Virginia, July 29.

Francis Nicholson Esq; Lieutenant and Governor-General of Her Majesty's Colony and Dominion of Virginia, having received Letters from the Lords of Her Majesty's most Honourable Privy-Council and the Lords Commissioners for Trade and Plantations, directing him to Proclaim Her Majesty throughout that Colony; Orders were thereupon given, That the Militia should appear in Arms; and accordingly on the 10th of June last Her Majesty was proclaimed with all the Solemnity the Country was capable of; The Confluence of People was so great, that there never was such an Appearance in Virginia before. The Governor (on his Part) spared neither Cost nor Pains to have it done as became Loyal and Dutiful Subjects.

From the Imperial Camp near Luzzara, Sept. 17. N.S. The 11th Instant, we saw the Gariton of Guastalla pass over the Enemy's Bridge on the Po, with Drums-bearing, Colours flying, &c. who are to be conducted to the Country of Tirol, and not to serve against the French during this Campaign. The 12th, we foraged towards the Botta with the loss only of some Horses: The 13th, our Left Wing foraged without any loss: The 14th, our Right foraged with a Guard of 200 Horses, whereof the Enemy having notice, they sent out of their Camp 1000 Horses, and as many Foot, who falling upon our Foragers took several of them, with about 12 Horses; the Marquis of Vaubonne immediately marched out with several Regiments to protect our foragers, but the French were retired in such haste, that he could not come up with them. A Party of Colonel Ebergeni's Hussars did, in sight of the Enemy's Camp, kill 5 Spanish Troopers, and bring off one of their wagons laden with Provisions. Another Party of our Hussars killed 20 of the Enemy near Marcate, took a Captain and a Lieutenant Prisoners, and some Cattel. The 16th, our Left Wing foraged without any loss, having a Guard of 200 Horses under the Command of Lieutenant-Colonel Gelhorn. We received an Account, that a Detachment of the Enemy was marching towards the Botta, and several Parties were sent out to get Intelligence, who brought Advice, that 6 Regiments of their Gendarmes with 22 Companies of Grenadiers were going to encamp near that River, whereupon Prince Eugene sent Orders to Colonel Kirchbaum to march to Mirandola with 200 Horses, and with the Forces of Woltemburtel which lay at San Benedetto; His Highness detached the Marquis of Visconti with 700 Horses to observe the Enemy, and to protect our sick and wounded Men which are quartered at Rovero, and other Places thereabouts, and gave Directions that 600 Grenadiers and Fusiliers should be in a readiness to march, and that Lieutenant-Colonel Gelhorn with his 200 Horses should also advance towards the Enemy to observe their Motions; who soon after sent an Account, that he believed this Body to be only a Guard to the Enemy's Foragers, and that about 400 of them fell in with a small Party of our Dragoons, which retreated in good order with the loss only of 3 Men. The 17th, in the morning, the Enemy pyled us with their Cannon very briskly, and at night made a general Discharge of their great and small Arms upon us, for joy that an Elector had in time of Peace with the Empire promised to return their Compliment upon a just occasion, Orders being given to fire *Ten Decem* for the taking of Landau, and to make three Discharges of all our Cannon and small Shot. The Marquis of Visconti is come back with the Detachment of Horses under his Command, the Body of the Enemy whom he was sent to observe being marched towards the Medenezze, where, as we are informed, they are foraging with a Guard of about thousand Men, and the Prince of Vandemont, Governor of Milan, being with them, it is not improbable that they have some farther design.

Copenhagen, Sept. 26. The French Ambassador here had private Audience of Leave yesterday of the King of Denmark, and is upon his departure home. The King intending to review the Land Militia of this Island, went this morning for that purpose to Fredericksburgh, where he will dine, and lie this night at Roeschild; He proposes to go to morrow to Kog, the 23th to Nefsted, the 29th to Anderschaw, and the 30th to Ringsted, where he will continue the two following days, and then return hither the 3d of the next Month. It is said, that His Majesty designs out of the Militia of this Place, which at present consists only of the Militia of this Regiment of Dragoons. The Muscovite Ambassador, who went from hence some Months ago to Berlin to wait upon the King of Prussia, is lately returned hither. Our Accounts from Courland say, a Body of Muscovites was come as far as Bauske in that Country.

Ratisbonne, September 28. The several Colleges having on the 26th Instant finished their Conclusions concerning the Declaration of War against France and Spain, the Electoral College and the College of Princes met yesterday, and took their Places in Ceremony, which is the first time the same has been done since the Peace of Ryswick; and then the Ministers of Mentz and Saltzbouurg, their two Directors, having read openly each his Conclusion and interchanged them, each College retired apart, and after a short Consultation returned to their respective Places, and immediately gave Orders, That their Directors should draw up one General Conclusion out of both; which is accordingly done, and the same was laid before them to day, Read and Approved by them, and likewise by the third College. The 20th Instant, the Count of Furstemberg and Lieutenant-General Hobenzollern were detached with 16000 Men from the Imperial Army near Landau, with Orders to pass the Rhine, and prevent the joining of the Elector of Bavaria's Troops with those under the Marshal de Catinat, by which means he will not be in a condition to proceed farther in his Design, and may think it time, for his own Security, to consider of other Measures more agreeable to the Publick Good, especially considering the two Circles of Suabia and Franconia are so far from being moved either by his Pretences or Threats; that they highly resent his Letter upon the taking of Ulm, and are putting themselves into a Posture of Defence.

Berne, Sept. 28. The Troops of the Elector of Bavaria which were advancing towards the Frontiers of Switzerland are marching back, and we hear his Electoral Highness is returning with them into his own Country with all speed, fearing least the Detachment sent from the Imperial Army may have Orders, to fall upon his Territories.

Frankfort, October 1. The Imperial Army which was encamped near Croonweissenbourg, is marched to Haguenau, to oblige more narrowly the French Army commanded by the Marshal de Catinat, which continues under the Cannon of Strasbourg. The Deputies of the Circle of Suabia are to meet shortly at Heidelberg, and those of the Circle of Franconia at Neckars Ulm; about 2 Leagues from thence, to consider of taking such Measures as may prevent any other Designs of the Elector of Bavaria, that so the Peace of the Empire may be preserved.

Hamburg, October 3. According to our Accounts from Poland, great Endeavours are used to procure a Peace between the Kings of Sweden and Poland, with good hopes of Success. The Cardinal Primate had lately a long Conference with the King of Poland at Warsaw, wherein he obtained his Consent to several Particulars, which will much contribute to a good issue of this Negotiation; This Prince seems unwilling to forsake his Ally the Czar of Muscovy, which is urged by the Swedes as a Condition from which they will hardly depart. They write from Cracow, that the Cattle of that Place has been burnt down by the Negligence of some of the Swedes that were quartered in it, and that the whole Town was not without much difficulty preserved from being laid in Ashes.

From the Camp of the Allies at S. attendael, Oct. 5. Letters dated yesterday from the Prince of Nassau Sarbruck's Camp before Ruremond give an Account, that on Monday night they opened their Trenches in two places, the Attack on the Right being carried on by the English and Dutch commanded by Mr Major-General Feckelous, and that on the Left by the Prussian Forces under the Command of the Prince of Anhalt; They began to break Ground about 1000 Yards from the Town, and advanced that night about 500, intending to stop there till their Batteries on which they worked all the next night were finished. These Batteries consist at each Attack of 24 Pieces of Cannon, and as many Mortars, and were to be in a condition to play upon the Town as this day, and they hope to do such Execution with them, as to oblige the Enemy to Surrender in 3 or 4 days. Yesterday the Governor of Stevenswert marched by our Camp with his Garrison in their way to Nimur, according to the Capitulation. The Deputies of the States-General went this morning to the Camp before Ruremond, to confer with the Prince of Nassau Sarbruck about sending a Detachment from thence to observe the Count de Tullin, who, it is said, has pulled the Rhine at Bon, and threatens to bombard Cologne, and it's not doubted but such a Body of Men will speedily march that way, as will be sufficient to disappoint any such Design. The Baron of Lillieroo, Ambassador of Sweden, came hither this day from Aix la Chapelle in his way to the Hague, and was entertained at Dinner by his Excellency the Earl of Mariborough; after which he continued his journey for that Place.

Hague, October 6. N. S. We daily expect to hear of the Surrender of Ruremond, after which it is believed our Army will either march against the French to oblige them to remove from Toegeren, or advance towards Liege, which last Design the French being apprehensive of and conscious that they are not in a condition to defend it in case of a Siege, they have undermined the Citadel in order to the blowing it up, and are otherwise disposing Matters to be in a readiness to abandon the Place upon a short Warning, tho' they make a show of going on with the Fortifications to prevent the Inhabitants leaving the Town, which they had begun to do upon the fear of being plundered by the French when they should quit it. Mr. Aglionby, Her Majesty of Great-Britain's Envoy Extraordinary to the Swiss Cantons, went from hence two days ago to Amsterrdam, from whence he will continue his Journey to Switzerland. Baron Lillieroo, the Swedish Ambassador, is daily expected from Aix la Chapelle; He will meet here with Orders from the King his Master for his return home, where he is to be employed in the greatest Affairs of that Kingdom.

After which, he had also a private Audience of Leave of his Royal Highness Prince *George of Denmark*, being conducted in like manner.

Whitehall, Sept. 30. The Earl of *Portland*, Sir *David Mitchell*, and Lieutenant-General *Churchill*, arrived here yesterday from *Holland*, and at the same time came over in one of Her Majesty's Yachts *Baron Pleff*. We have a Account by this opportunity, that on Saturday last in

London, Sept 30. Yesterday the Common Hall proceeded to the Election of a Lord Mayor, and having returned Sir *Samuel Dajwood* and Sir *John Eagles* to the Court of Aldermen, they unanimously made Choice of Sir *Samuel Dajwood* to be Lord Mayor for the year ensuing.

Whereas on Decr. 1693: Mr. *Charles Ardesolf* did by an Order and Authority of the Rt. Hon. the Lords of the Admiralty published in the Gazette, an Experiment justly made in His late Majesty's Ship the *Depford* upon the bare Oak-Plank, without sheathing, of a new Composition or Graining Stuff against the Worms, after a short time at Sea, the most part of the time in the West-Indies, and particularly at *Bombadoes*, where she lay 10 Weeks; and at her return was surveyed by His late Majesty's Officers at *Woolwich*, which they reported to the Honourable the Commissioners of the Navy, That they found no Place touch'd with the Worms; but as good as ever, and the Keel likewise firm and untouch'd: Therefore the said *Charles Ardesolf* doth hereby give notice, That he is to be taken with us the Crown Coffee-house next the Crown Tavern behind the Royal Exchange every Tuesday, Thursday, and Friday, from 11 in the morning till 3 in the afternoon; where those who desire to make use of the said Graining Stuff may be more exactly informed.
