*Office Staff Employment Agencies: Charges and Salaries*

The operations of fee charging employment agencies and staff contracting undertakings have in recent years become an important feature of the labour market for office staff. This development is marked in the London area where there are a large number of agencies which fill vacancies for office staff and also in many cases provide the services of temporary staff.

With the growing use made of the services of agencies public interest in the level of fees charged has increased. Also the level of salaries paid to staff whose services are provided to other employers on a temporary basis has become a significant factor influencing the general level of pay for office staff.

Accordingly, in pursuance of their powers under section 2 (1) of the Prices and Incomes Act 1966, the Secretary of State for Economic Affairs and the Minister of Labour hereby refer to the National Board for Prices and Incomes for examination:

(a) the question of charges made by employment agencies and staff contracting undertakings in the area of the Greater London Council for filling vacancies for office staff and for providing the services of temporary office staff; and

(b) the question of remuneration paid by those employment agencies and staff contracting undertakings to such temporary staff.

22nd March 1968.

2. Use by the Licensee of emissions of class P3D or P3E on *any* frequency in this band shall be only with the prior written consent of the Postmaster General.

3. The following spot aeronautical frequencies must be avoided *whenever* this band is used:—144·0, 144·09, 144·18, 144·27, 144·36, 144·45, 144·54, 144·63, 144·72, 144·81 and 144·9 Mc/s.

B. The Symbols used to designate the classes of emission have the meanings assigned to them in the Telecommunication Convention. They are:—

*Amplitude Modulation*

- A3 Telephony, double sideband.
- A3A Telephony, single sideband, reduced carrier.
- A3H Telephony, single sideband, full carrier.
- A3J Telephony, single sideband, suppressed carrier.

*Frequency (or phase) Modulation*

- F3 Telephony.

*Pulse Modulation*

- P3D Telephony, amplitude modulated pulses.
- P3E Telephony, width (or duration) modulated pulses.

C. D.C. input power is the total direct current power input to (i) the anode circuit of the valve(s) or (ii) any other device energising the aerial.

D. As an alternative, for A3A and A3J single sideband types of emission, the power shall be determined by the peak envelope power (P.E.P.) under linear operation. The radio frequency output peak envelope power under linear operation shall be limited to 2·667 times the D.C. input power appropriate to the frequency band concerned. This column gives the maximum power determined by this method which may be used.
