## OFFICE OF TELECOMMUNICATIONS

Notice under section 12 of the Telecommunications Act 1984 ("the Act") of the intention of the Director General of Telecommunications ("the Director") to modify Condition 13 of Schedule 1 to the Licence granted to Cabletel Communications Limited ("the Licensee") under section 7 of the Act on 24th September 1985 to run telecommunication systems in the broadband cable franchise of Ealing ("the Licence")

The Director proposes, in accordance with section 12(1) of the Act to modify Condition 13 of Schedule 1 to the licence. The effect of the modification would be to downgrade the technical requirements of the Applicable Cabled Systems so that, unless subsequently otherwise required by the Director or specified by the Licensee, the Licensee would no longer be required to install, keep installed and run, the Applicable Cabled Systems in such a manner that:

- (a) a customer may independently select two or more of the channels provided by the Applicable Cabled Systems by means of apparatus located outside his premises and secure that the selected channels are conveyed simultaneously to his premises;
- (b) data services (of the kind described in section 4(1)(c) of the Act) can be provided to all customers who request them;
- (c) a customer may simultaneously send and receive video signals between his premises and another point within the Licensed Area (which point may be a point of connection between the Applicable Cabled Systems and a public telecommunication system run by British Telecommunications plc or Mercury Communications Limited);
- (d) a customer may use apparatus approved for connection to the Applicable Cabled Systems to send and receive data signals at a rate of 64k bits per second and have access for this purpose via the Applicable Cabled Systems to a public telecommunication system run by British Telecommunications plc or Mercury Communications Limited.

2. The Licensee would be required to install, keep installed and run, the Applicable Cabled System so that they are capable of providing:

- (a) up to 32 downstream television channels in PAL-I format (or the equivalent thereof);
- (b) up to 20 downstream FM radio channels (or the equivalent thereof); and
- (c) an upstream capacity of at least 1 video channel with associated sound capability.

3. In consequence of such downgrading of the technical requirements, provision would at the same time be made for the Licence effectively to expire after a period of fifteen years from the date specified for the purpose of the Licence by the Secretary of State for Trade and Industry, instead of the present twenty-three years, unless before the expiry of that period of fifteen years the technical requirements of the Applicable Cabled Systems were upgraded to provide the capabilities referred to in sub-paragraphs (a)-(d) above. This would be done by specifying a Modification Date (14th May 2001) by which that upgrading must be carried out, failing which the Licensee would be in contravention of Condition 13 of Schedule 1 to the Licence.

4. The reason why the Director proposes to make the modifications referred to above is to allow the Licensee to implement its revised intentions for the development of the Applicable Cabled Systems.

5. Representations or objections with respect to the proposed modifications may be made to the Director by 29th March 1991, and should be addressed to T. A. Single at the Office of Telecommunications, Room 205, Export House, 50 Ludgate Hill, London EC4M 7JJ (tel. 071-822 1697). The full text of the proposed modified Condition 13 of Schedule 1 to the Licence is available on application to the same address. (16 SI)
