

# The London Gazette.

Published by Authority.

From Thursday November 19. to Sunday November 23. 1702.

At the Court at Whitehall, Nov. 19. 1702.  
PRESENT,

The Queen's Most Excellent Majesty in Council.

**H**ER Majesty in Council is pleased to Declare, That for the Encouragement of such Regiments, Troops and Companies, as have been, or shall be sent to the West-Indies in Her Majesty's Service during this War, It is Her Royal Intention, That all Officers and private Soldiers, as intimated to be retained, shall now and then be rewarded by order Her Majesty's Forces to be sent thither once in Three Years. And that during their stay in the West-Indies, their Pay shall be paid and fully satisfied every Week, or as often as possible, in Money or Provisions, and that the Officers shall receive at such times of Payment their usual Subsidies, but their full Pay, according to the Establishment, subject only to such Deduction from the said Officers and Soldiers as are usual, for Clothing, the Company, and the One Day's Pay for the Royal Hospital at Chelsea, and such others as they themselves shall desire. And in Her Majesty's further Pleasure, That this Declaration be Published in the Gazette.

William Blathwayt.

**Vienna, Nov. 15. N. S.** On the 13th Instant my Lord Payer, late Ambassador from England at the Ottoman Port, who has been here about 4 Months, to adjust Matters relating to a Dispute between the Emperor and the Port, about the Limits of their respective Territories in the Province of Bosnia, having now fully settled that Affair, his Excellency had Audience of Leave of the Emperor and Empress on the 13th Instant, and intends in few days to proceed on his Journey to England. This day being the Feast of St. Leopold, whose Name the Emperor bears, was observed here as usual, with great Solemnity, and there was an Opera, with other Rejoycings, at Court. The King and Queen of the Romans are at present at Praeg, in Bohemia, from whence they are expected here in a short time.

**Berlin, November 21.** Letters from Warsaw say, Monsieur Du Heron, the French Envoy, had been seized there by a Party of Dragoons as he was abroad in his Coach, and was carry'd out of Town, but it was not known whither; The reason why he has met with this usage, is supposed to be, that he had neglected the repeated Orders both of the King and the Senate, That he should depart from thence, and that he talked with too much freedom of the Proceedings of that Court, particularly upon the occasion of their sending a Body of Troops into the Emperor's Service. They write from Lemberg, That a great number of the Cossacks, who are Subjects to the Crown of Poland, have taken the opportunity of the Troubles that Kingdom is now embroyled in, to take up Arms against it, and surpris'd the Town of Biaheckerkow, but had not yet been able to take the Castle; And that a Body of the Nobility of Poland, and some of the Forces of the Crown, are drawing together in order to suppress this Rebellion. We are without any certain Accounts of the March of the King of Sweden's Army.

**Frankfort, Nov. 23.** Prince Lewis of Baden is now at Erlingen, settling the Repartition of the Winter Quarters for his Forces, which are already separated, and are cantoned in several places within our Lines near the Rhine. The French Army is also gone into Winter Quarters in Alsace. General Thungen being indisposed, went some days ago to Baden, to use the Water there. The French continue to fortifie the small Town of Newbourg, on this side of the Rhine, where they keep a numerous Garrison; We hear that a Party of 800 Hussars making an Excursion lately that way, fell upon 500 of that Garrison, who were foraging with a Guard of 400 Men, and defeated them, killing above 200 of the Enemy, and taking Prisoners above 100, among whom are a Lieutenant Colonel, 4 Captains, and as many Lieutenants. The Landgrave of Hesse Cassell has been to confer with the Elector of Triers at Coblenz, from whence he is now come to Braubach; He has sent 20 Pieces of Cannon to Rhinfeld, and the Landgrave of Hesse Darmstadt, has sent them 4 and 4 Regiments of the Forces of Lunenburg are marching thither to reinforce that Garrison, so that we look upon that place to be secure at present from the Attempts of the French, whose Designs on that side have also been disappointed by the long Defence of the Castle of Traerbach, and the March of the Palatine Forces from the Upper, and the Hessians from the Lower-Rhine, towards the Moselle. It is said that a Negotiation has been carried on for bringing over the Elector of Bavaria from the French Interest, but there is little appearance of Success, his Demands being very unreasonable; as among other things, That the Circles of Suabia and Franconia should reimburse him the Expences he has been at on account of the present War; That the House of Austria should engage to allow him a Pension of 300000 Fiorins during his Life, in lieu of a like Pension which was promised him by Spain; That the Marquitate of Burgau, and the County of Ortenbourg, near Lintz, be given up to him; besides several other places he lays claim to, as having formerly depended on the Dutchy of Bavaria and the Upper Palatinate. But it is believed the good News we have lately received of the happy Success of the English and Dutch Forces and Fleet at Vigo, will rather induce him to think of entering into other Measures; as well as encourage the Circles of Suabia and Franconia, which are now assembled at Heilbronn, to take such vigorous Resolutions, as may tend to the Advancement of the Common Cause.

**Cologne, Nov. 24.** The Bishop of Raab is returned hither from Dusseldorp, where a great Council of War has been held, wherein he was present. The Town of Ben is in a manner blockt up by the Dutch, and other Forces quartered at Brust, Andernath, Lintz, Sibowg, Lechnick, and the neighbouring Villages, who search all the Boats that go up the Rhine, and stop such as they find are designed for Ser, especially if they
