Lublin, July 14. N. S.

HE General Dier of Poland, which met here the 19th of the left Month, broke up the 11th Instant, having come to the following Resolutions; That the Army of the Grown shall be augmented to 36000, and that of Lithuaniz to 12000 Men; That for discharging the old Arrears due to the Army, a certain Poll-Tax shall be raised; And for satisfying the King of Prussia's Pretentions upon Elbing, a Tax of two Dollars shall be laid on every Mill throughout the Kingdom; That the Republick will expect during 6 weeks the King of Sweden's final Answer, whether he is for War or Peace; That the Princes of the House of Sapieba be declared Rebels; However, if they come in within 6 weeks, and make their Submission to the King, they have hopes of obtaining, as a favour, some part of their Estares, and some Offices, but all besides is taken away from them; That none shall presume to propose or mention the Dethroning of their King; That in case Sweden will not accept of reasonable Terms of Peace, but that the War must be continued, his Majesty shall have free Liberty to enter into Alliance with what Princes and States he shall think sit; And that when the present Troubles are somewhat composed, his Majesty shall be allowed to go to his own Hereditary Dominions as often as he shall rink it necessary, without expecting any sarther Consent of the Republick. This Sessions being thus concluded, with the general farisfaction of every one, Te Deam was sung in the Jesuir's Church, in the Presence of the King and all the Senators, the Bells ringing, and a Discarge was made of the Artillery round the Town. The Senate is to meet in few days, to consider of the Methods of putting the Resolutions of the Diet in execution. We have Advice from Majevy, That the Czar has put the whole Gulf of Finland under Contribution, and was preparing to go to Sea with a great number of small Vessels that were got together near the Nyen-Selams, but upon what Delign was yet unknowh.

Dantziek, July 21. The Swedish General Steinbesh is still her

great number of small Vessels that were got together near the Nyen-Schans, but upon what Delign was yet unknown.

Dantzick, July 21. The Swedish General Steinboch is still here, and our Senate has appointed Deputies to confer with him upon the Demands which the King his Master makes upon this City. The Swedish Army is yet encamped before Treorn, and they have got together great quantities of Provisions and Forage, as if they intended to remain there a considerable time: The King of Sweden intends, as is said, to continue during the next Winter at the Castle of Althussen, not far from Theorn, and has already given Orders for its being fortified. There are Letters from Warsaw which say, that a Body of 3000 Men of the Forces of Poland and Lithuana had met near a Place called Segarez, within 5 Leagues of Piecko, with a Body of Swedish Troops, by whom they were dereated and obliged to retire. We hear the Garison of Nerva has lately been considerably reinforced, and supplyed with Provisions for a Twelve-month, and with all other Necessaries for making a vigorous and a long Defence, in case they should be attacked by the Newton Scholer.

Nema, July 13. General Schlick arrived here two days ago; The Body of Forces which was under his Command is separated, part of them being less on the Frontiers of Upper Advira.

Nema, July 13. General Schlick arrived here two days ago; The Body of Forces which was under his Command of the Count de Solari; This General was advanced on the 14th Instant as far as Hundfurth, and maying received Advice there from Major-Gen. Chant Guttenseyn, (who is posted on the Mountain of Branner to secure the Lug Pais) That the Elector of Branner to secure the Lug Pais) That the Elector of Branner to secure the Lug Pais) That the Elector of Branner to secure the Lug Pais) That the Elector of Branner to secure the Lug Pais) That the Elector of Branner to secure the Lug Pais) That the Count all granders, with Orders to march in this manner day and night till they have joined the Count de Guttensen, and t

by the way of Belune, Feltre, and Vicenza, within two or three days March of the Imperial Army, and that 2000 more were shortly expected with General Vaubonne, so that in a little time the Imperial Horie will be more than a Match for the French Cavalry. The Duke of Vendosme was marched from the Veronese with the Body of French Forces under his Command into the Dutchy of Mantus, and was advanced toward Smi Benedetto, by which it was judged that he intended to attack the Town of Mirandola, and afterwards to try his Fortune against Ostiglia on that tide of the Po. A Courier arrived here this morning from Prince Lewis of Baden's Camp at Haussheim, with some intercepted Letters from the Marshal de Villars to the Elector of Bavaria, by which (it is said) a Discovery has been made of some Matters of great Importance. We hear the Elector of Bavaria has taken the Castles of Eirenberg and Reita in Tirol.

Francsort, July 25. The French Forces commanded by the Duke of Burgundy continue on the other lide of the Rkins, with intent to force the Imperial Lines on one fide, while their Troops which are now at Fort Louis shall pass the Rkins and attack them on the other: This is what they give out; but it is believed they have no farther Design than to alarm General Thungen, and

Louis shall pass the Reins and attack them on the other: This is what they give out; but it is believed they have no farther Design than to alarm General Thungen, and hinder the sending of Reinforcements to Prince Lemis of Baden; However, left the Enemy should have a Design upon Friburg, two Regiments of Foot have been fent thither to reinforce that Garison. Our Letters from the Imperial Camp under Prince Lemis contradict the Report we have had of his having passed the Danube; but say, he had ordered a Bridge of Boats to be laid over that River, in order to pass it, as soon as he shall have been joined by the King of Prassin's Forces, which are marching towards his Camp with all possible diligence. The Troops of Westphalia are likewise continuing their March, part of them being (as is said) to join his Highness, and the rest to reinstorce General Thungen. The Marshal de Villars continues in his Intrenchments, which are at so little distance from Imperial Army, that Skirmishes happen daily between the General Thingen. The Marshal de Villars continues in his Intrenchments, which are at so little distance from Imperial Army, that Skirmishes happen daily between the Outguards of both Armies. Great numbers of Deserters are come over from the Enemy to the Imperial Camp, who say, the French Soldiers are very tickly, insometis that no less than 4 or 5 Wagons lader with dead Bodies are daily sent out of their Camp, in order to their being buried. Letters from Ratisbome say, that Advice being come thither that General Austra, who commands a Body of Imperial Forces in the Upper Falatinate, had taken the Town of Chain, and was putting the neighbouring Country under Contribution, most of the Bavarian Forces which lay in and near Ratisbome were marched that way, to endeavour to put a stop to his Excursions.

Calagne, July 27. We hear Preparations are making at West for the bomburding of the Town of Gedder. Several Persons at Ben, who held a Correspondence with the Enemy, have lately ocen discovered, and a great number of Arms have been sound, which were concealed in several private Houses in that Town. Two Boats going lately up the Rhine laden with Powder and other Ammunition, which were sent from Helland to Meeza, a French Parry of 30 Men seized the Horses, but midled their Design on the Boats, which estaged by carting the Rope, and so the Current carried them said to Links. Upon Advices here d, a Parry of our Troops that was appointed to convoy them coming up, killed several of the Enemy, and took two of them Prisoners.

Mairchall, July 25. The Durch Mall of the 23d In-th. 16, 17, 0. 3. came in face this right, which brings Advice, That on the 21th the Grand Army commanded by his Grace the Dulie of Mathorough, was joined by the Fires and the Dulie of Mathorough, was joined by the Fires and the Dulie of Mathorough, was joined by the Fires and the Left at Thirtie, them whence they would continue their March the 23d towards Uniter and Castel. The Letters from Germany say, the Bivarians had been repelled with Life in feveral new Attempts they had mid: to force the Passes of the Monaram of Brenner; and that the Country People in Tirol have talk in from the Enemy ine Castle of Scharnett, a strong state near Inspiruck, which secured their Communication with Bayeria: Some Advices add, that they have also receive defrom the Bayarians the Castle of Rothemberg. The Imperial and the French Armies of the Danube continued in the same Camps; as did likewise the Army under the Duke of Burgundy: Gene-Thungen had been joined by the Forces of Westphalia.
