Hull, Aug. 22.

Several ships are daily passing to and from these Seas upon the account of the Ordinary Trade. From *Birdlington Key* we are told, that a Dutch man of War of 30 Guns was four dayes since at Anchor in that Bay, and had under his Convoy a great Fleet of Busses which were then fishing within View of *Flamborough-head*.

*Pendennis, Aug. 22.* This last week came in here two ships from *Virginia* laden with Tobacco, and Bound for *London*, which put out again yesterday to sea on their way homewards.

*Wmbstadt, Aug. .* On Sunday last publick prayers were made in all the Churches of the Palatinate for the young Prince *Charles* his success and happiness in his intended Travels, who is since with a Train only of twelve persons upon his way towards *Basle*, intending to take *Geneva* on his way for *France*, from whence he intends for *England*, and after a view of these Countreys, to pass into *Denmark* in order to a Marriage designed between him and a Sister to the present King of *Denmark*.

*Legorn, Aug. 18.* The 13th instant arrived here a Bark from *Argiers* with several English Officers and Mariners which have been lately redeemed, some days before the departure of this Bark from *Argiers*, Sir *Thomas Allen* passed before that Port with Seven Fregats sailing to the Westwards: they inform us, that the Seven *Argier* men of war which engaged with the *Alvice* and *Guernsey*, were the stoutest and most considerable ships belonging to that place, all of them doubly manned, and were designed to attempt upon the Genouese Convoy returning from *Spain*: the Turks are said to be there fitting out a considerable Fleet, and were launching Six new ships from the stocks.

A Dutch ship and a French Bark arrived from *Tripoly* in *Barbary*, laden with prize *Currants*, inform us, that these Corsairs are fitting up their ships, and may put to sea by the end of this month.

*Genoua, Aug. 20.* Two days since arrived here this States Convoy in a month from *Cadix*, in 22 days from *Cartagena*, and 16 from *Alecant*, consisting of Two men of war and Three Merchant ships, having on board them about Two Millions in money and Goods, upon the account of the Genoueses only; this has encouraged them to give order for the sending back another Convoy, consisting of one man of war only, viz. their Vice-Admiral and Three Merchant ships which may be ready to put to sea about the end of the next month.

By this late arrived Convoy we are told, that Sir *Thomas Allen* had passed from *Argiers* to *Alecant*, and intended from thence towards *Cadix* to joyne with Sir *Edward Sprage* and Sir *John Hurman*, with resolution in consort to attempt somewhat upon the Corsairs.

From *Milan* we are told, that the Duke *d'Osuna* had lately taken a view of all the Cavalry which was there drawn together to a general Rendezvous, where Don *Junico di Velandis* took possession of his charge of General of the Horse, lately conferred on him by the Queen Regent of *Spain*, in the room of

the Marquis *Spinola*, who is now set forwards on his Extraordinary Emba y to the Imperial Court at *Vienna*; the number of the Cavalry was about 2000 all of them well horsed and in a good equipage: a review has been also taken of all the Foot, as well the Spanish Regiments as those of other nations, near the places allotted them for their Quarters.

*Vienna, Aug. 20.* Their Imperial Majesties had lately resolved to have removed to *Ebersdorf* and from thence to *Neustadt*, for their diversions, but have since thought fit to put off this journey till the 4th of *September*.

The Jews being banisht from this place, it has been thought convenient to convert their Synagogue into a Church, which has been accordingly consecrated by the Bishop of this place, and dedicated to *St Leopold*, where their Imperial Majesties were pleased to be present on Monday last, at the celebration of the first Mass, which was performed with not then ordinary Solemnity.

We have here a confident report that the Fort of *...* which is the last or at least the most considerable, which resisted the Imperial Army in *...* has submitted. We had here as concerning a report that the Princes of *Moldavia, Wallachia* and others were reviewing their forces, which if true, we cannot be perswaded that they intended to make any opposition to the Emperors Army, which with the addition of the Recruits lately sent them is very numerous. The several Regiments of Foot are quartered as followeth; The Marquis *de Grana's* Regiment at *Cassovia*, the Count *Lestlyes* at *Eperies*, *St Andre* and *Saros*; the Count *de Staremberg's* at *Tokay* and *Patak*; the Marquis *de Baden's* at *Essck*, and the places adjoining; the Regiment *de Strasoldo* at *Zatmar*, all these in the *Upper Hungary*, where are also quartered the two Regiments of Horse viz. *Holfsteins*, and *Dunewald's*; the Regiment *de Souches* at *Leopoldstadt*; another Regiment at *Raab*; the Count of *Porcia's* at *Trenchin*, *Rosenberg*, and *Neusol*; The Baron *Kaisersteins*, in the Isle of *Serini*; the Baron *Knie's* at *Clogau*; *de Kops* at *Prage* and *Eger*; and the Marquis *de Pio's* in *Austria*, and several Regiments of Horse distributed proportionably to quarter with or near them.

*Hambourg, Aug. 22.* The Prince Palatine, son to his Electoral Highness, is lately arrived at *Basle* in *Switzerland* in order to his travels into *France* and other places, and though *incognito*, was attended and complimented by the Magistrates, and presented with Wine and Fish according to their custome of receiving Great Princes; after two or three days stay, he went thence with a Guard of two Troops of Cavalry, having been saluted by all the Great Guns about the Town, and arrived the 12th instant at *Zurick*.

The Duke of *Neubourg* being about the same time at *Etterhausen*, within a League of *Ratisbonne*, with his Dutchess, was pleased to invite and entertain all the Plenipotentiaries from the Princes of *Germany* there assembled, at a Treat made them in the Field in the midst of their hunting, with which he diverted them, and since was pleased to give a visit to the Prince and Bishop of *Aichstadt*, the Empe
