him. / fd d in Water He Enemy has not yet gained one Foot of Ground of us; it feems that they intend to Lodge themselves towards the Sea-fide to prevent our Sallies; but the Ground there being very hard they will find it difficult to get Earth to filt their Gabions, which we shall be able to ruin ha little time from some Batteries we are raising for that purpose upon the Courtin and the North-Bastion. Some Demons Minessare hard at Work, in order, as we believe, either mis Minessare hard at Work, in order, as we believe, either mis Minessare hard at Work, in order, as we believe, either mis Minessare hard at Work, in order, as we believe, either mis Minessare hard at Work, in order, as we believe, either mis discover our Mines, or to undermine the Round-Tower; it has as to the first, it is hardly possible they should come as for their making a Mine under the Round-Tower; it speas impracticable, inner to do it they must dig above so speas impracticable, inner to do it they must dig above so speas impracticable, inner to do it they must dig above so speas impracticable, inner to do it they must dig above so speas impracticable, inner to do it they must dig above so speas another. Work much fironger than that upon the Line, land it of Paces back wards, so that their lodging theristives then the Round-Tower would avail them little. They have now two Morrars out of which they throw Stones, that do no little damage; and in return, we ply them out of tour Morrars with Stones, which we are informed do them a great deal of michief; and in a Week's time we shall have 26 Sons and 4 Morrars all moutated, which is more than they have against us.

Girestar, Teb. 1: N.S. The Enemy has received a Reinfunction to the Siege.

Sall thinker, with 500 Dutch who were on Board the Transfer Sound on it is said the Duke of Anjou is coming in firing to the Siege.

The Sall thinker, with 500 Dutch who were on Board the Transfer Soundaron; too Barrels of Powder, and Clothes for the Garison. The Tyger will follow in 3 days with the Solders that were left fick b

made little or no progress in their Siege of Verue notwithstanding they have kept continually firing upon the Place, and have thrown in great quantities of Bombs and Stones; but these make more noise than they do hurt. They have made two large Breaches in the Bastions of St. Charles and St. Mary; bowever, it will be too dangerous for them to venture upon an Affault, by reason that the Garison has higherto removed the Rubbish every night, which makes the Breaches very steep and most difficult to mount. The Enemy feems to depend more upon his Works under-ground, and indeed his Miners are at present those only who can properly be said to carry on the Siege. Last Week our Miners set fire to two Fougades, in hopes to have destroyed one of the Enemies Galleries, but they were not deep enough; fince which they have made mother, that played the 10th at night with very good mother, that played the 10th at night with very good Success, and ruined the Enemies Callery on our Left, which was advanced as far as the Ditch: The Enemy had two Miners, and about 40 Workmen, smothered in this Gallery. Our Miners are in seatch of another Mine which the Enemy is making on our Right: If we can destroy that, it is believed the Town may hold out a Month longer. The last Week, the Count de la Roche, Governor of Verue, was wounded, as he was visiting the Works, and is very ill. His Royal Highheli goes daily into the Place, and gives his Orders;

and the Honour of fo brave a Defence may be jully attributed to him. On the oth instant one of our Bombs France P. Magazine of Powder and Bombs Bombs fer fire to a Magazine of Powder and Bombs in the Enemies Park for their Artillery, which killed them 6 Workmen, 3 or 4 Officers, and about 60 Sol diers. Mr. Hill, Her Majerly of Great Britain's Enewy-Extraordinary, has agreed upon a new Taxiff, or, Book of Rates, with this Court; whereby the Ducies to be paid for all English Manufactures are regulated; and those upon coarse Yorkshire Cloth, which is proper for Cloathing Soldiers, and the poorer fort of People, is very much abased; and the Impositions upon fugh Merchandizes as may be landed in our Duke's Deminions in order to be carried forward into other Dominions, in order to be carried forward into other parts of Italy, that were excellive, are also made very moderate; which may prove of very great Ad-

parts: of Italy, that twere excellive, are also made very inoderate; which may prove of very great Advantage to the English Trade.

**Placence: Jan. 20. ** Letters from Verue of the 12th instant say. That the Garison had sprung a Mine, and destroyed a considerable number of the Enemy; and that a great quantity of Snow is fallen, which puts the Besiegers to great Inconveniences.

Vicinat. Jan. 31. On the 27th instant the Empoor, reviewed the Regiment of Cultifiers of Hanover, which was then passing by this City in their march, towards Hangary! Two days after they were followed by the Regiment of Cultifiers of Gronstell; and we shortly expectra Regiment of Cultifiers of Gronstell; and we shortly expectra Regiments of Dragoons newly raised in Bavaria by General Fells, and some other. Regiments which are ordered to march the same ways. General Heister continues near Presbourg expecting his Reinforciment. In the mean time the Committioners appointed by the Emperor to consider of the posture of affairs in Hangary, and of the most proper means of putting lan, cod to those Troubles, are daily assembled, and invend in 3 or 4 days to dispatch Baron Szamai, and the two Hungarian Deputies, to the Archbishop of Colocza, with Luch an Answer to the Demands which the Malecontents made in June last; as will probably bring this Matter to a good Issue. Cardinal Grimani was on the 26th instant Sworn one of the Emperor's Council and it is thought he may be sent back to Rome, to manage the Emperor's Affairs at that Court, Count Lamberg, his limperial Majesty's Ambassadon there, having obtained leave to return liouae for some time upon his own private Affairs.

**Hague, Peb. 13. N. S. Sir David Mitchell having Source and to the Masters about which he came hither the came hither.

Hague, Peb. 13. N. S. Sir David Mitchell having finish'd the Matters about which he came hither, went from hence the 9th inffant to Rotterdam, together with the Earl of Albemarle, and the Count de Galash the Emperor's Envoy to Her Majesty of Great Britain, in order to Embark for England; but the Wind being contrary, they are returned hither. The States of Holland and Westfriseland came yesterday to a Resolution, That 2500 Land Forces should be employed on board their Fleet the next Summer; to which it is believed the other Provinces will give their Consent. The Council of State has resolved upon the following Disposition of their Forces the next Campagne, viz. 25000 Men along the Maese under the Command of Monsseur d'Auverquerque and General Salisch, 14 Battalions and 22 Squadrons in Flanders Commanded by Monsieur Spaar, and the rest of their Froops along the Moselle under Count Novelles and General Hompesch; the whole to be under the Discretion, and to follow the Orders, of his Grace the Dake of Marlborough, as there shall be occasion. The several Provinces having Ratified the Treaty lately concluded by his Grace the Duke of Marlborough at Berlin with the King of Prussia, the Marquis de Prie, Ambassador from the Duke of Savoy, who stayed here chiesty to see that Matter brought to a Conclusion. sion, intends to be going hence to morrow for Turin. The Prince Royal of Prussia having received an Express the 8th inftant from the King his Father, with Orders to return home, fet out from hence according ly the next morning in his way to Berlin. Our Advices from the Mofelle fay, The French Forces in those Parts continue to be frequently in Motion, and to make Preparations as if they had some Defigning to make Preparations as if they had some Defigning they have they write from Parts of the Sch. They hand: And they write from Paris of the 8th, That.
the Marshal de Villars fet our from thence the day
before, in order to put himself at the head of them. These Letters make mention of the Sieges of Verue and Gibraltar after such a manner, as gives reason to believe that they are raifed, or will be very thortly; the Discourse at the French Court, being, as they fay, That they are to be turned into Blockades.

Belfast, Jan. 29. This day came, in here a Ship belonging to this Port, which was taken on the 26th of the last Month by the Loreine, a French Privateer. The Enemy put on Board her 6 Frenchmen, a Danie, and one John Bevin, who was Master of the Kent-Prik of Buistol, taken some time before, and carried into Martinico, leaving with them 0.31/3 Mega and a Boy belonging to the Ship. On the 13th inflant, about 150 Leagues off of Cape Clear, the said John Bevin, by the help of these, 3 Men and Boy, and of the Dane, resourced the Ship from the French, and brought her safe in here 2 in 11 and 12 and 12 and 13 and 14 and 15 an
