Warsaw, December 6. N. S.

TWO days ago arrived here an Express from Prince *Sapiba*, Great General of *Lithuania*, and brought an account, That after having Treated with some of the Great Men, who took part with the Confederated Troops in that Dutchy, and having prevailed with them to come over to his side, in order to restore the Peace and Quiet of the Country, the said Confederated Troops had likewise submitted, upon Conditions mutually agreed on, to wit, That there should be a general Amnesty of all that is past; That the Confederacy should be dissolved; That none of those that were concerned in it, should on that account be molested for the future; That they should forthwith be paid half of their Arrears; That they should not enter into any Confederacy hereafter; and should obey the Orders of the Great General; This Agreement being signed on both sides, it was put in execution the 27th of the last month, when the Chief Officers of the Confederated Troops waited on Prince *Sapiba*, and made their submission to him at the head of the Forces he had caused to be drawn together for this Occasion. Matters being thus accommodated in *Lithuania*, the Example will in all likelihood be quickly followed by the Confederated Troops in *Poland*, who meet with great difficulties in providing themselves with Winter Quarters, and begin to be made uneasy by the Disagreement of some of their Principal Commanders. The Queen, since her reconciliation with Prince *James*, her Son, does not only endeavour all she can to support his Interests, but has shewed a publick Resentment of the Proceedings of the French Ambassador, who labours to promote the Election of the Prince of *Conti*, and she has written to the French King, to complain of the little regard that is now had to the many Promises and Assurances of Friendship and Assistance which the late King

and his Family received from the Court of *France*. The Tartars that made the last incursion into the Country about *Lemberg*, and continued afterwards for some time in the Neighbourhood of *Caminiec*, are since retired to *Budzian*.

Vienna, Dec. 15. The Officers of the Imperial Troops are commanded to have their Companies and Regiments compleat by the end of *March* at farthest; Great provision is made of Bombes and Ammunition for the Service of the next Campaign; and Commissaries are sent to replenish the Magazines in *Hungary*. The Envoy from *Moscovy* assures this Court, that the Czar, his Master, is resolved to prosecute the War against the Turks and Tartars the next year, with all the Force he can draw together; and that he has ordered a great number of Vessels to be built, with which he designs to enter into the *Black Sea*, and annoy the Turks, who lie very open on that side; and the Letters we receive from *Turkey* say, these Preparations of the Moscovites do very much allarm the People at *Constantinople*. The last Letters from the Frontiers of *Hungary* brought nothing material, besides an account of some Excursions made by small Parties on both sides. The Turks have a very strong Garison at *Belgrade*, and seem still to have an Eye upon *Titul*; but at the same time care is taken to fortifie the place; and the German Troops in those parts do carefully watch the Enemies Motions. They work on the new Fortifications of *Peter-Waradin* as fast as the Weather will permit; and Count *Guido* of *Staremberg*, who commands all the Emperor's Forces on that Frontier, and has his Residence at *Essecke*, has fortified several small Places between the Rivers *Save* and *Drave*, for the security of the Country against the Enemies Excursions. Prince *Lewis* of *Baden* is expected here after the *Christmas* Holydays.

Frankfort, Dec. 23. The French, by the Preparations they make at *Philippsburg*, *Landau*, and other Places near the *Rhine*, seem to have a design of passing that River, and making an Incursion into the Country of *Wirtemberg*; and upon these Advices Orders are given to post several German Regiments in such places, as are most proper for disappointing any attempt they may make of this kind. Ten of the Imperial Regiments, which return from *Italy*, are, it's said, to have their Winter Quarters in or near the Empire, that they may be ready for the next Campaign there.

Cologne, Dec. 25. A Party of the *Brandenburg* Troops quartered in this Diocess made some few days ago an Excursion into the Country of *Lomburgh*, and brought back with them several Prisoners. Prince *Lewis* of *Baden* has writ to the States of *Franconia*, to acquaint them with the approach
