

ness of such sovereigns respectively to be, the first, 916.48, the second 916.75, the third 916.94, the fourth 916.65, the fifth 916.64 and the sixth 916.63, and that therefore the first of such sovereigns was eighteen hundred-thousandth parts (-0.00018) below, the second nine hundred-thousandths parts (+0.00009) above, the third twenty-eight hundred-thousandth parts (+0.00028) above, the fourth one hundred-thousandth part (-0.00001) below, the fifth two hundred-thousandth parts (-0.00002) below and the sixth three hundred-thousandth parts (-0.00003) below standard fineness.

3. (a) We found that the silver coins in the said pyx weighed in all not more than twelve ounces troy.

(b) we weighed in bulk such silver coins and we ascertained that they were on the whole within the variation allowed under the Acts from the standard weight thereby prescribed, being one thousandth part of an ounce (+0.001) above standard weight.

(c) We then assayed such silver coins comparing them with the silver trial plate produced by the Board of Trade, and we found that they were on the whole within the variation allowed under the Acts from the standard fineness thereby prescribed, the amount of variation from standard fineness being plus two ten-thousandth parts (+0.0002).

4. (a) We found that the cupro-nickel coins in the said pyx weighed in all more than twelve ounces troy and we took one or more coins from each packet of cupro-nickel coins.

(b) We weighed each twelve ounces troy (at standard weight) of cupro-nickel coins so taken out and ascertained that the amount of its variation from standard weight was the amount recorded in respect thereof in the schedule hereto, and that each twelve ounces troy was therefore within the variation from standard weight allowed under the Acts.

(c) We then assayed separately cupro-nickel coins weighing in all twelve ounces troy (at standard weight) comparing them with the copper trial plate and the nickel trial plate produced by the Board of Trade, and we found that the coins assayed were on the whole within the variation allowed under the Acts from the standard composition thereby prescribed, the amounts of variation from standard composition being minus one tenth of one per centum (-0.1%) of copper and minus one tenth of one per centum (-0.1%) of nickel.

(d) We weighed in bulk the residue of the coins remaining in the packets of cupro-nickel coins and we ascertained that they were on the whole within the variation from standard weight allowed under the Acts, being eight ounces and six hundred and forty-nine thousandth parts of an ounce (+8.649) above standard weight.

Dated the 13th day of May 1959.

THE SCHEDULE

Nine weighings of twelve ounces troy showed variations of two, three, four, seven, seven, ten, eleven and fifteen thousandth parts of an ounce (+0.002, +0.003, +0.004, +0.007, +0.007, +0.010, +0.010, +0.011 and +0.015) respectively above standard weight.
