DEPARTMENT OF THE ENVIRONMENT

WATER INDUSTRY ACT 1991: SECTION 19(1)(b)

The purpose of this notice is to inform consumers in parts of Test Valley, Winchester and Salisbury who might be affected by improvement work being carried out by Cholderton and District Water Company Limited at its Thruxton Hill Water Treatment Works. The Company has found through its water quality monitoring programme that water supplied from works has on

occasion not met the standard, as required by the Water Supply (Water Quality) Regulations 1989, for pesticides, although the water has at all times been, and remains safe to drink. Consequently the Secretary of State for the Environment has notified the Company that he will carry out his duty under section 19 of the Water Industry Act 1991, and if necessary, order the Company to take appropriate steps to ensure that the water supplied will in future meet the required standard for pesticides.

The Company gave a legally binding agreement (called an undertaking) to carry out appropriate remedial work at Thruxton Hill Water Treatment Works to be completed by 31st March 1995, this agreement was given by the Company on 4th August 1994. However the Secretary of State subsequently considered that this agreement no longer contained the necessary steps for the Company to take to achieve compliance with the pesticides's standard and notified the Company of his intention to take further enforcement action. The Company therefore submitted another agreement on 8th March 1995, to carry out appropriate remedial work by 31st March 1996. The Secretary of State is satisfied that the Company is complying with this agreement and has informed the Company that he is satisfied by serving on them the notice printed below.

WATER INDUSTRY ACT 1991: SECTION 19(1)(b)

The Secretary of State for the Environment

1. Is satisfied that Cholderton and District Water Company Limited "the Company" in supplying water from its Thruxton Hill Water Treatment Works has contravened and is likely to do so again its duty to supply wholesome water under section 68(1)(a) of the Water Industry Act 1991, and the requirement of Regulation 3(3)(c) of the Water Supply (Water Quality) Regulations 1989, that water supplied should not contain pesticides at a greater concentration than 0.1µg/l.

2. Has notified Cholderton and District Water Company Limited that he is considering making in relation to the Company an enforcement Order under section 18 of the Water Industry Act 1991, because he was of the opinion that the Schedule of works in the undertaking given by the Company on 4th August 1994 (Ref. No. CH 001) could no longer be said to represent all the steps that would be appropriate for the Company to take in order to secure or facilitate compliance in its water supply zone.

3. Notes that Cholderton and District Water Company Limited has on 8th March 1995, given an undertaking under section 19(10)(b) of the Water Industry Act 1991, to take the following steps by the dates shown:

(a) Information to the National Rivers Authority: Provide NRA as the pollution control authority with full information about

all the samples as treated water, taken in accordance with the Water Supply (Water Quality) Regulations 1989, and untreated water, where available, (relevant to the zones supplied by Thrupton Hill Water Treatment Works) taken and analysed for pesticides so that pollution control measures can be considered. This information to include details of location and time of sample, the pesticides investigated and the analytical results and, where appropriate the date of abstraction. To continue for the duration of the undertaking. The information to be provided quarterly, within 28 days of the end of the quarter or, in the case of a marked increase in concentration or the identification of a pesticide not previously present, as far as reasonably practicable, within 28 days of the sample being taken.

(b) If pesticide concentration approaches or exceeds advisory value specified on pages 99 to 105 of "Guidance on Safeguarding the Quality of Public supplies 1989" or notified by DWI:

(i) Provide DWI with information specified in (a), as soon as analytical results available, and so far as reasonably practicable, not more than 28 days of the sample being taken.

(ii) Notify the NRA as in (a), as soon as analytical results available, and so far as is practicable, not more than 28 days of the sample being taken.

(iii) Carry out further sampling and, if investigations show that pollution is of a long standing nature, consider the temporary provision of an alternative supply of potable water. To be completed as necessary.

(c) Monitor the concentrations of those pesticides which have infringed the standards at the increased frequency set out in the Water Supply (Water Quality) Regulations 1989, to determine whether problems are transient. To be completed by 31st December 1995.

(d) Review the data at the end of the monitoring period and assess the need for treatment plant or other appropriate remedial action. To be completed by 31st January 1996.

(e) If a need for treatment or other appropriate remedial action is established, submit a further undertaking, detailing the remedial work necessary. To be completed by 31st March 1996.

4. Is satisfied that Cholderton and District Water Company Limited has given and is complying with an undertaking to take all such steps as appear to the Secretary of State for the time being to be appropriate to secure or facilitate compliance with the requirement of Regulation 3(3)(c) of the Water Supply (Water Quality) Regulations 1989.
