NATIONAL RIVERS AUTHORITY

Water Resources Act 1991—Schedule 10

Notice of application for consent for the purposes of section 88

Notice is hereby given in accordance with Schedule 10 of the above Act that an application has been made to the National Rivers Authority by ARC Limited, for consent to progressively discharge up to 4,800 cubic metres per day of trade effluent consisting of pumped void water generated from rainfall events over Drybrook Quarry, Drybrook, Gloucestershire GL17 9BT, to a tributary of the Cinderford Brook at National Grid Reference SO64371789.

The Authority will make an agreement with the Company to limit the discharge at such times when the downstream river conditions may produce flooding and it should ensure that the discharge will not exacerbate any flooding that may occur in the future in this location. If consent is granted it will enable the company to empty the void water (which is rainfall related and not derived from a breach of groundwater levels) and facilitate ongoing mineral working of the site.

Any person who wishes to make representations about the application should do so in writing to the Area Consents Officer at the Authority's offices at Riversmeet House, Newtown Industrial Estate, Northway Lane, Tewkesbury, Gloucestershire GL20 8JG, during the period 10th April 1995 to 22nd May 1995, quoting reference CP/LS/60077.

A copy of the application may be inspected, free of charge, at all reasonable hours at the Site Office, ARC Southern, Drybrook Quarry, Drybrook, Gloucestershire GL17 9BT and at the Authority's offices at the above address.
