

| Product Licence Number | Company Name | Product Name | Active Ingredients | Indications | Date of Authorisation |
|------------------------|--|--|--|---|-----------------------|
| 00034/0328 | E. R. Squibb & Sons Limited | Staril Tablets 10 mg | Fosinopril Sodium HSE 10 mg | The treatment of heart failure in combination with a diuretic, improving symptoms and exercise tolerance, reducing severity of heart failure and decreasing the frequency of hospitalisation for heart failure. Prescription Only Medicine | 23rd March 1995 |
| 00039/0480 | Evans Medical Limited | Evans Beclomethasone Dipropionate Inhaler 50 µg | Beclomethasone Dipropionate BP (as Propellant 11 Solvate) HSE 50 µg | (i) Treatment of patients whose asthma is becoming worse, and the relief provided by bronchodilators is less effective. (ii) Patients with severe asthma who are dependent on systemic corticosteroids or adrenocorticotrophic hormone (ACTH) or its synthetic equivalent. (iii) Patients who are inadequately controlled by sodium cromoglycate in addition to bronchodilators. (iv) Particularly important for managing severe asthma in children because good control can be achieved without retardation of growth. Prescription Only Medicine See FL/00039/0480. | 30th March 1995 |
| 00039/0481 | Evans Medical Limited | Evans Beclomethasone Dipropionate Inhaler 100 µg | Beclomethasone Dipropionate BP (as Propellant 11 Solvate) HSE 100 µg | Prescription Only Medicine | 30th March 1995 |
| 00039/0482 | Evans Medical Limited | Evans Beclomethasone Dipropionate Inhaler 250 µg | Beclomethasone Dipropionate BP (as Propellant 11 Solvate) HSE 250 µg | (i) For those asthmatic patients who have been shown to require high doses (greater than 800-1,000 mcg daily) of beclomethasone dipropionate BP to control their symptoms. (ii) Also for patients whose asthma is no longer controlled by maximum maintenance doses of bronchodilators and Evans Beclomethasone Dipropionate Inhalers 50 µg or 100 µg. Some patients with severe asthma require oral corticosteroid therapy in addition to Evans Beclomethasone Dipropionate Inhalers 50 µg or 100 µg for the adequate control of their symptoms. Many of these patients may, on transfer to the 250 µg inhaler be able to reduce significantly or eliminate their requirement for additional oral corticosteroids. Prescription Only Medicine | 30th March 1995 |
| 00053/0250 | Schering Health Care Limited | Femodette 21 | Ethinylloestradiol EP 0.020 mg Gestodene HSE 0.075 mg | Oral contraception and the recognised gynaecological indications for such oestrogen-progestogen combinations. Prescription Only Medicine | 17th March 1995 |
| 00068/0165 | 3M Health Care Limited | Airmir Inhaler | Salbutamol Sulphate EP 120.0 µg | The management of bronchial asthma, for the relief of wheezing and shortness of breath used on an as required basis. May be used as necessary to relieve attacks of acute dyspnoea and may be used prophylactically before exertion or to prevent exercise-induced asthma. May also be used in the treatment of reversible airways obstruction associated with chronic bronchitis and emphysema. Prescription Only Medicine | 10th March 1995 |
| 00101/0387 | Sandoz Pharmaceuticals (UK) Limited (v/a Sandoz Pharmaceuticals) | Neoral Soft Gelatin Capsules 25 mg | Cyclosporin A HSE 25.00 mg | <i>Organ Transplantation</i> Prevention of graft rejection following kidney, liver, heart, combined heart-lung, lung or pancreas transplants. Treatment of transplant rejection in patients previously receiving other immunosuppressive agents. <i>Bone Marrow Transplantation</i> Prevention of graft rejection following bone marrow transplantation and prophylaxis of graft-versus-host disease (GVHD).
