Treasury Chambers,

30th May, 1958.

1. We ascertained the number of coins in each packet produced to us and that such number corresponded with the number which the officers of the Mint represented the packet to contain.

2. (a) From each of the twenty-one packets of gold coins we took two sovereigns, amounting altogether to forty-two sovereigns.

(b) We weighed separately each of the said sovereigns so taken and we ascertained that it was within the variation allowed under the Acts from the standard weight thereby prescribed and we found that such sovereigns were on the whole within such variation, being one thousandth part of an ounce (+0.001) above standard weight.

(c) We then melted such sovereigns into an ingot and assayed such ingot comparing it with the standard trial plate of gold produced by the Board of Trade, and we found that such ingot was within the variation allowed under the Acts from the standard fineness thereby prescribed, the amount of variation from standard fineness being minus twenty-six hundred-thousandth parts (-0.0026).

(d) We weighed in bulk the residue of the coins remaining in the packets of gold coins and we ascertained that they were on the whole within the variation from standard weight allowed under the Acts, being sixty-one thousandth parts of an ounce (+0.061) above standard weight.

(e) We then took from such residue five sovereigns and weighed and assayed them separately, and we found that such sovereigns weighed respectively the first 123.214 grains, the second 123.388 grains, the third 123.388 grains, the fourth 123.321 grains, and the fifth 123.323 grains, and that therefore the said sovereigns were respectively, the first sixty thousandth parts of a grain (-0.060) below, the second one hundred and fourteen thousandth parts of a grain (+0.114) above, the third one hundred and fourteen thousandth parts of a grain (+0.114) above, the fourth forty-seven thousandth parts of a
