Dantzick, Aug. 19. The King of Poland is marching towards Warfam with the remains of his Army, and the Sooo Saxons that have lately joined him, having repaired the Loss of his Artillery in the late Fight of Pinschoff, by taking with him all the Cannon that was in Gracow. The King of Sweden came to that Place in Performance of the Place of Sweden came to the Place in Performance of the Performance of th fon the 11th Instant, and affured the Inhabitants of his Protestion, after which he returned to his Camp near that Town. Letters from Livonia fay, the Muscowites make Excursions into that Country, and commit great Ravages there, and that General Schlippenbach continues to get together near Pernau as many as he can of the Livonnian Nobility and Militia, but cannot yet make up a Body of them sufficient to appose the Musconnian

Francfort, August 23. There have been great Rejoicings in these Parts for the Victory obtains ned by Prince Eugene over the French Army in Italy, which we have-received an Account of by several Expresses, who all assure us, That the Loss on the fide of the French amounts to 7 or 8000 Men, and that of the Imperialiffs does not exceed 2000. The King of the Romans came the 19th Instant to Heydelberg to visit his Queen, and returned the next day to the Imperial Army before Landau, which is greatly encouraged by his Presence to carry on vigorously the Siege of that Place. They have already made feveral Lodgments upon the Counterfarp, and raifed feveral Batteries on some of them; Yesterday they were to storm the Cittadel, of which we have great reason to expect a good Account, and they are making Preparations for a General Attack upon the Counterfearp, which the French themselves have no hopes of preferving, not having in these Parts an Army sufficient to relieve the Place. In the mean time the Cannon continues to play very furiously on both fides, and a red-hot Bullet from the Town unfortunately fell into a Barrel of Gunpowder which stood near one of our Batteries, and kil-led and wounded above 30 of our Granadiers. Our Batteries have already made several Break-ches in the Wall of the Town, which they are making wider. The Convoy of Artillery and Ammunition, which has been preparing here for our Army, will be sent away in a day or two. The Elector of Mentz and the Elector Pa-latine are both gone from hence, the first to Mente, and the other to Weinkein, where his Electoral Highness intends to thay fome time before he goes to Heydelberg. We hear, the French King has consented that the Duke of Izra rain shall observe a Neutrality, upon the same Conditions which had aheady been allowed by the Emperor,
