Vienna, Fuly 10. N. S.

Everal Deputies of the Electors and Princes of the Empire to the Diet of Ratisbon, have fignified to the Imperial Court their Sentiments as to the Necellity of appointing a Deputation from the Diet, to affift in the Name of the Empire at the enfuing Treaty of Peace, whenever the Negotiations shall be reassumed. This Matter has not as yet been under publick Delibera-This Matter has not as yet been under publick Delibera-tion in the Diet, the Emperor not having thought fit to propose it; however, seeing many of the Deputies press warmly for it. 'tis thought Cardinal Lamberg, who went from hence two days ago, is instructed to signific to she Diet his Imperial Majesty's Pleasure in this Matter. He carries also with him Orders to propose to the Diet, the infalling of the Elector of Brunswick-Lunenburg in the Office of Arch-Treasurer of the Empire, which is annexed to the eighth Electorate, and was lately possessed by the Elector-Palatine, 'till he was restored to his ancient Rank and Office among the Electors. The last Letters from Silefia bring Advice, that the Primate of Poland, and others of the Nobility of that Kingdom, who have been holding Conferences together for some time past at Troppaw, was gone to wait on King Augustus in Saxony. Mareschal Heister is pursuing the Hungarian Parties on this fide the Danube from Place, to Place, and is endeavouring to fettle a Frontier along the River Raab, in order to cover Austria and Stiria from the Incursions of the Enemy. The Courier whom Mareschal Taun dispatched from Turin on the twenty seventh of the last Month, to acquaint the Emperor with the Duke of Savoy's Demands before his Royal Highness takes the Field in Person, as to be feat back immediately, with Orders to the Mareschal on that Subject.

Berne, July 13. N.S. The Roman Catholick Cantons having lately appeared willing to put the Affair of Tockenbourg to an Arbitration, it is hoped that Dispute will end in favour of the Inhabitants of that County. Letters from Turin advise, that all the Troops which were to join his Royal Highness the Duke of Savoy are come up, and encamped in separate Bodies in the Neighbourhood of Oulx, Exiles, Chaumont, Suía, and Saluces. We hear from Lyons, that the Duke de Roquelaure and Monsieur de Baville, Intendant of the Province of Languedoc, were at Antenac with a Body of Troops, to prevent the People of the Cevennes from joining those of the Vivirez. They add, that there has been an Eugagement in those Parts, between the Inhabitants and the King's Troops, of which Affair they give the following Account. Monsieur de Massillan having received Intelligence, that the People who had taken up Arms committed great Disorders in all Parts which refused to declare for them, placed himself at the Head of some Companies of the Regiment of Hessy, two Independent Companies, and a Body of Militia, commanded by several Gentlemen of the Neighbourhood, with a Design to attack the Male-contents; but the Cevennois who were in Arms, upon advice of their March, posted a considerable Bodyar Rampon near Pouline, and with another Detachment lined the Thickets through which he was to pass at the Foot of the Mountain; a third Party was ordered to advance and meet the Forces commanded by Morfieur of The lan, who accordingly came in view of his Party. The Troops for the King charged the Malecontents with great Vieur, who retired before them in feeming Diforder, to last the minio the Ambuscade. When they had retrea ed as far as was convenient for their delign, the King's Troops were immediately attacked in Front and Rear, and each Flank, upon which there followed to great a Shugher, that they foon threvy down their Arms, or

betook themselves to Flight. Great numbers of the Militia were killed on the Spot, as well as their chief Com-manders, and Monsieur de Massillan himself. These Advices add, that the Malecontents confisted of eighteen hundred Men, and that they drew great numbers into their Lists, by pretending that they took up Arms for the Service of the Allies, from whence they expected a Support. They fay further from Geneva, that though the French King had offered them a General Pardon, the Roman Catholicks as well as the Proteflants refused to lay down their Arms; the one Party demanding a Liberty of Conscience, the other an Exemption from Taxes. It is also advised, that fix Companies of the Regiment of Guerci, which were defigued for the Service in the Vivarez, having been embarked on the River Hero, in order to fall down to Valence, were all drowned, except four Officers and three Boatmen.

From the Camp before Tournay, July 22. N. S. On Saturday our Battery began to Fire upon the Wall of the Town, between the Cittadel and the Schelde, as they did Yesterday Morning at General Schullenburg's Attack ; they have already made such considerable Breaches at both Places, that all things will be in a readiness for a general Affault upon the Town within two Days, if the Bra god do not think fit to Capitulate in the mean time. We contime to work by Sap at the Attack, and our Men are lodged within lefs than fourfcore Paces of the Wall between the Cittadel and the Upper-Schelde. The Enemy made a Sally on that fide on the twentieth at Night, and at first put our Workmen in some Disorder, but were immediately repulfed by our Troops that were appointed to cover them, and our Men complexed their intended Work. The Enemies Army continues in their former Poss; and though they take great Precautions to prevent Desertion, three Days ago two hundred Troopers took the Opportunity of a general Forage to Desert, and came in a Body to Liste, where they Sold their Horses. Yesterday, early in the Morning, Lieutenant-General Withers, being in the Trenches, received a Contusion with a small

Shot in his Breaft, but it did him very little harm.

From the Camp before Tournay, July 25. N. S. The Befieged liaving found Means, by the help of their Sluices. to let a greater quantity of Water into the Ditch of the Town, will retard our giving the affault to foon as was intended. In carrying on our Approaches to the Citta-del we have discovered one of the Enemy's Mines; and taken out the Powder; and our Pioncers are at Work in bringing the Lines of Circumvalation into a narrower Compais, to cover the Troops that shall be employed in that Attack when the Town is taken. The Mareschal de Villars being joined by a Detachment of fourteen Battalions and twenty two Squadrons from Germany, is now encamped with the Army under his Command be-tween Douay and Valenciennes, with the Scarpe before, and the Schelde behind him. The Marcfchal had his Quarters last Night at Anchiu, and has taken them to day at Denain, near Valenciennes: He has fummoned in great numbers of Pioneers to make new Lines to cover the Country on that fide; those of La Bassec and Lens are covered by Monsieur de Darragan, with the Detachment he had at Essires, and the Militia of Picardy and the Boulonnois are likewise ordered thither. Upon this Motion of the Enemy's Army, a Brigade of Foot is ordered to march to Morrow, and encamp between the Village of Sr. Maure and St. Amand, where four hundred

Men more are fent to reinforce that Garrison.

Hague, July 23. N. S. The States of Holland, after a long Debate, have unanimoutly contented to the Naturalization or Foreign Protestants, and a Proclamation will accordingly be published on the 26th Instant. They write from Brabant, that they have lately discovered a delign to
