#### NATIONAL RIVERS AUTHORITY—SOUTHERN REGION

##### DARWELL RESERVOIR ENLARGEMENT

##### *Note to accompany applications for new licences and to vary existing licences to abstract and impound water*

Southern Water Services Ltd. and the Eastbourne Water Company have a need to develop new water resources to meet the growing demand for water in their respective demand areas. The enlargement of Darwell Reservoir from its present storage volume of about 4,500,000 cubic metres to over 20,000,000 cubic metres, has been recognised for many years as the preferred means of meeting the future needs of customers in the areas served.

The enlargement of the reservoir is a joint scheme being promoted by both companies, and these applications to vary abstraction licences are part of this promotion process which includes applications for planning permission and the necessary statutory powers to construct the new reservoir.

Increased quantities of water need to be abstracted from the River Rother at Robertsbridge under licence 9/40/6/162 to fill the enlarged reservoir, but the residual flow conditions specified will protect the

needs of other water users. In particular, the larger volume of storage available will enable releases to be made to the river during the summer months to maintain river flows, so improving conditions at this critical time.

As the reservoir has a small natural catchment that contributes to the resources available, abstraction licences are also needed for the abstraction into supply from the reservoir itself. The application to vary licence No. 9/40/6/163s relates to the abstraction from the reservoir by Southern Water Services Ltd. The Eastbourne Water Company are making a separate but parallel application for a new licence to abstract from the same reservoir to supply the area that they serve. They are also seeking to vary their existing licence No. 10/41/120302 permitting abstraction from the Wallers Haven at Boreham Bridge, so that the Darwell water can be used conjunctively with this other source.

In addition, several applications for impoundment licences have to be made to cover the main reservoir embankment and ancillary works. These include the raising of river water levels slightly at Robertsbridge to improve the hydraulic characteristics of the intake, the construction of two small gauging weirs on the Darwell Stream to measure flows downstream of the dam, and a small sub impoundment within the main reservoir to retain water under drawdown conditions.

Both companies are very conscious of the requirements of the Water Act 1989 and the need to conserve and enhance natural beauty as part of schemes of this type. Comprehensive environmental studies have been completed and an environmental statement is being submitted to the local planning authority as part of the application for planning permission for the scheme.

The licence applications are divided into three sections. First those which are being applied for jointly by the two promoting companies; these relate to the construction of the reservoir and the abstraction of the water needed to fill it. Secondly, the application by Southern Water Services Ltd. to increase abstraction for public supply is described, and thirdly the applications by the Eastbourne Water Company to abstract from the new reservoir and vary their licence at Boreham Bridge are itemised.

*Notice of application for new licences and to vary existing licences to abstract and impound water*

Notice is hereby given that an application is being made to the National Rivers Authority, Southern Region, by Southern Water Services Ltd., Lewes Road, Falmer, Brighton, East Sussex, and by the Eastbourne Water Company, 14 Upperton Road, Eastbourne, East Sussex, for a variation of an existing abstraction licence, and for new licences to impound water as detailed in the following schedule:

*Schedule Item 1*

Variation to the existing licence No. 9/40/6/162 permitting abstraction from the River Rother at Robertsbridge (Grid Ref. TQ 743240) to fill Darwell Reservoir.

The variation applied for is to increase the authorised quantities to 28,000,000 cubic metres per annum, 125,000 cubic metres per day, 10,000 cubic metres per hour.

The abstraction would be subject to residual flows and maintained flows in the River Rother as follows:

- From 1st October until the total volume abstracted exceeds 4,091,000 cubic metres: no abstraction would take place to reduce the flow measured at a weir at Robertsbridge (Grid Ref. TQ 743240) to less than 4,546 cubic metres per day.
- From 1st October to 31st March when the total volume abstracted in exceeds 4,091,000 cubic metres: no abstraction would take place to reduce the flow measured at a weir at Udiam (Grid Ref. TQ 773245) to less than 13,200 cubic metres per day.
- From 1st April to 30th September: no abstraction would take place to reduce the flow measured at a weir at Udiam (Grid Ref. TQ 773245) to less than 26,400 cubic metres per day. In addition, releases will be made from the reservoir to ensure that the flow at Udiam shall not be less than 26,400 cubic metres per day.

The licence would also be changed to a combined licence (impound and abstract) to allow the reconstruction of the measuring weir at Robertsbridge to impound water at the intake, raising water levels in the channel by 0.3 metres.

*Schedule Item 2*

Application for a licence to impound water at Darwell Reservoir, to complement the powers granted under the Hastings Corporation (General powers) Act 1937.

The licence applied for is to impound the Darwell Stream at Tunstall Farm (Grid Ref. TQ 722213) for the purpose of abstracting water for public supply. The reservoir overflow level is to be raised 13.2 metres to 53.3 metres AOD, and this will provide a total storage volume of 20,700 millilitres.

*Schedule Item 3*

Application for a licence to obstruct the Darwell Stream for the purpose of measuring flows (upstream site).

The licence applied for is to obstruct the Darwell Stream downstream of Coal Bridge (Grid Ref. TQ 724215) for the purpose of constructing a gauging weir that will allow stream flows to be measured.

*Schedule Item 4*

Application for a licence to obstruct the Darwell Stream for the purpose of measuring flows (downstream site).

The licence applied for is to obstruct the Darwell Stream at a point north of Bottonhold Wood (Grid Ref. TQ 728217) for the purpose of constructing a gauging weir that will allow stream flows to be measured.

*Schedule Item 5*

Application for a licence to construct a small impoundment within the larger Darwell Reservoir to retain water levels in an environmental protection area under drawdown conditions.

The licence applied for is to impound a side tributary of the Darwell Stream known as Hogtrough Shaw at a point within the enlarged reservoir at Grid Ref. TQ 715203. Water level in the impoundment would be retained at 53.0 metres AOD when the main reservoir was drawn down to encourage the growth of aquatic plants.

A copy of each application and of any map, plans or other documents submitted with them may be inspected, free of charge, at the offices of Rother District Council, The Watch Oak, Battle, East Sussex TN33 0LN, at all reasonable hours during the period beginning on 26th August 1991, and ending on 22nd September 1991.
