "2" as above, but only 20 times.

14. In default of such request for a repetition, the D.F. station does not transmit until it is ready to give the bearing. To do so, the station calls the ship and sends (as a *government* message) the TRUE bearing of the ship from the station in degrees from 0° to 359°, the angles being measured from true north (0°) clockwise through true east (90°), true south (180°), and true west (270°).

*Regulations for D.F. Stations in the United States.*

15. The following U.S. Naval D.F. stations are now in operation for the purpose of furnishing bearings to vessels in the Western Atlantic. Stations marked \* are in continuous operation in foggy weather only.

The stations given in the former Notice, which are not included in the following list, are to be expunged from the charts.

*Morris island, S.C. ... ..	NAO	32 41 36	79 53 17

16. Where two or more of the foregoing D.F. stations have the same call signal it indicates that they are connected by telegraph to and under the control of a central control station, the call signal being the call of the central control station. When a request for bearings is made the central control station invariably answers with a bearing from each of the D.F. stations under its control.

17. The following signals have been authorised and will be used until further notice:—

Signal.	Meaning.
QTE ? ...	What is my true bearing ?
QTE ...	Your true bearing is — degrees from — D.F. station.

18. To obtain bearings, the D.F. station should be called on 800 metres in the usual manner, and the call followed by the signal "QTE?", meaning "What is my true bearing?" When told by the D.F. station to "K" (go ahead), the ship's operator should follow the procedure outlined below:—

- (a) Transmit the ship's call signal for 30 seconds.
- (b) Make dashes, each dash 5 seconds long, for one minute, with the ship's call signal after each dash.
- (c) Terminate with the signal "K" (go ahead).

19. If satisfactory bearings are obtained, the operator at the D.F. station will call the vessel in the usual manner and reply "QTE" fol-

lowed by the true bearing in degrees (0 to 359) spelled out in words, and the name of the D.F. station from which the bearing was obtained; otherwise a repetition of the test will be requested.

20. The ship's operator should acknowledge receipt of the bearings by answering the D.F. station in the usual manner and repeat, in numerals, the bearings received. This procedure enables all stations concerned to check the bearings.

21. All United States Naval D.F. stations keep watch and transmit on 800 metres for merchant vessels, and this wave-length should be used for calling and answering and carrying on all communication with these stations.

22. In order that the operation of shore D.F. stations may be checked up, — | — a brief report should be forwarded to the Director Naval Communications, Navy Department, Washington, D.C., containing:—

- (a) Name of ship.
- (b) Name of D.F. station.
- (c) Date and G.M.T. at which wireless bearing was given.
- (d) Bearing given by D.F. station.
- (e) Estimated position of ship at above time and date by methods other than wireless.
- (f) The probable degree of accuracy of the estimated position.
- (g) Weather conditions at above time.
- (h) Remarks, if any.
- (i) Signature of master or responsible navigating officer.

NOTES:—(2) Rhyl is not fitted with transmitting apparatus and is controlled by Amlwch.  
 (3) Seaview is not fitted with transmitting apparatus and is controlled by Malin Head (GMH), which keeps watch on 600 metres.

24. All the above D.F. stations keep watch and take bearings on the 450 metres wave (see note). Except as shown in the notes they all work as independent stations and can transmit, as well as receive, on 450 metres.

*Note.*—Ships with Marconi apparatus can adjust their transmitting gear very nearly to this wave (using reduced power) by cutting out half the primary transmitting condenser and adjusting the A.T.I. till the earth lamp shows maximum current in the aerial. The primary slider should be "all in."

25. The actual procedure to be adopted by ships requiring bearings will depend upon what stations are concerned. It should be observed that if the stations to be called do not all keep watch on the same wave (e.g., Malin Head and Larne), bearings should be asked for separately. If on the other hand the stations to be called all keep watch on the same wave (e.g., Lizard and Carnsore), they should be called up together and the bearings taken in one operation. If, however, two or more stations are linked by special land lines (e.g., Amlwch and Rhyl), only one of them should be called up. In such cases, however, the ship must specify in the preliminary signal the D.F. stations which are required to supply bearings.

26. The following abbreviations are to be used:—

Signal.	Meaning.
QTE ?	... "What is my true bearing from you (or from —)?"
QTE	... "Your true bearing from me (or from —) was — degrees."

27. The ship calls the station or stations on the appropriate wave, making "QTE?" in conjunction, if necessary, with the call signals of the stations from which bearings are required and also (if the call is not made on 450 metres) by the figures "450," signifying that the ship will shift to 450 metres for the taking of the bearing. The ship then awaits instructions.

*Example 1.*

A ship whose call signal is XYZ requires bearing from Amlwch (BXV) and Rhyl (BZW).

The ship, having first shifted to 450 metres, calls Amlwch thus:—

$\overline{\text{CT}} \text{ BXV BXV de XYZ QTE BXV BZW ?}$   
She then awaits instructions.

*Example 2.*

The ship requires a bearing from Seaview (BXX). The ship has to use 600 metres to call Malin Head (GMH).

She calls on 600 metres, thus:—

$\overline{\text{CT}} \text{ GMH GMH de XYZ QTE BXX ?}$   
450.

She then gets ready to shift to 450 metres and waits instructions.

28. The station or stations called then make the necessary arrangements and, when ready, answer in alphabetical order of their call signals (if more than one was originally called) and make "K" (go on) preceded by "450" if 450 had been made in the original call.

*Example 1.*

Amlwch, in Example 1 above, warns Rhyl by land line and, when both are ready, makes on 450 metres:—

$\overline{\text{CT}} \text{ XYZ de BXV K}$

*Example 2.*

Malin Head, in Example 2 above, warns Seaview by land line and then makes on 600 metres:—

$\overline{\text{CT}} \text{ XYZ de GMH 450 K}$

Malin Head then shifts to 450 metres so as to be ready to give the result when received by wire from Seaview.

29. On receiving "K," the ship, having shifted transmitting wave to 450 metres (if not already done), then makes her own call signal for 45 seconds and awaits the result.

*Example 1.*

The ship, in Example 1 above, makes on 450 metres:—

$\overline{\text{CT}} \text{ BXV de XYZ XYZ XYZ, \&c. (for 45 seconds) XYZ}$

*Example 2.*

The same as Example 1, reading GMH for BXV.

30. The station or stations then reply (in alphabetical order if more than one) either asking the ship to repeat (?) or giving the result. The result is given by the signal QTE followed as necessary by the call signal and by a group of three figures (000 to 359) indicating the true bearing from 0° to 359°, reckoned as in paragraph 14, of the ship from the station. Several bearings can be combined into one message, each bearing immediately following the call signal of the station which took it. The time of handing in is always expressed in Greenwich mean time for all messages giving bearings to merchant ships.

*Example 1.*

Rhyl, in Example 1 above, is not satisfied with the bearing and informs Amlwch. Amlwch makes on 450 metres:—

$\overline{\text{CT}} \text{ XYZ de BXV ?}$

The ship at once complies by making on 450 metres:—

$\overline{\text{CT}} \text{ BXV de XYZ XYZ XYZ, \&c. (for 45 seconds) XYZ}$

Rhyl is then satisfied that the bearing is 340° and informs Amlwch, while Amlwch finds that its own result is 37° Amlwch therefore makes on 450 metres:—

$\overline{\text{CT}} \text{ XYZ XYZ de BXV 1 9.45 M (time) = QTE BZW 340 BXV 037 + BXV}$

*Example 2.*

Seaview, in Example 2 above, gets a satisfactory bearing of 329° and informs Malin Head. The latter makes on 450 metres:—

$\overline{\text{CT}} \text{ XYZ XYZ de GMH 2 10.46 S (time) = QTE BXX 329 + GMH}$

*Example 3.*

Had the ship merely asked Lizard (BVY) for a bearing, Lizard, finding it to be 246°, would make on 450 metres:—

$\overline{\text{CT}} \text{ XYZ XYZ de BVY 1 7.6 M (time) = QTE 246 + BVY}$

31. The ship, on receiving the result, acknowledges receipt in the ordinary way, and makes the "end of work" sign. This sign is then repeated by the station or stations concerned. It is important that the "end of

work" sign should not be omitted, since it not only indicates that the operation is finished, but it also shows that all concerned are about to resume watch on their normal wave.

33. The regulations for French D.F. stations are similar to those for the United Kingdom.

*Regulations for Italian D.F. Stations.*

34. The following D.F. station is established:—

Station.	Call Signal.	Lat. N.	Long. E.
		° ' "	° ' "
Murano ... ..	IRM	45 27 40	12 21 22

NOTE.—The above station cannot answer the calls from ships, but is in direct communication by telegraph with the W/T station Carbonera (ICZ).

35. Vessels wishing to obtain bearings from Murano D.F. station must call up Carbonera station, and the latter, having obtained the required information from Murano, will duly transmit it to them. The bearings are True, and are given in degrees from 0° to 359°.

36. The procedure is as follows:—

A ship whose call signal is ABC wishes a bearing.

On a wave of 600 metres she will signal:—

CT ICZ ICZ de ABC QTE ?

Carbonera will answer:—

CT ABC de ICZ AS

Carbonera then wires Murano; when ready, Carbonera replies:—

CT ABC de ICZ K 6

ABC after 30 seconds signals:—

CT ICZ de ABC ABC ABC, &c., for 45 seconds.

37. If dissatisfied with the bearing, Murano through Carbonera will ask the ship to repeat.

Carbonera signals:—

CT ABC de ICZ UD

ABC repeats the signal as given above.

38. When satisfied with the bearing, which is assumed to be 170°, at 9.45, Murano will transmit it by telegraph to Carbonera, whence it is passed to the ship as follows:—

CT ABC de ICZ de IRM 9.45 M BT
