WATER INDUSTRY ACT 1991: SECTION 19(1)(b)

Consumers in Southall and Stanwell (of North Surrey Water Limited) who may be affected by improvement work being carried out at Ashford Common and Kempton Park Water Treatment Works will wish to be aware of the following information.

Although the water has at all times been, and remains, safe to drink, the Company has found through its water quality monitoring programme that water received from these works, as a bulk supply from Thames Water Utilities, has on occasion not met the standard for pesticides (as required by the Water Supply (Water Quality) Regulations 1989). The Secretary of State, therefore, notified the Company that he will, if necessary, order it to take appropriate steps to ensure that the water supplied will in future meet the required standard.

The Company gave a legally binding undertaking on 16th June 1995, to monitor and facilitate progress of work to be carried out by Thames Water Utilities by 31st June 1996 at Ashford Common and 31st December 1996, at Kempton Park Water Treatment Works. However, for reasons beyond that Company's control the work at

Kempton Park was unable to be completed by the due date, and a new completion date of 31st March 1997 has been agreed. North Surrey Water have therefore given a new undertaking with a revised completion date of 31st March 1997. The due date for Ashford Common works is unaffected by these changes.

2. Notes that North Surrey Water Limited has on 30th November 1995 given an undertaking under the provisions of paragraph 2 of that undertaking given on 16th June 1995 (reference number TH 280) to take the following steps by the dates shown:

This information to include details of location and time of sample, the pesticides investigated and the analytical results and, where appropriate the date of abstraction. To continue for the duration of the undertaking. The information to be provided quarterly, within 28 days of the end of the quarter or, in the case of a marked increase in concentration or the identification of a pesticide not previously present, as far as is reasonably practicable, within 28 days of the sample being taken.

(b) Installation of treatment plant:
